

COMING OF A BIG CIRCUS

How a Modern Show Travels and How it Sets Its Tents.

INNOVATIONS IN MANAGEMENT ARE MANY. Pioneers to Prepare Breakfast for the Canvasmen Precede the Caravan Which Eats Before it Does Any Work.

Ringling Bros' circus, admittedly the largest thing of its kind in the world, exhibits at Twentieth and Paul streets this afternoon and evening. According to the reports from cities where the show has played this season, the stereotyped "better than ever" has never been used with greater veracity. With its army of 2,100 employees, legions of horses, quantities of scenery and properties, extensive menagerie, the whole representing the investment of hundreds of thousands of dollars, the Ringling Bros. has always been able to live up to their advertising.

How Other Trains Are Made Up.

Train No. 2 carries the huge menagerie, the stake and chain wagons, the electric light engines, dynamo, the great portable pipe organ and heavy wagons and work horses. Train No. 3 has the ring stock, the big tents for the main show, the menagerie and the dressing rooms, the baggage cars, the performers and the immense spectacular scenery, including the properties. The fourth train is composed almost exclusively of Pullmans and transports the performers, business staffs, and the precious elephants and camels.

The chief new feature of the parade this morning, which starts to move shortly after 10 o'clock, will be the magnificent floats representing nearly every country in the world. From six to a dozen people, men and women, are upon each float. The decorations being cosmopolitan, afford opportunity for ornamentation of great beauty and brilliancy. The display for the United States is particularly gorgeous, including a mounted band in specially designed uniforms, a big cavalry section, the float containing twenty girls. In the parade is the famous herd of forty elephants, or more than half of those in captivity, and an extensive children's section, having a multitude of ponies and clowns. One chariot, driven by a single man, is drawn by twenty-four of these animals. In the parade is the famous herd of forty elephants, or more than half of those in captivity, and an extensive children's section, having a multitude of ponies and clowns.

Features of the Performance. In the performances, which begin at 8 and 9 o'clock, the grand piece of resistance is the much commented on "Jerusalem and the Crusades," being in two acts, lasting thirty minutes and enlisting nearly the entire staff of performers, supernumeraries and horses. The scenes and appointments to the last shield and spear are historically correct. Beverly is at Claremont, France, whither King Philip I. has called the Christian knights to listen to the impassioned address of Peter the Hermit, who has been to the Holy Land. Then begins the famous march to Jerusalem, with hundreds of voices singing. The stomp at Constantine is shown, which gives opportunity for feats of horsemanship before Alexis. The last scene depicts Jerusalem, the pagan emir and the grand ballet of 30 girls. While the ballet is in progress the city is attacked by the Christians. Save for the mighty chorus the whole is in pantomime. The regular circus performance of 15 acts, in which appear the most famous talent of the kind in the world, is enacted.

A feature of the show this year which was not altogether rearranged is the Junior menagerie. There are more baby animals than were ever grouped in captivity before, including the six-month-old "Baby Boo," an elephantine child which the crowds pass up the \$10.00 rhinoceros to see. There are baby camels, baby leopards, six lion cubs, "Little Tim," the juvenile sacred bull, spotted fawns of miniature architecture and others.

Goes from Bad to Worse. E. D. Edwards, who gives his address as Twenty-second and Douglas streets, yesterday afternoon, sold four tickets to a benefit ball in the vicinity where he is arrested. When taken to the station Edwards confessed to Captain Mostyn that he had the tickets printed by local printing company. He said that he had ordered 100 of them, and that the printers gave him two dozens of them to show to the committee, which existed only in his mind. He promised to return and take the rest of the tickets and pay for them, providing they were satisfactory to the committee. The two dozen tickets which had been printed when Edwards was arrested and he had sent the money for drinks, all but 2 cents. The benefit was supposed to be for the aid of some man who had lost both eyes in an accident. Edwards is about 22 years of age.

McInty Went Down. Patrick McInty, a grader, kept up the reputation of his name in the old song by going down. Patrick went down in a fight and the man who put him out was Harry Jones, who lives at 22 North Ninth street. Jones was locked up, charged with assault and McInty will remain in a cell to appear against him this morning. The fight occurred about 8 o'clock yesterday afternoon.

