MUCH OF CORN CROP TO BE REPLANTED

Winter Wheat on Low Lands Sustains Much Injury, but on the Whole Makes Satisfactory Ad-

WASHINGTON, June 2.-The weekly crop bulletin of the Weather bureau is as

The states of the lower Missouri valley and portions of the Mississippi valley have suffered much from heavy rains, especially Iowa, the eastern portions of Kansas and Nebraska and western Missouri. The drouth continues in New England, the northern portion of the middle Atlantic states and in Florida, and rains are needed in portions of the central gulf states and in southern Texas. Drouth conditions have been wholly relieved in the Ohio valley and over the greater part of the southern mid-Games today: Colorado Springs at die Atlantic states. The greater part of lower Missouri valley and the lower gult states, damaging frosts occurring in the igst named district. Very favorable temperatures prevailed in the lower Ohio valley and the east gulf states. More favorable conditions than in the previous week are reported from the Pacific coast states, much needed showers having occurred in Oregon and Washington. Wet weather has caused further delay in corn planting in the Missouri and upper Mississippi valleys, where much of this work is unfinished and the early planted is becoming weedy.

Rains Damage Crops.

In the eastern portion of Kansas and Nebraska and Iowa corn fields have been badly washed out and much replanting will be necessary. In Iowa the acreage will be materially reduced. In Illinois planting is practically finished and an excellent stand attained. In the central and upper Ohio valley planting is also delayed and early fields in some portions are suffering for cultivation. In the southern states corn has experienced a very favorable week and is largely laid by.

Winter wheat on low lands in the eastern portions of Kansas and Nebraska and northwestern Missouri has sustained injury wheat is being cut for hay.

Wheat Doing Well.

In Nebraska, the Dakotas and northern Minnesota spring wheat has made splendid progress, but in southern Minnesota, Wisconsin and Iowa, the crep on low lands has suffered much from heavy rains. In Washington and Idaho the crop is greatly improved. On low lands in the lower Missouri and upper Mississippi valleys oats have suffered from heavy rains, but on the whole the crop has done well, and in the Ohio valley a general improvement is reported. In New York and Pennsylvania the outlook is not promising. Harvesting

has begun in Texas. Further improvement in the condition of cotton is generally indicated, but the crop, as a rule, is from two to three weeks late. Better stands are reported from the Caroas. Tenne Mississippi, Louisiana and Texas. In Arn central and southern Texas.

The prospects for apples are promising in many of the important apple states. In southern Missouri, however, a very light crop is indicated, and in New England serious injury has been done by recent frosts. The hay crop continues promising in the Missouri and upper Mississippi valleys and further improvement is reported from the Ohio valley and middle Atlantic states.

The stocks in which Ames Co. and their clients have been largely interested in are Dominion Steel, common, purchased around \$70 and which are now selling at \$15 per share; Sloss-Sheffield and other industrials purchased at figures much higher than their present prices. Twin City, which has declined from 128 to 92, was another stock held in large blocks by the

firm's clients. After a meeting of the members of the firm it was decided to suspend payment. The following notice was posted;

Owing to the continuous severe declin in the securities market we have found it necessary to suspend payment and would ask the indulgence of our friends for a few days until we can prepare a stateme of our affairs and decide what is best be done. AMES & COMPANY.

The liabilities of the firm are hard to get at, but rough estimates of them show as follows:
