CHICAGO, April 8.—There was decidedly buillish sentiment in the wheat pit today and the close showed a gain of 1% o for May. May form was up 1%, but dats were be lower. Provisions were strong and the may products closed unchanged to 300 higher.

higher.

Active buying of May and July deliver ex by Armour was the feature in the wheat market, and it was estimated that anywhere from 2,000,000 to 4,000,000 bushels were taken by that concern during the day. Opening prices were strong on higher cables, the advance abroad being one largely to the confirmation of the reports of damage to the Russian crop, and May was \$60% to \$80% higher at 71%74%. After selling at the there was a gradual advance throughout the day under the influence of the heavy buying by the leading long together with a good export demand for wheat and flour. A change in Bradstreet's world's visible supply figures from a decrease of nearly 2,000,000 to an increase of 30,000 bushels had a little effect on the market as did liquidation by longs out the reactions were only temporary. The market at no time showing weakness. Near the close May sold up to 75% rand final figures were \$15 higher at 75% 15% 2. July cloved with an advance of 15% at 11% 11% 11% 2 after selling between 70% and 71% 2. Clearances of wheat and flour were equito 141,000 bushels against 234,000 bushels a year ago. Minneapolis and Duluth reported receipts of fit cars, which with local receipts of 15 cars, sone of contract grade, made total against 210 cars last week and 81 a year ago.

against 210 cars last week and 31 a year ago.

There was a moderate tendency in cora and the market was firm influenced mainly by the strength in wheat and by the opening up of lake traffic. Bereving that the lifting of the embargo on chapments by water would have the effect of stimulating a cash demand from the east and consequently result in a reduction in local stocks, shorts became uneasy and covered freely early in the session. The selling was largely by protect on interests, Closing prices were strong with May be higher at 43%c, after selling between 42% and 42%f43%c. Local receipts were 228 car with none of contract grade.

Outs were dull in spite of the better ton in the cash market and although the early sentiment was firm on the strength in the cash market and although the early sentiment was firm on the strength in the strength in sentiment was firm on the strength in wheat, the market later became easter

wheat, the market later became ea ler under general commission house selling. Favorable weather was also a depressing influence. After ranging between 35c and 35%c, May closed be lower at 33%c, Local receipts were 169 cars.

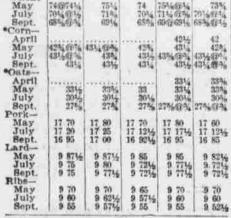

Trading in provisions was dull and the market lacked any features. An advance of 5 cents in the price of hogs was an early buil factor and the strength in wheat and corn was a help later in the day. The close was strong with May pork 20c higher at \$17.30, May 12rd was up 23c at \$9.85 and ribs were unchanged at \$5.70.

NEW YORK STOCKS AND BONDS

Brokers Fear End of Southern Pacific Pool and Stay Out of Market.

NEW YORK, April 8.—Today's business at the stock exchange aggregated barely 200,000 shares, which is tack to the low level of activity. The fact that Friday is the date also for the expiration of the Southern Pacific pool confirmed the disposition to keep out of the market. There is an almost infinite variety of conjectures as to what the effect of this event will be upon the market at large. The possible event most dreaded is the throwing over of the large holdings of the pool following the expiration of the pool agreement, but there is a well defined suspicion that the expert managers of the pool have not NEW YORK, April &-Today's business Service of the control of the contro

NEW YORK, April 8.—COTTON—Opened steady at unchanged prices to a decline of 3 points, and following the call displayed further weakness, particularly on the May and July options, as a result of lower cables than expected, full port receipts for the day and continued liquidation. Further rumors concerning the probability of cotton coming to New York for delivery on May contracts may have had something to do with the early selling of the nearby options. But trading was quiet during the entire session and when May had reached 10.29c and July 3.52c the market was supported by the bull pool, which bought more or less openly. The rally which followed was encouraged by the stronger tone of the New Orleans market, which showed a gain of about 2 points over last night's finals. But after the initial break the market ruled irregular and seemed to be dominated almost entirely by the bull leaders, who however, apparently had in mind merely the sustaining of prices in the nearby options. May, which sold up to 19.33c, or 13 points over the lowest of the session. From this point, however, there was another slight reaction under realizing and the market was finally quiet, with May and April net 1 point higher while the other options were unchanged to 6 points lower. The cow market was fairly active and just about steady with yesterday. The demand was liberal, so that practically everything on sale was soon disposed of. The quality today was, if anything, better than yesterday, so that, although canners and common cutters were slow sale, there were not enough of them to cause the market to drag.

SHEEP—Receipts of sheep and lambs were more moderate here this morning and as a result the market on good stuff was active and steady to strong. The quality of the bulk of the offerings, however, was rather on the common order, so that the market on paper does not look very high. A string of wostern yearlings sold as high as \$5.65 and some clipped sheep and yearlings brought \$6.30. Good stuff is selling as high as at any time, but the part-fat kinds are a good deal lower than they were a week or ten days ago and are slow sale at the decline.

Feeders of desirable quality are in fairly good demand at about steady prices.

Quotations for wooled stock: Choice good demand at about steady prices.