George Wilson is Wanted. A telephone message was received by the police from Paterson, N. J., yesterday, asking that George Wilson, who is stopping at Elms Omaha hotel, be located. His brother is lying at the point of death in Paterson and it is the desire of his friends that Wilson communicate with them at once.

MRS. STOVER'S AGONY OVER

Victim of Hydrophobia Dies Peacefully Owing to Powerful Opiates.

Mrs. George W. Stover died at her home, 147 North Twenty-fourth street, at 10:30 yesterday morning, a victim of hydrophobia, which attacked her last Sunday. She passed away peacefully and without pain or violent convulsions, due to powerful injections of opiates. From 2 o'clock in the morning until the time of her death she was momentarily expected and Dr. J. A. Cummings was in constant attendance. The dreaded paralysis began early in the morning and proceeded steadily until it had conquered the heart. It was desired to obviate all the physical contortions and frothing at the mouth which usually accompany the disease and this was successfully accomplished.

Mrs. Stover was the wife of George W. Stover, a confectionery manufacturer and wholesaler. Besides him she leaves a son, George Stover, aged 17 years, a brother, Assistant Fire Chief Windheim, and a sister, Miss Windheim. Mrs. Gellenbeck, who was one of the other persons bitten about six weeks ago by the spaniel pup that caused Mrs. Stover's death, went to Chicago yesterday morning for treatment at the Pasteur Institute. Indications that rabies was attacking her were apparent to the physicians.

The other persons known to have been bitten have decided to wait until the scars of the wounds show signs of inflammation, when they, also, will go to Chicago to undergo the daily injection of the anti-hydrophobic serum. Mrs. Stover's death has caused a profound impression all over the city, and every person who owns a dog is watching the animal carefully. The fear of an epidemic of the disease among the neighbors of the Stovers has somewhat subsided. It is usually about six weeks after the rabies develop, and within a short time, if there are no more seizures, the apprehension will wear off.

TALKS OF DISCRIMINATION

A. J. Vierling Tells Real Estate Exchange About Freight Rates.

A. J. Vierling of the Paxton & Vierling iron works entertained the Real Estate exchange yesterday at the Commercial club with some figures showing that Omaha is suffering from discrimination by railroads and is heavily handicapped in making shipments of manufactured goods and in receiving raw material. Mr. Vierling said the shipments made by his firm fall under the fifth class of freight. In the case of a shipment to Reno, Nev., he said the rate from Omaha was \$1.37 and the rate from Chicago to Omaha \$1.00. The rate from St. Paul to Reno was the same as the rate from Omaha, namely, \$1.37, and the St. Paul rate from Chicago was only 15 cents. This notwithstanding the fact that the St. Paul shipment would pass through this city.

In all shipments to Pacific coast points the Omaha rate was the same as the rate from New York, as for instance to Portland, Ore., the rate from Omaha and New York was 25 cents. The direct rate from Omaha to Lead, S. D., is 40 cents and the St. Paul rate is 75 cents. Against this is the rate from Chicago to Lead, which is only 75 cents. The advantage for the Chicago manufacturer, however, lies in the fact that it is the complete rate, while Omaha must bring its material from Chicago here to manufacture before sending to Lead. The rate for the material to Omaha and the product on to Lead is then 75 cents and the same rate for St. Paul is 10 cents. The St. Paul product is all hauled to Omaha and reloaded here for Lead. Mr. Vierling said the reduction of the bridge toll was of the greatest possible advantage to his firm. The Real Estate exchange thanked Mr. Vierling for his remarks and transacted no further business.

INSPECTS FEDERAL BUILDING

Major Haverstick Speaks Well of the Condition of the Omaha Structure.

Major W. Haverstick of Washington, D. C., general supervising inspector of public buildings under the Treasury department, is in the city on his annual tour of inspection. Major Haverstick has 330 public buildings to inspect, including those of Portland, Ore., to Portland, Me., Brownville, Tex., and Key West, Fla. He left San Francisco June 22. It ordinarily requires two days to inspect a government building and the work is exacting. Major Haverstick said: "I find the Omaha building in first-class condition and much improved over the condition of last year, both in its general and sanitary aspects. The Omaha building ranks as one of the first-class buildings of the United States, being classed along with the buildings at Buffalo, N. Y., Milwaukee, Wis., and Savannah, Ga., in its architectural design. I also find that the public buildings at Lincoln, your state capital, is in very good condition, much better in fact than ordinarily occurs with government buildings at capitals of states. I do not know the real reason of this, but it is to be noted that the state capitals are generally political centers and the custodians of the buildings feel indifferent as to the absolute sanitary perfection of the structures. I shall remain in Omaha for three or four days."

POKER PLAYERS STAY IN JAIL

County Attorney's Office Not Ready with Complaints Against Men Arrested.

Assistant County Attorney Montgomery was asked yesterday morning whether he intended to file complaints against Harry Vorcheval, the proprietor, and five men found playing poker in his barber shop and arrested at 106 Howard street Tuesday night by the police. "I don't know anything about these cases and don't propose to file any complaints until I do," he replied, shortly, and went nothing further to say. The case of Frank Chase, who for a month has been charged with keeping a gambling house, was called in police court yesterday morning, but Attorney Montgomery begged another continuance, stating that it would take a long time to hear the evidence. Accordingly the time was set for July 28.

Tuesday night Sergeant Renfrow and Officers Baldwin, Stryker and Devereaux raided the place on Howard street. Vorcheval came to the door in response to the sergeant's knock and unlocked it when commanded to do so. In a rear room the other men were grouped around a table which contained cards and chips. They made no attempt to get away and when brought to the station gave fictitious names. All were still in jail yesterday.

LOCAL BREVITIES.

John Gilbaugh, who lives at Seventh and Clark streets, was arrested by Officer Shepley yesterday afternoon. He is charged with being drunk and resisting arrest. Wright Gundry and Lillian Murphy purchased a room at Bertha Bush's, 98 South Tenth street, Tuesday night. The room was facing the street, and passerby were opposed to living pictures, saying they were arrested and were charged with indecent conduct and vagrancy, respectively. A barn belonging to Mark Cannon, at 226 Spencer street, was totally destroyed by fire last night. The barn was valued at \$1,300, but had gained such headway that the department could do nothing to save the building. The residence of Mrs. Cannon was also considerably damaged, and which is adjacent to the barn, has the paint scorched off of one side. The total damage is about \$200.

AFFAIRS AT SOUTH OMAHA

Postmaster Etter Promises Better Service with Aid of Additional Clerk.

COLORED PEOPLE CONDEMN INFORMANT. Dislike Lee's Part in Tucker's Capture—Letter Will Waive Preliminary Examination—Nolan Who Spied on Justice.

Postmaster Etter expects to give South Omaha much better postal service very shortly. Yesterday he was notified that an additional clerk had been authorized dating from July 15. The postmaster at once appointed Justice F. Rogers of Omaha to the position. Rogers was next in line for a substitute list and was next in line for a permanent appointment. He is started out at a salary of \$600 a year. Now that sufficient clerical help has been provided the postmaster says that he will keep the money order and stamp windows open until 7 p. m. in order to accommodate working people. At the present time the registry windows close at 5 p. m. and the stamp window at 6 p. m. As soon as the vacation season is over, which will be in about two weeks, the two departments will be kept open until 7 o'clock.

Other improvements in the service are contemplated by Postmaster Etter, but he said yesterday that he was not in a position at this time to make known his plans. As for the reports of the police holding the postmaster said that he had not heard from Washington regarding the bids forwarded. He expects to hear in time for the contractor who secures the work to commence not later than August 1. Some changes in the mode of deposit of mails may be made when the organized clerical force gets into harness.

Tucker Will Waive.

Attorney H. C. Murphy, who represents Andrew Tucker, stated last night that he had decided after a talk with his client to waive a preliminary examination. When arraigned in police court yesterday Tucker pleaded not guilty to the charge of murdering the fireman, and the hearing was set for Friday. Tucker's attorney expects to have the bond fixed today and then the prisoner will go to the county jail to await a hearing in the district court.

Among the colored people there seems to be considerable feeling against Lee, the man who tipped off the whereabouts of Chief Briggs. It appears that Lee was hard up in Ottumwa and Tucker procured him two meals. As soon as he learned that Tucker was wanted he made his way to South Omaha and furnished the police the information. While Lee asserted that he was not afraid of anyone it was noticed that he hung pretty close to police headquarters yesterday afternoon. He is waiting for the reward. When this is paid the police think that he will move on.

Nolan, Not Bergquist.

