United States Senator Cullom was the presiding officer. He made the introductory address on the general subject of the community of interests of the United States and Latin America, Senator Cullom said in part:

The movement for closer relations between the several American republics will increase from year to year. It has often been said that trade follows the flag. Trade and the flag should go together, and in the interest of the United States and our sister

and the flag should go together, and in the interest of the United States and our sister republics. I am anxious to see American ships, with the American flag floating over them, anchored in the ports of the south, laden with American products and manufactures for the markets of those countries, and again lacen with the products of those countries for the markets of the United States.

I hope to see the day soon when the three Americas will be bound together with lines of ships, subsidized if necessary, and by railroad and telegraph lines, so that the people of all these nations, north, central and south, can conveniently mingle and trade together.

When the canal treaty is ratified by Colombia, as I trust and believe it will, it will mark the beginning of a new era of the greatest prosperity for all the republics in Central and South America and when the canal is completed it will not only be of vast advantage to all the nations of the western hemisphere, but to the peoples of all nations, as a great neutral lighway for commerce between the western and eastern hemispheres.

Grows Wheat in Wyoming.

CHEYENNE, Wyo., April 18 .- (Special.) --State Engineer Fred Bond is engaged in experimental wheat growing without irrigation. A block of ground in the rear of the state house has been plowed, harrowed and sown with Russian speltz. Last year experiments on a small scale demonstrated that the land would yield at the rate of thirty-five bushel of wheat per acre, and this without a drop of water other than rainfall. This year the ground was plowed deep and Mr. Bond expects to harvest as much if not more than he did a year ago. This experiment, if successful, will demonstrate that arid land in this region is valuable for the growing of what and other grain for feed, although the altitude is high and there is no water to irrigate with.

Of Baby's Dreadful Suffering from Eczema Happily Cured by Cuticura Remedies

"Charlie was fretful and cross, but as he was cutting teeth, I didn't think much of that," said Mrs. Helen Rath of 821 10th Ave., New York City. "Even when a rash broke out on his face I wasn't frightened, because everybody knows that that is quite common with teething bables. But the rash on Charlie's poor little face spread to his neck, chest and back. I

had never seen anything quite like it before. The skin rose in little lumps, and matter came out. My baby's skin was hot, and how he did suffer! He wouldn't est, and night after night I waiked the floor with him weak as I was. Often had to stop because I felt faint and my back throbbed with pain. But the worst pain of all was to see my poor little boy burning and itching with those nasty sores, which the neighbors said was Eczema. A lady across the street gave me some Cuticura Ointment, I think the box was about half full, and a piece of Cuticura Soap. I followed the directions, bathing Charile with the Soap and putting that nice Ointment on the I wouldn't have believed that my baby would have been cured by a little thing like that. Not all of a sudden, mind you. Little by little, but so surely, Charlie and I both got more peace by day, and more sleep by night. The sores sort of dried up and went away. I shall never forget one blessed night when I went to

bed with Charlie beside me, when I woke up the sun was streaming in. For the first time in six months I had slept through the night without a break. Yes, that fat little boy by the window is Charlie, and his skin is as white as a snowflake, thanks to the Cuticura Remedies."
