Anything desirable in the way of beef steers sold readily at steady to strong prices. The supply was not excessive and as packers have not been getting any too many cattle for the last few days they took hold freely and the prices paid were very satisfactory. The bulk of the fair to good cattle sell from \$4.50 to \$4.85, with the choicer grades selling largely from \$4.57 (to \$5.15. As mentioned yesterday, the de-ciline of the first two days of the week has been fully recovered and the market may be quoted as closing stronger for the week. The cow market did not show much change from yesterday. Desirable grades of confiel stock was in good demand and the prices paid were fully steady. There sale, so even the grass stuff, which has been selling slowly for the last few days, 64. was easier to dispose of than usual, though the prices did not show any quotable change. Bulk sold at just about steady prices, but

Dehavior of Ghosts.

When you have read one of these stories you have read them all. Although the behavior of ghosts may appear eccentric when judged by the standard of conduct prevailing among the living, their habits are, in fact, most regular, they seem to possess little character or originality and probably their ideas are very limited. Some of them walk along the passage or up tha stairs; others knock on the walls or furniture, rin bells, slam doors or break crockery; now and then you come across one who shricks; and there seem to be a few stray specimens who appear (and disppear).

But the faculties do not go beyond this. 5,011 3,154 1,574 A very remarkable proof of their limita-tions, or their slavish adherence to tradi-tion, is that, though I have before mo at the present moment a dozen authenticated

ghosts who have been heard walking up

stairs, there seems to be no case on rec-

ord in which a ghost has been heard walking down. Why anybody should think it worth while to chronicle the movements

of such uninteresting creatures I cannot

understand. An account of the day's do-ings of a flock of sheep would be much
