Grain Pits Are Quiet and Prices Lower on Board of Trade.

PROVISIONS RULE FIRM AND HIGHER

Heavy Sales Weaken Wheat After Good Opening, Slump Involving Oats and Corn in Downward Movement.

CHICAGO, May 5.—Quietness prevailed on the Board of Trade today and after ruling firm the greater part of the day wheat closed weak, with July %9 be lower. July corn was off %9%c and oats a shade lower, while provisions closed firm, the July products being from 2½c to ½c higher. Selling by loca, tracers in the rather bearish weekly government crop report was the cause of an easier opening in wheat. bearish weekly government crop report this the cause of an easier opening in wheat, July being off a shade to be at 73c to 73g The early weakness was soon dissipated, however, on open buying by the leader of the longs, followed by a fairly good demand from locals, and the market developed considerable strength, July selling up to 73%c. May was also strong on active covering by shorts, who were alarmed at the reports of damage which came in. Later in the day a reaction occurred on liberal commission house selling, together with selling by early buyers. After selling down to 72%c, July closed wards lower at 72%c72%c. Clearances of wheat and flour were squal to 38,300 bushels, against 20,80 a year ago. Minneapells and Duiuch reported receipts of 40 cars, none of contract grade, made total receipts of 119 cars, against 152 cars last week and 140 a year ago.

against 162 cars last week and 140 a year ago.

Corn retained the bullish tendency which it developed yesterday during the greater part of the session today and there was buying of good character in both May and July. Small receipts and rather untavocable weather, with no presure to self, were the early features. The government weekly crop bulletin showed consiserable damage had been done in the southwest by frosts and this helped in the bull seeling. Late in the day the market became easier in sympathy with the weakness in wheat and on a break of 1%c in May at New York. After seiling between 44%e and 45%c July closed 4%%c lower at 44%c. Local receipts were 21 cars, 12 of contract grade.

There was a good general commission house demand for oats the greater part of the day and prices were atrong, the unfavorable weather condit ons being the principal bull factor. Toward the end of the session the market became somewhat easier, the weakness in other grains being the depressing influence. July closed a shade lower at 21%c, after ranging between 21%031%c and 22%c. Local receipts were 79 cars.

Trading in provisions was quiet, but

Trading in provisions was quiet, but prices held firm throughout the session in spite of the lower prices of hogs. Covering by shorts was one of the features. July pork closed 7½c higher at 317.12%, July lar! was up 1½c at 50.12% and ribs 2½c higher at 50.35. Estimated receipts for tomorrow: Wheat,

"THE POT OF GOLD" UMAHA LIVE STOCK MARKET

Never before in the history of American mining has so much public interest been taken and expressed as in Thunder Mountain, Idaho (geographically described by William Allen White, in a recent issue of the "Saturday Evening Post," as "The Pot of Gold")—And never before has such an opportuity been offered as now presented by Beef Steers Active and Steady, While Cows Were a Little Stronger.

THE "SOUTH DEWEY" MINING CO., Ltd.

which in the strictest and broadest sense is a legitimate investment—not a mere prespect. The property consists of ten full mining claims (208 acres)—immediately adjoining the great "Dewey" mine, whose fabulous richness the most skeptical dare not deny. Stock in the "Dewey" (original par value \$1.00), is now held at \$8.00 per share, and none for sale. The "South Dewey" being located on the same great ledge, and adjoining the "Dewey," known throughout the district as the "Dewey" dyke and having the same ore body, can justly claim to equal, if not surpass in value the original "Dewey"—(when the same amount of development work has been done) since it is one-third larger in area. The ore is free milling and assays an average of \$6.11 to the ton, with occasional pockets running very much higher. Low grade, free milling ores are the most permanent as well as the most profitable, for the reason that they can be converted into builton at a cost of \$1 to \$1.50 per ton. To continue the development work already done, as well as to purchase the necessary machinery for thoroughly equipping the property, we have decided to place a limited amount of Treasury Stock on sale at 10 cents per share. The first ten stamp installment of our hundred stamp will be shipped Aug. 18, 1903, and we feel fully warranted in believing that we can earn dividends within 30 days from the time our mill is running. We own the property outright. There are no salaried officers. The stock (par value \$1.00) is non-assessable, with no personal liability. The present allotment now offered at 10 cents will be advanced from time to time, as may be decided upon by the Board of Directors. which in the strictest and broadest sense is a legitimate investment-not a mere pros Cattle, Hogs, Sheep, RECEIPTS FOR THE YEAR TO DATE.

The time to make money in any enterprise is between its organization and its first dividend. Before purchasing stock we want you to write for our prospectus, giving full particulars of our property, together with a most interesting description of "Thunder Mountain," which conservative investors admit is destined to become the greatest gold mining camp the world has ever known.

For the three days this week the Dupply is about the same as for the corresponding days of last year. The demand, though, was active, so that the market was in very satisfactory is so that the market was in very satisfactory condition.

Beef steer buyers seemed to have liberal orders to fill and as a result they were out early in the morning and the market ruled active and rully steady from start to finish. The big end of the receipts consisted of steers, but in spite of that fact there were very few left in first hands by the middle of the forencon. The handy weight cattle were again the favorites, but still they did not sell much of any higher than they did yesterday and the heavy cattle also sold to as good advantage as they did yesterday.

The cow market was active and, if anything, a little stronger than it was yesterday. A good many salesmen thought they got as good prices as they did on Monday, or, in other words, yesterday's decline was regained. That was not true in all cases, however, and the market could probably beat be described by calling it strong and active, with some sales 5610c higher.

Buils sold freely at good steady prices and the same was true of veal calves and stags.