A. L. Bergquist of the fire and police board called at the Bee office yesterday to say that it was Mr. Nolan and not himself who had "rubbed" and found out that Judge King had released Sullivan and Dunkin without their first having paid their fines in full. Bergquist says that it was Nolan who offered the resolution to the board instructing the chief of police to arrest Sullivan and Dunkin and keep them in jail until the balance of the fine due was paid. In connection with employing an Omaha attorney W. B. Vansant of the fire and police board asserted that James H. VanDusen employed by the board lived in South Omaha, but admitted that he maintained an office in Omaha.

Department Expresses Thanks.

Secretary J. M. Guild of the South Omaha Live Stock Exchange is in receipt of a letter from the Department of Agriculture relating to the recent visit of the German agriculturists. The letter is as follows: "The Department of Agriculture wishes to thank you and the various packing firms for the efficient manner in which you brought the attention of the German agriculturists to the live stock and packing interests of your city. The department arranged the itinerary and appreciates most highly the assistance you have given to make the trip of the foreign visitors a success. Yours very respectfully, "J. W. BINGHAM, Assistant Secretary."

Eastern Star Room.

The local order of the Eastern Star has completed the furnishing of a room at the South Omaha hospital. Koutsky Bros. furnished and hung the paper for the room and J. M. Wallace of the Standard Paint company oiled the floor and put on some friction tiling. The work was a donation to the Eastern Star and the members of the order wish to return thanks. The Eastern Star room is now considered one of the nicest rooms in the building.

Gasoline Stove Explodes.

The explosion of a gasoline stove in the residence of Frank Zoser, Twentieth and N streets, called on the fire department at 6 o'clock last night. The hose wagon made a good run and succeeded in putting out the fire with a loss of about \$100, mostly confined to the rear portion of the building. This is the first fire caused by the explosion of a gasoline stove reported in some time.

Magie City Reported.

Mrs. Eunice Ennor has gone to Minneapolis to visit friends for a month. Mrs. J. C. Nichols, who lives at Twenty-second street, is recovering from a recent illness. Charles D. Carlisle of Kansas City, Mo., was in the city yesterday, the guest of A. Nixon. Harry L. Carpenter, manager of the stock yards at Lincoln, was in the city for the hour yesterday. R. A. Carpenter of Butte, Mont., spent yesterday in the city, the guest of his wife and children. Police Judge J. H. Miller yesterday had to be removed to the hospital. There was no afternoon session of the police court.

The Lone Star baseball team would like to arrange a game with any team in the city. Charles Flood, Atlantic hotel, is the manager of the team. Mr. E. C. Rotwick, vice president of the South Omaha National bank left yesterday for a three weeks' vacation to the Big Horn basin country. The Ladies' Aid of the Christian church will give an ice cream social on the 28th of August. Mrs. W. H. Slabaugh, 914 North Twenty-third street, this evening.

J. B. Erlon, formerly of South Omaha, but for some years government agent, died of the national cemetery at Alexandria, Miss., has been transferred to Mobile, Ala.

TABLE AND KITCHEN

Menu. BREAKFAST. Fruit. Cream. Liver and Bacon. Hashed Potatoes. Toast. Coffee. LUNCH. Creamed Lamb on Toast. Egg Biscuit. Stewed Cherries. Chocolate. DINNER. Bouillion. Baked Steak. Boiled Rice. Creamed Cauliflower. Chilled Raspberry Sugar and Cream. Coffee. Recipes.

Florentine Baked Tomatoes—Wipe carefully six large tomatoes and cut a piece from the stem end, scoop out the centers. Rub a cut clove of garlic across an agate stew pan and fry in it one onion chopped fine in spoonful of butter. Add six mushrooms, two large chicken livers, both minced finely, and a tablespoonful of lemon juice. Cook together for a few moments and then add yolks of two eggs and sufficient bread crumbs to fill the tomatoes. Place the tomatoes in a dripping pan, add a very small quantity of hot water and bake half an hour in a moderate oven.

Tomato Toast with Mustrooms—Stew a quart of fresh tomatoes; season with salt, pepper and butter. Lay thin toasted slices of white bread on a warm platter; butter each slice with the stewed tomatoes and on each place lay a peeled mushroom. Butter the mushrooms and give a dash of pepper if desired. Canned mushrooms may be used if fresh are not in market.

