

NO LONGER IN DOUBT.

The Municipal Campaign in Omaha is Now in Progress. The Candidates ARE BEFORE THE PEOPLE.

The State of Nebraska Looks on with More Than a Passing Interest.

Frank E. Moore, present mayor of Omaha, is in the race for re-election after two turbulent terms in the office. His democratic opponent is Edward E. Howell, who suffered defeat at the hands of Mr. Moore three years ago.

It is in earnest. No man can forecast the result, because nothing is more uncertain in Omaha than the outcome of a local election. The socialists have a ticket in the field and claim they will vote 2,000 ballots. It will take at least 6,000 votes to elect any man in the race.

THE BANKERS RESERVE LIFE

will continue in business at the old stand, its efficient corps of field agents are daily increasing its volume of business. The new territory now being opened up is contributing its share to the growth of the company.

B. H. ROBINSON, PRESIDENT.

wants to correspond with teachers and others seeking employment for the summer. He can make arrangements with them for special work between this and September which will prove highly profitable.

Experienced life underwriters are sure of profitable employment with the Bankers Reserve Life if they will put themselves in communication with the president.

UNCLE SAM'S TIMEKEEPER

Big Postoffice Clock that Measures Omaha's Days and Nights.

ITS CONSTRUCTION AND ITS ODDITIES

Hardly Fifty Pieces in Its Mechanism, Yet It is Accurate and Serves the Public Well in All Sorts of Weather.

Probably 50,000 different people turn at some time or other during the day or night, to look up at the clock in the postoffice tower and read the time of day on the dial of the clock. It is handier than taking a watch out of your pocket and then it is always right.

So it is with the clock. Not one in fifty has the construction of the power behind the hands; of how they are made to go round in their proper time and who winds the clock, if it ever be wound.

What the Clock is Like. It really the clock is neither small nor is it massive. Standing in the middle of the middle of the tower, 130 feet above the street, it marks out the measured beat of time.

It does not seem possible that this simple collection of cogs and bars, not more than fifty pieces in all, could hold such delicate, perfect power in them.

From the cable on the other drum is suspended a 1,300-pound weight and from here comes the power that makes the striking of the hour possible.

Where the Bell Hangs. In the loft above, which is within a few feet of the gabled roof of the tower, the bell is hung securely from the rafters and the massive clapper walls, half lifted, for the signal from the clock.

There is no waiting below. The pendulum swings slowly back and forth in its measured swing and watches day grow into night and night into day.

And how small the dials seem from the setting of the sun.

JOHN BOHN SHOTS HIMSELF

Relieves His Suffering by Putting Bullet Through His Heart.

LEAVES OVER FORTY THOUSAND DOLLARS

Coroner Finds Large Amount of Stocks, Bonds, Checks and Other Securities Among the Dead Man's Effects.

John Bohn shot himself through the heart in his room at the Klondike hotel some time between 3 and 5:45 o'clock Saturday morning, evidently dying instantly. The suicide was discovered by Lizzie Appleton, chambermaid at the hotel, who undertook to awaken Bohn about 9:45 this morning by rapping on his door.

Prattle of the Youngsters. Teacher—How many pounds make a ton? Tommy (son of a coal dealer)—One thousand!

Johnny—Grandma, I wish you'd give me some cake. Mother—Johnny! Didn't I tell you not to ask your grandma for cake?

Tommy—What are you crying about? Jimmy—Why, every time Uncle Ned sees my baby brother, he says: "What a bouncing baby!" and this morning I let him drop to see him bounce.

Small Bobby, who had often expressed a desire for a goat, finally became the proud possessor of one. A short time afterward his grandfather asked: "Well, Bobby, how do you like your new pet?"

George T. Winston, president of the North Carolina A. and M. college, thinks he has the prize when it comes to children's sayings, reports the New York Times.

While visiting in Asheville he went to see one of his friends and met the 3-year-old daughter of the family. Her parents were religious people, and she had learned from them that she must always try to please Him.

From the cable on the other drum is suspended a 1,300-pound weight and from here comes the power that makes the striking of the hour possible.

Where the Bell Hangs. In the loft above, which is within a few feet of the gabled roof of the tower, the bell is hung securely from the rafters and the massive clapper walls, half lifted, for the signal from the clock.
