To Unite Christian Societies.

To Unite Christian Societies. DENVER, July 11.-A movement of signal importance in the religious world has been haunched by the Christian Endeavor con-vention, now in session here. It is a tenta-tive proposal to work for the amalgamation of the Christian Endeavor society, the Ep-worth league and the Baptist union and 't will be presented in the form of a petition from the Endeavorers to the other national bodies. In taking the initiative in the ad-vocacy of such union the Christian En-deavor society points to its priority of es-tablishment as justification.

RHUBARB-Per Ib.,	lc.			hou

The recent break in the price of raw cot-ton has been attracting considerable atten-tion. The decline amounts to about 1% eent since June 25, which was the date when the highest point was reached. Local jobbers, however, say that this does not mean lower prices for the manufactured articles. On the contrary they look for prices to move steadily upward and at a rapid rate. The reason given is that cot-ton goods are being sold in Ornaha for less money than they can be bought for at the mills. The goods that jobbers now have on hand are being quoted on a basis of 5-cent cotton, whereas the present price of cotton even at the recent decline is over if cents. Not only that, but those who have made a careful canvass of the situa-tion say they are confident that the new grop will sell around 11 or 11% cents. The cotton beit, and after the weather of a sinest impossible to work it. As a result the ground baked so hard that it was almost impossible to work it. As a presult the corp is three to four weeks baids and the stand is rather poor. Be-sides, the fact that the outlook is not favorable for a heavy crop comes the re-port that the deal is being backed by un-initied capital. Taking all these things into consideration. local jobbers do not see any relief in sight from the present high price of cotton. The recent break in the price of raw cot-

The version of the second s

## Hardware Moving Freely.

Hardware Moving Freely. There was a good demand last week for all seasonable lines of hardware. As a gen-eral thing the refrigerator trade is over with by this time, so far as the while-saler is concerned, but owing to the cool weather in the spring and the extremely hot weather of the last few days the de-mand has come laste and a great many have been shipped out during the last week Other staple lines are also selling freely for this time of the year, so hardware men are well satisfied. There have been no new developments in the market since last report. Prices are good and firm all along the line, with no prospect of any important changes in the mear future.

prospect of a near future.

## Beginning to Ship Fall Goods.

Beginning to Ship Fall Goods. Leather goods jobbers are beginning to ship out their fall stocks to the far west Very few shipments. though, have been made to nearby points. Some completing the heard about the slow arrival of go do out the factories and it begins to look as hough the manufacturers were behind with their orders. This is true with rubber or real as leather goods. Immediate business is of course rober quiet though quite a number of small orders come in for oxfords, slippers and that class of goods.

## Fruits and Vegetables.

The hot weather of last week created a heavy idemand for fruits, but the heat also made it difficult to make shirments and have them arrive in good condition. Just about the same lines are on the market as were offered a week ago. Birawberries are about gone. A few arrive occasionally, but they are most too soft to ship to the country. California fruit is a little chesper and so also are watermelons. Lemons,