Boiled Tomatoes—Put the yolks of three hard boiled eggs through the ricer and mix with one teaspoonful of mixed mustard, one teaspoonful of powdered sugar, a dash of cayenne and a little salt. Melt three ounces of butter and rub in; then stir in gradually three tablespoonfuls of vinegar. Take from the fire and add two well beaten eggs; return to the fire and stir carefully until the mixture thickens. Place the saucepan in a double boiler to keep hot while you slice one quart of ripe tomatoes in half inch slices; broil carefully; place on hot dish, pour the sauce around them and serve at once, garnished with parsley.

Tomato Farce—Take six small, ripe tomatoes, take off the peel by pouring boiling water over and then dipping immediately into cold water, scoop out the inside and set in the ice box to cool and harden. Cook two pairs of calf's sweetbreads and put through the meat chopper, cut half a dozen small button mushrooms and mix with the sweetbreads. Make a sauce of one tablespoonful of butter and one of flour and one cupful of white stock, put the butter in a saucepan and when melted add the flour and cook two minutes, then add the stock, gradually stirring all the time; when all the stock is in add the inside of the tomatoes and cook ten minutes, add half a teaspoonful of chopped parsley, and season with salt and pepper to taste. Mix all together and stuff the tomatoes.

Spanish Tomatoes—One can of tomatoes, half a dozen green peppers, two medium sized onions and two tablespoonfuls of brown sugar. Chop the tomatoes and peppers in the butter, add the peppers to the Spanish peppers which have been chopped fine. Mix all together—carefully and cook over slow fire for five minutes, adding salt and a very little white pepper to taste. Serve in hot dishes and keep in moderate oven for forty-five minutes. Serve in dish in which they were baked.

END OF M'RAE'S COMPLAINT

Objections to Operation of Saloon on Leavenworth Street Are Withdrawn.

When the full Board of Fire and Police Commissioners got together yesterday afternoon to consider the application of James H. MacRae for a license to operate a saloon at 2706 Leavenworth street the members found they had nothing to do. The relator in the protest against the saloon, John D. MacRae, by his attorney, George C. Martin, filed notice that the differences had been settled, and in consideration of certain promises by Mr. Metz he would withdraw his objections. The promises relate to the manner of operating the saloon and the construction of certain fences and screens between the MacRae home and the rear of the drink parlor. The board granted a license authorizing the saloon, thus nullifying the action taken a few days ago when the permit was revoked by order of the supreme court. The saloon was closed for a short time, but was opened as soon as the order of the court had been reached between the principals.

DECISION ON WATER RIGHTS

Judge Day Dismisses Appeal of J. E. Riley from Action of Irrigation Board.

Judge Day has decided the case of Riley against Rosewater, in which J. E. Riley appealed from the action of the State Board of Irrigation in granting Andrew Rosewater the right to take water from the Platte and Elkhorn rivers and Buffalo creek. The case was on the docket in Sarpy county, but by agreement the hearing was held in Omaha, and the decision was given in Sarpy county. The judge denies the right of Riley to make the appeal in the form in which he tried to, and dismissed the case as far as Rosewater is concerned. He granted the applicant the right to continue the case for the purpose of making the State Board of Irrigation carry out the suit and to permit him to file with the clerk of the court a certified copy of the proceedings before the irrigation board, wherein his former proceedings were defective.

PERSONAL PARAGRAPHS.

Hon. W. G. Sears of Tekamah is the Omaha visitor, registering at the Merchants. Francis, general passenger agent for the B. & M., left for Kansas City Tuesday evening. W. H. Gibson left last night for Campbell, Ontario, where he intends to spend his vacation. He expects to be absent for a week. C. B. Anderson of Crete, Frank J. Kelly of Lincoln, C. M. Ward of Evanston, W. L. Brown of Denver and J. A. Kuhn of San Francisco are at the Pier Grand. W. L. Johnson of Denver, Mr. and Mrs. J. R. Hopeworth of Creighton, George F. Astell of Buffalo, Wyo., John B. Raper of Fairbury, and N. Jackson of Neligh are registered at the Millard. W. H. Herman of Portland, a K. P. delegate of Boulder, Colo., Y. J. Griffin, of Kilauea, O. H. Stewart of St. Thomas, C. H. Wells of St. Louis, and W. Campbell of Grand Island, J. E. Bahnen of Oklahoma, T. E. A. Bristol of Casper, Charles N. A. Lavel of Tekamah, Mr. and Mrs. F. Anderson of Boyd county, Mrs. A. F. Wright of Lincoln, C. S. Carpenter of York, J. J. Winters of Lincoln and D. W. Golins of Newport are registered at the Merchants.

