RE-NO-MAY-POWDER

ELLENBURG, Wash., May 9, 1903.

A. MAYER CO.—Before going to Alaska I bought a box of Re-No-May Powder, which cured the worst case of chills and sweats I ever had. Without it I could not have lived in the climate. Anyone in the States who is going to Alaska can address me, and I will send you a sample free of charge. Respectfully,
DAVID WILLIAM HORNBECK.

A Mayer Co., 512, Bee Bldg.

trating still another branch of work, while the Kindergarten exhibit occupies another corner, the cut and folded paper designs, geometrically mounted, free-hand cutting, sewing and outlining in the bright pinks and colorings of birds is all most attractive and interesting. And then there are the common lead pencil drawings of objects, the lights and shades being well brought out in the glass objects and the life and action of the figures giving genuine attraction to the collection. All in all, the exhibit is most creditable, especially as it includes only the every day work of the pupils, and it compares more favorably with similar exhibits held recently in other cities.

The exhibit will be open all morning and between two and 6 o'clock in the afternoon. Superintendent Pearce has issued a circular advising principals that pupils above the third grade will be admitted Wednesday, Thursday, Friday and Monday afternoon between 4 and 6 o'clock, those attending schools north of Dodge street to come Wednesday or Friday and those on the south side the other two days. Children below the third grades must be accompanied by parents or chaperones.

An interesting charity is being carried on by some of the members of the senior class of Dr. Sargent's school of physical culture at Cambridge among the charity patients of the Child's Hospital of Boston, and among the efficient workers of the class is Miss Elsie Schwartz, an Omaha girl. These children are the defective and deformed little creatures from the poorer districts and the students are devoting hours to them each week, giving them corrective exercises for the various forms of spinal curvature. It is difficult to keep these little ones interested and amused during the time necessary for the exercise and here Miss Schwartz has been especially successful, her experience as a kindergarten teacher in the Omaha schools enabling her to hold their attention with most gratifying results. This clinic work has proven quite as valuable to the patients as to the students for a special study of physiology, anatomy, hygiene and the laws of heredity and disease has enabled these young women to practice intelligent, prescribing and supervising special exercises for each patient. Miss Schwartz, in addition to general physical culture, is specializing in gymnastic work.

The pupils of Lake school are to purchase this week a memorial picture in memory of Miss Lida Hanna, who died recently and who for thirteen years taught the first grade of that school. At the time of the funeral the contributions for flowers was so ample that it was more than enough and the surplus is to be used for this permanent memorial which will be hung in the school. The subject of the picture has not yet been decided upon.
