of cattle here for a Friday, but at the same time there were none too many to meet the requirements of the local trade. All the buyers were out carly, and the market ruled active from start to finish. Beef steers were in liberal demand, and the market could safely be quoted strong. The desirable grades in a good many cases sold Safec higher than the same kinds brought yeaterday. Both the heavy and light weights sold to good advantage, and as compared with the first of the week the general market is fully 1500% higher. There were quite a few good cattle in the yards again this morning, as will be seen from the sales below. Cows and helfers were again in good de-mand, and anything at all decent sold at fully steady prices as compared with yes-terday. Good light weighter for the week canners and cuttera, however, have been alow sale all the week and cannot be used any more than steady. Buils were in good commanded stronger and the better grades commanded stronger and the solar and stags were also fully steady.

There were only just a few stockers and following steady. There were only just a few stockers and foeders on sale and they were mostly on the common order. The few good cattle that did artive sold at about steady prices, but the common kinds were slow sale, and if apything a shade caster, as is apt to be the case on a Friday. Representative sales:

Despite the humid weather prevailing most of the week there has been a good attend-ance of buyers in the wool market. This is taken to indicate that if manufacturers don't care to buy in a large way they nevertheless feel it wise to keep in close touch with the market. Practically all the big consumers have been represented but the sum total of tales his been light. Price, are without distinctive feature or change, holdings steady. There has certainly been no decline in the market and even medium of buyers have already started west after the new cilp. It is felt that the money conditrable effect on early buying. The shipments of wool from Boston to date from December 21, 1902 are 73,555,551 pounds, against 71,305,554 pounds at the same date issue period last year.

A Corner in Diamonda.

A corner in diamonds is predicted, but that is one thing which will not affect working people. There has been an advance of about 15 per cent in uncut diamonda in the last half year, and as 95 per cent of the supply is said to come now from South

Africa and to be controlled by one company a "corner" might be forced. The British government is talking about im-

posing an export tax.
