SHARP ADVANCE IN THE PRICE OF HOGS Feverish Day Brings Railies and PROVISIONS ALSO WEAK AND MUCH LOWER Slumps, Final Hour Wilting Prices. NEW YORK, July 16.-The day in the stock market was a feverish and excited one and the many fluctuations in its course kept sentiment constantly unsettled and nervous. Testerday's late raily was fol-lowed up at the opening this morning, but was promptly taken advantage of to renew the selling. Later in the day speculative sentiment brightened considerably and again a disposition developed to buy stocks. During the last hour again a violent liqui-dation sprang up in Amaigamated Copper and American Smelting. This seemed to prompt a renewal of selling throughout the steadied later in the day. but ran off again and the closing was active and easy, with the average level of prices not materially stocks which developed notable strength during the day saved an appreciable por-tion of gains at the iast. A furfous demand sprang up at one time for Canadian Pacilic, which seemed to come principally from an uncovered short inferest, as the stock was loaning at a premium at the time. New York Central and lilinois Central were noticeably scarce and were lifted 24:63 at the period of the active demand. Amaiga-mated copper rose 1½ over last night, after it was announced that the usual quarterly dividend of one-laif of 1 per cent had been declared. The slump in the stock carried it down to 4½, compared with the previous low record of yesterday at 45½, and the last price was only '4, better. The break in Smelting extended to 3½. If this movement was abear raid, as was supected, it was eminently successful in depressing the whole market, which had ranged at one time quite generally from it to 2 points over linst night. Many Inactive stocks also had made wide recoveries. Attention through-out the stock market world was still con-centrated today on the developments in the money market and the bright sentiment which was fet during the mid-day session was due to the generality for one line world in a violent break of nearly '4, for the pound for demand bills on London. Last Year's Swiss Cheese Product is

Reported to Be Nearly

"All In."

Nearly gone are the crusty but true-

searted old Swiss cheeses of last year and

the rather insipld younger generation has

taken its place on the market. The new

ones are getting to put up a fair resemblance to the ancestral flavor, but are still

a triffe too mild. The old numbers are

closing out at 15 cents and the new are

coming on at 14 or 15 cents. The full cream American cheeses are a little higher this year than they usually are, but are coming

down as the season advances. The picnic sandwich can get loaded up at 12% cents,

Butter and eggs are disgusting. Of course

the carefully reared creamery product is

as good as ever, but the country siuff which has to struggle with the hot air

and the microbe is just about able to make the renovator man and nothing more. The

June butter is the pride of the year, but

the July article is not a half-sister to it. The price is still 13 cents. As a matter of

fact, the ordinary agricultural ogg can't

stand to be poached. Buyers on the rold

taking everything offered are giving only

pound, and the commission men, who are

paying 12 cents, regard it with such deep

suspicion that never a cent goes out until the eggs have passed the physical examination and have looked the candle in

Plans for New Greenhouse.

Plans for New Greenhouse. Plans have been received at the office of the board of directors of Forest Lawn cemetery for the large green house which it is proposed to erect in the fall at an esti-mated cost of about \$3,500. The contract for the building probably will be awarded at the next meeting of the board and the work begun in September. The house is to be of the latest design, with all the ac-cessories up to date. The center house will be Soxie feet and the two wings for 20 feet, and the structure will be of iron and giasa. J. Y. Craig of the park board made drafts for the design, which were worked out in Chicago. The house is to stand about 100 feet northeast of the house occupied by the cometery warden, near the main entrance. AV. 85. Fr.
