The supreme court, in a recent decision in the case brought by Shinn, upheld the ing. contract with Cunningham. Under this contract Cunningham was to get 50 per cent of the taxes collected as the result of his efforts. The contract was entered into late in the year 1899 and referred to taxes then due. In view of the decision of the supreme court, declaring the contract legal, it is no longer disputed that Cunningham is entitled to half of the taxes he brought in for the years prior to 1899, or something over \$4,000. There now arises, however, a dispute as to the meaning and scope of the contract. According to Cunningham's contention, he is entitled to 50 per cent of the taxes collected for 1899 and

Manawa People Troubled.

The waters of Lake Manawa have risen so high with the continued heavy rains that great damage is being done to the dyke along the southwest part of the lake. With the recurring high waters of every spring slarm is felt for the securing of the lake, the fear being that this dyke will give way and that the lake will then be drained into the river. The lake bed is considerably higher than the river and should the dam give way it is said that the lake bed would be left high and dry. The management of the Manawa resort is confident that by proper repairs and careful watch anything of the kind can be 1,300 prevented at this time.

OHIO REPUBLICANS TO MEET State Convention Which Convenes

Sharp Contests.

COLUMBUS, O., June 2.-The indications tonight are that the republican state convention here tomorrow and the next day will not be such a harmonious ratification meeting as was expected. While there will be no opposition to the endorsement of President Roosevelt, Senator Hanna and others and no differences on national issues, there are differences of opinion on state questions and very animated contests for places on the state ticket, except for governor, auditor of state, attorney general and member of the Board of Public Works. There will be lively balloting for lieutenant governor and it will continue for treasurer, supreme judge and

Crop Bulletin Shows that Damage by Floods Has Been Unprecedented and Present Need is for Warm Weather.

(From a Staff Correspondent.) DES MOINES, Ia., June 2.-(Special.)-The State Board of Control gets only \$4,000 from the state for use in making the repairs at the institution for the feeble minded at Glenwood. This is all that the state executive council has at its disposal. It was considered possible that if the emergency warranted it the council might make an extraordinary appropriation and trust to the legislature to approve the same. This would be a proceeding not without precedent. As the consultation today between the council and the board it

was decided best that the board should try to temporize with the help of the \$4,000. The board will be able to save a little from the other appropriations at Glenwood and this can be used for the repair work. The quarters in the custodial building occupied by the officers and employes will be given over, so far as possible, for the use of the inmates of the institution. In one way or another the board will get along until the legislature makes an appropriation.

Iowa Crop Report for Week. Crop bulletin, Des Moines, Ia., for week ending June 1: This has been the most unfavorable week of the season. The temperature was below normal, with a very large excess of cloudiness. Heavy showers occurred daily in the larger part of the state, and severe local windstorms (not tornadoes) caused much damage to trees, windmills and light structures in many places. Following are some of the reports of heavy rainfall for the week: Des Moines, 7.40 inches: Jefferson, 7.49; Scranton, 5.93; Carroll, 4.77; Marshalltown, 5.61; Blairstown, 5.10; Iowa City, 5.68; Mt. Vernon, 4.94; Grundy Center, 5.30; Amana, 5.15; Waterloo, 4.58; Logan, 8.90; Albia, 4.80; Charles City, 4.25 All stations report a very heavy excess above normal. Damage by floods has been almost unprecedented. The loss to crops by washing will be considerable, and much of the lowlands will be abandoned. Field work has been practically impossible except in a very few favored localities. There is great need of dry warm weather to repair some measure of the damages and to secure crops from the uplands that have been planted. The acreage of all cereal crops must of necessity be materially less than the area harvested last year. The apple crop is promising.

Rheumatism

Those who have ever felt its keen, cutting pains, or witnessed the intense suffering of others, know that Rheumatism is torture, and that it is rightly called "The King of Pain."

All do not suffer alike. Some are suddenly seized with the most excruciating pains, and it seems every muscle and joint in the body was being torn asunder. Others feel only occasional slight pains for weeks or months, when a sudden change in the weather or exposure to damp, chilly winds or night air brings on a fierce attack, lasting for days perhaps and leaving the patient with a weakened constitution or crippled and deformed for all time.

An acid, polluted condition of the blood is the cause of every form and

variety of Rheumatism, Muscular, Articular, Acute, Chronic, Inflammatory and Sciatic, and the blood must be purged and purified before there is an end to your aches and pains. External applications, the use of liniments and plasters do much toward temporary relief, but such treatment does not reach the real cause or cleanse the diseased blood; but S. S. S., the greatest of all blood purifiers and tonics, does cure Rheumatism by antidoting and neutralizing the poisonous acids and building up the weak and sluggish blood. It is safe

and reliable in all forms of Rheumatism. It makes the old acid blood rich and nutritious, and the pain-tortured muscles and joints and the weak and shattered nerves are made strong, and the entire system is invigorated and toned up by the use of this great vegetable remedy. If you have Rheumatism, write us, and our physicians will furnish without charge any information desired, and we will mail free our book on Rheumatism.
