(From a Staff Correspondent.) DES MOINES July 12 - (Special.)-The increase of over \$200,000,000 in the total valuation of Iowa farm lands by the assessors lands indicates that there is a general demand for a fair and honest assessment of all classes of property in the state. The total valuation of farm lands has gone up by this assessment to \$1,4%,363,000. The average valuation on the 24.616,000 acres assessed as farm lands is \$42.03 an acre. against \$36 last year. Exact figures have not yet been obtained on all the personal property and town lots, but it is known the State School for the Blind at Gary, that the reports show these classes have also been assessed higher than ever before. In fact the assessors have tried hard in most counties to live up to the statutory requirement that the assessment be on a valuation that corresponds to actual values. While the figures on real estate are as given not all the counties have made com stock ranch, situated near Wessington piete reports. Lynn county has reported as yet only the average valuation per acre. The State Executive council commenced this week the work of equalizing assessments as between the various counties. It is a task that will be attended with some difficulties because of the

large increase in valuations. Counties May Be Heard.

It is expected that some of the counties will ask to be heard in regard to the asseasments. The council sent out notices at the beginning of the season to the effect that unless the assessments are on a basis according to law they would be raised. Some of the counties have deliberately evaded this and are sure to be raised. Others have gone too far and have got their assessments too high. The council will have before it a mass of good information in regard to the actual value of farm lands. The secretary has secured statements from every county showing exactly what the assessments have been on those tracts of land that changed hands last year, and it is found that in many cases they are almost up to the sale values The secretary has also secured from every ourty in the state estimates on what ought to be the valuation in other and surrounding counties. These estimates will all go before the council.