APPRAISING BOARD ADJOURNS

Meets Again in October to Examine Distribution System of Water Works.

REPORT WILL NOT BE MADE THIS YEAR. Members of Board Informally Express Opinions, Praising Cleanliness and Unique Features of the Local Plant and System.

On or about October 1, 1903, the board of Omaha water works appraisers will meet again. It will then make an examination of the physical condition of the distribution system of the plant and adjourn to some future date, possibly early in 1904, to continue examining and investigating. Under no circumstances, the board announced officially, will its final report be made at the October meeting. When it will be made is still a matter of conjecture, except that from present indications those interested judge it will be nine, and possibly twelve or more months, before it is completed.

The plant of the South Omaha stock yards and packing house managers to purchase that portion of the plant within the limits of South Omaha and make a long-time contract with the Omaha Water company for a supply of water at the corporation line between the two cities. A report of which was published exclusively in The Bee Tuesday, was the most interesting feature of discussion at the meeting of the appraising board yesterday. Members of the Water board and representatives of the city and of the company declared that all the knowledge they had of the matter was what they had read in The Bee, and asked for further details. It was generally conceded that should the South Omaha men carry out their plan of forming a company and buying the plant, etc., it would greatly simplify matters. The appraising board did not take official cognizance of this feature of the controversy, having previously stated that so far as South Omaha and other outlying portions of the plant are concerned, and the manner in which the valuations and report will be made, nothing would be decided or given out at this meeting, the members desiring to more fully consider and further confer on such questions.

Documentary Evidence Accepted.

Attorney Hall, on behalf of the Omaha Water company, immediately after the appraising board convened yesterday morning, made a formal tender of certified copies of the contract-ordinance, other water works ordinances and other city and official documents to the board. The first set of copies for the board to appoint an expert to make such inventory, and in the opinion of the board this was the preferable way. The second was for the city to appoint one expert and the company one expert, the two working together in making the inventory. The third was for the company to have the inventory made and submit it to the city for examination.

Attorney Wright asked that October 1, or an earlier date, be set for the completion of the inventory and until it is made out the board cannot proceed with its work, and if not completed by that date the board cannot make the required investigations, except under difficulties, until next spring. President Woodbury stated that the company is already waiting two months, as it could not be compelled to begin making the inventory until after the expiration of the twenty-year period in September, but that it is willing to, and will, begin on it at once. He doubted, however, the ability of the company to get it out before November 1, the date mentioned at Monday's meeting.

Board Settles Question.

The board settled this point, to the apparent satisfaction of both sides, by asking that the company furnish an inventory of its distribution system by September 21. The city will then be given about ten days in which to examine it, and the board will meet again early in October to make its examination of the mains and pipes. A supplementary inventory of the other property could be furnished later and the two will be open to correction until the final report is made. If the distribution system inventory was not furnished until November 1 it would be impossible for the board to make a satisfactory examination this year. The company elected to follow the third method outlined by the board in making the inventory. Chairman Mead stated that the digging of holes to make and pipes should not be done until after the board reconvenes in Omaha, and should then be done under its direction. Also that the board will not under any condition make its final report at the October meeting. Neither the city nor the company responding to a request for more suggestions, the board adjourned until 1:30 in the afternoon, when cars were taken for a trip over South Omaha. All the members of the board leave this evening for their homes in the east.

Pleased with Plan.

