Weather Governs Grain Pits, Which Rule Weak, on Board of Trade.

PROVISIONS CLOSE STEADY AND LOWER

Outside Markets Influence Wheat, Cessation of Rain Depresses Corn, While Oats Suffer In Sympathy.

CHICAGO, June 8.—The grain markets were governed almost entirely by the weather today and ruled weaker, July wheat closing ac lower; July corn, ac lower and oats down ac. Provisions closed standy, the September product being 5610c lower.

while closing is lower; July corn, is lower and oats down is. Provisions closed strictly, the September product being is still the conditions, together with disappointing caples, caused considerable selling at the start and opening prices were lower. July being is in the start and opening prices were lower. July being is in the start and opening prices were lower. July being is in the start and opening prices were lower. July being is in the start and opening prices were lower. July being is in the start and opening prices were lower. July being is in the season to the start and the northwest especially weak, and this fact brought out plenty of long wheat, and with little support the market gradually yleided, July selling off to in the day commission houses that had sold earlier in the session turned buyers and the market railled somewhat, although only a small part of the early loss was regained. The close was steady, with July is lower at 75%c. Clearances of wheat and flour were equal to 357,000 bu. The visible supply decreased 1,817,000 bu, which was about what had been expected. Primary receipts of 400 bu, against 516,300 bu. a year ago. Minneapolis and Duluth reported receipts of 405 cars, which with local receipts of 41 cars—none of contract grade—made total receipts for the three points of 405 cars, against 536 cars a year ago.

CORN—In spite of the buillish foreign news and firm cables, the corn pit experienced considerable weakness throughout 'be day, the greatly improved weather conditions being the dominating influence. Local longs led in the selling, while outside traders were also on that side of the market. July, is lower at 47sc. after selling between 47s, and 48sc. Local receipts were 250 cars, with 21 of contract grade.

OATS—Started weak in sympathy with the decline in other grains and much needed rains in the east, together with better weather west and southwest. Offerings were liberal early in the day, local long being the best sellers, but the market was well supported by three or four conc at \$1.174. Estimated receipts for tomorrow: Wheat,

Foreign Financial. LONDON, June 8.—Money was abundant in the market today. The indebtedness to the Bank of England is expected to be cleared off tomorrow. Discounts were sympathetically weak. On the Stock exchange operators were idle, with the exception of arranging the account. The increasing of the Berlin bank rate from 3% to 4 per cent had a weakening influence Consols were easier, Home rails were weak.

Americans opened depressed and below parity, railled slightly on local support, subsequently broke sharply and closed flat. The amount of buillon taken into the Bank of England on balance today was £7,000. PARIS, June 5.—Business on the bourse today opened hesitating, the weakness of gold mines affecting the whole list. At the close prices were weak. Three per cent rentes, 38f 35c for the account. Exchange on London, 25f 17c for checks.

BERLIN, June 8.—Prices on the bourse today were rather weak and trading was moderate, Canadian Pacific was lower. The rate of discount of the Imperial Bank of Germany was raised today from 3½ to 4 per cent. Before the central committee of the bank President Koch gave the reasons for raising the discount rate. He said the last return showed \$50,500,000 higher liabilities than a year ago. The metal stock was \$40,500,000 less. The relation of the liabilities to the assets on May 31 was never so unfavorable before. At that date the note circulation, particularly uncovered notes was unusually large, private deposits were below last year's minimum, money was scarce in the open market, the private rate of discount was rising and Germany's gold balance, with foreign countries, was much worse than in previous years. The chief reason for raising the rate of discount was to attract foreign gold. The bank greatly needed to strengthen its status for the end of the quarter, and for the autumn, because the money situation abroad, especially in the United States, was not reassuring. The newspapers express the hope that the higher rate of discount will cause a return of money from the United States, since the extension of loans might cause a disturbance in the German market. Exchange on London, 20m 4½ pfgs for checks.
