Connection with Outside Independent Companies to Be Made in Eighteen Months or Franchise is Forfelted.

If the city council concurs in the recommendation of the committee of the whole an ordinance will be passed granting the graph and Terminal company a franchise to establish a local exchange and telephone system in the city of Council Bluffs. This is the company organized by T. D. Metcalf, Dr. D. Macrae, jr., and their associates. The committee of the whole has decided upon an ordinance which, while not making it obligatory on the Western Iowa company, gives it the privilege to establish a local telephone exchange in the city in connection with a toll system to connect with the independent companies now operating in this section of the state. All of the clauses in the ordinance as drafted by the city solicitor and submitted by the special committee which prohibited the establishment of a second local telephone exchange have been stricken out and there is nothing now in the ordinance, as it has been approved by the committee of the whole many 'phones as it likes in the city and

In consideration of the granting of the franchise the Western Iowa company is to pay the city 2 per cent of its gross earnings for the first five years, 3 per cent for the second five years and 5 per cent each year thereafter and to provide the city with ten free 'phones. The ordinance provides that the company shall begin work within six months from the taking effect of the ordinance and to be completed within eighteen months. Within eighteen months the Western Iowa company is to make such arrangements as to establish connections with the lines of the companies belonging to the Iowa State Independent Telephone association as will enable its patrons to communicate with the subscribers of said companies. Failure to furnish these connections will forfeit the franchise.

The company is to furnish free connections for its patrons to all subscribers within a ten-mile radius of the city east of the Missouri river. The rentals to be