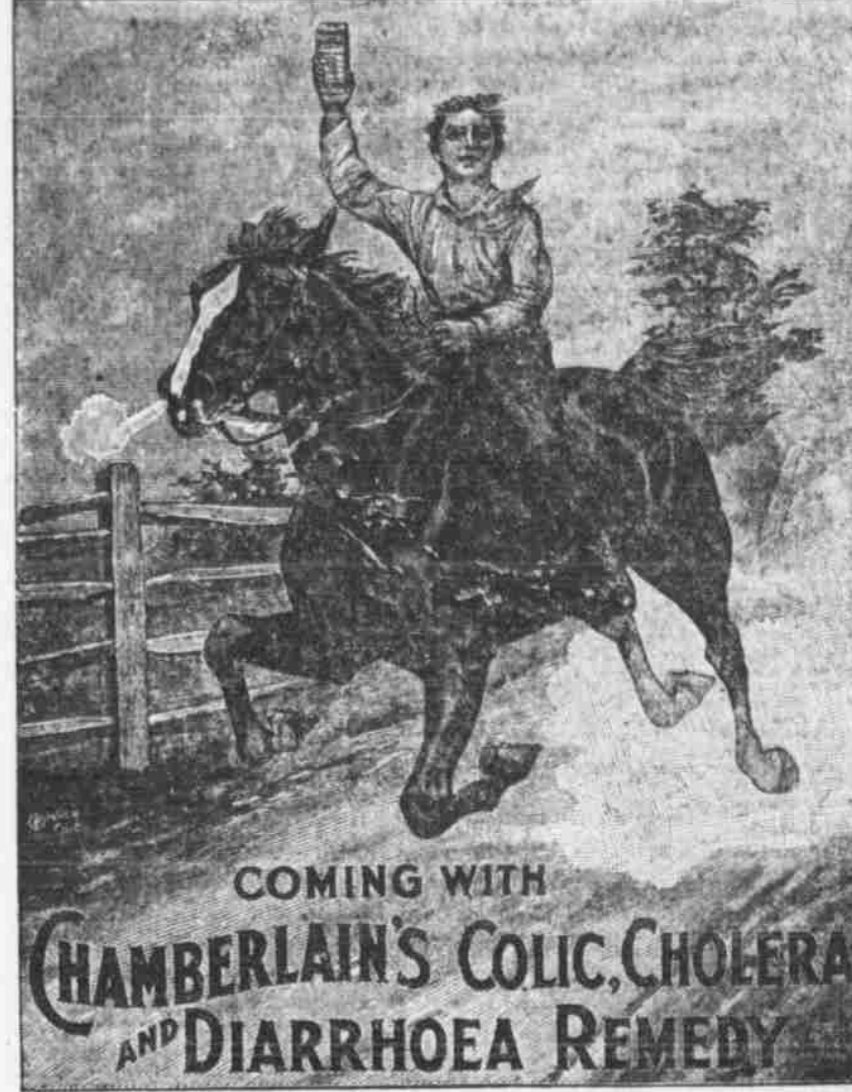

The members of the board were greatly pleased with what they saw on their trip to the Poppleton avenue and Minnesota-Louisiana Tuesday and did not hesitate to say informally that when the city acquires the plant it will have one of which it may well be proud. The Poppleton avenue plant met with their unanimous approval on account of its solidity and cleanliness. Mr. Benzinger, who is engineer in charge of the new water works system which Cincinnati has been constructing for the last six years, and who has inspected most of the principal water works plants in the country, states that the one at Florence surpasses any which he has seen in several particulars. The absolute cleanliness and care of the water, he says, cannot be appreciated by Omaha people, as they have not seen how different the conditions are at other plants, including one at a city on the Missouri river which he has seen had an overabundance of water. One very important feature of the plant, he says, is the system of basins in which the water is aerated and given more opportunities to absorb oxygen than it has when it has been given in any other plant which he has seen. Mr. Alvord declared that the Omaha plant is unique in the history of water works plant construction in this country so far as he has seen in acting on a number of appraising boards and visiting other cities. In the arrangement and operation of Minnesota station and the outlying basins it approaches, he declares, what may be called the perfect plant.

Hundreds of bathers take advantage of the Courtland Beach and Lake Manawa bathing beaches daily.

Mortality Statistics.

These births and deaths have been reported to the health officer: Births—W. H. Ringman, 5411 North Twenty-second, boy; S. Culler, 123 Park street, boy; J. H. Brown, 123 Park street, girl; Henry Boldt, 2946 South Nineteenth, girl; A. Moran, 1946 Webster, boy; A. L. Dorr and Davernors, girl; A. Paulson, 256 Miami, girl. Deaths—S. W. Egquist, 10 months, 2235 Charles, Lettie Barnard, P. 132 North Twenty-fourth; Harry Wood, 36 Ninth and Jackson; Ella Jobson, 8, 340 Deatur.

WHY not keep this remedy in your home instead of waiting until some one of your family is sick nigh unto death and then sending for it in a great hurry, and perhaps in the night, while the patient must suffer until it can be obtained. BUY IT NOW.
