September received most of the support. There was a disposition to take the selling side early, owing to the reports that Ar-mour was no longer interested in the May, but the damage reports and outside buying were of a sufficient volume to turn the scale towards higher levels. Crop news from abroad shows an improvement and the Illinois reports are also of an improve from abroad shows an improvement and the Illinois reports are also of an improve from abroad shows an improvement and the Illinois reports are also of an improve from abroad shows an improvement and the Illinois reports are also of an improve from abroad shows an improvement and the Illinois reports are also of an improve alderable profit taking, which caused a slight setback. Export sales, 12 loads at New York. There were none reported here. Receipts were St cars, one contract, 30 cars estimated for tomorrow. CORN-There has been a spirited session in corn with a big outside interest and a strong, steady market. The principal strengthening influence has been the re-ports that a railroad strike is probable and on the strength of this news there was covering by one of the leading short in-terestic which contributed liberally to the support. Another bullish feature was the reports of enormous losses to hay and feed stuff in the east by drouth and the strong demand for corn contributed its share to the strength. Receipts were 452 cars with 50 contract; New York reports 14 loads taken there for export, There were 160,000 bushels sold here for shipment east. The Illinois crop report shows an improvement since the rains. There are 306 cars es-timated for tomorrow. We have received fields and subsequent rotting in the ground. OATS-The strengthening influence has been the news of the continuance of drouth throughout the east. Cash market firm and higher for the better grades. Crop damage reports seem to influence trade to buy September and more deferred futures arther than July.
