### READY TO LOCATE NORMAL LIFE SAVED BY SWAMP-ROOT.

Educational Board Starts on Its Tou: of the State Wednesday Morning.

DECISION MAY HIT AUDITORS HARD

Captain C. M. Richards of Omaha Elected Major of First Regiment Schraske National Guard.

(From a Staff Correspondent.) LINCOLN, Aug. 4 -- (Special.) -- Tomorrow morning five members of the State Board of and night. Education will take their departure for Fairfield, there to begin the arduous work of selecting a site for the new normal school, for which bids were recently opened. This party will be met at Fairfield by Superintendent Delgeil of Lexington and cine you should have the best, President Rogers of the board. The whole board will then view the site offered for the new school by the Fairfield people and inspect the old college building tendered just the remedy you need. to the board.

When the board reaches Hastings on Thursday it will meet with a warm reception, if the premonitory signs can be taken into account. The latest issues of the Hastings papers received at the state house indicate that the people of the town are organized into committees as though they ton, N. #### May Go After Auditors.

One feature of the Ryan case is forcing itself just now upon the altention of the legal department of the state. If the supreme court should uphold the decision of Judge Holmes of the Lancaster district court that the constitutional amendment increasing the length of term and increasing the pay of legislators was never legally adopted, it will be a bad thing for the men who, as auditors of state, allowed the legislators to draw more pay than they were entitled to lawfully.

A statistically inclined state officer figures out that \$310,000 has been paid out by Auditors Babeock, Benton, Moore, Cornell and rivers for fish that have been left there by Fremont normal school, thus completing Weston to legislators in excess of the forty days at 12 a day of the old constitution. Bhould the amendment under which these payments have been made prove to be invalid these auditors may have to face a and a very large number of bullhead. and sentenced to twenty years in prison. Because of an informality that occurred during the trial, the fact that he was not in court when the jury returned its verdict, the supreme court reversed the case and ordered him re-sentenced. Judge Jessen made it nineteen years this time, taking into account the year he had served.

Now comes McCormick and makes the plea that having served a part of the first sentence the imposition of the second one forces him to serve a second sentence for the one crime and that this sentence is therefore invalid. It is urged in the writ of error filed in the supreme court this morning that the state can have but one satisfaction for a crime committed against its laws, that he has rendered such satisfaction while said judgment was in existence and while its satisfaction was being usisted upon by the state.

# SPEAKS OF COFFEE DRINKING.

BOUT coffee drinking, a prominent Chicago physician says: "I have the best of reasons for naming coffee as among the most dangerous of alow poisons. My own personal experience outside of the general expetience gained by my practice has taught me the truth.

"At about 16 I became a member of a young people's society whose pledge barred the use of all intoxicants, tobacco, tes and coffee until the age of 21. I kept my pledge and early temperate habits were formed. Up to about my 30th year I was an athlete; no one had better health or spirits.

"A short time after passing thirty I began the use of coffee at breakfast with an occasional cup at evening parties. The first symptoms of ill health I remember came soon and later sore mouth and stomach trouble followed. Finally well marked dyspepsia supervened. My bowels sympathized, of course, also my nervous system became impared. Dizziness attacked me and tremulous hands ren-

dered writing excedingly difficult. My diet had to be restricted. Experienced medical advisers forbade all fruits. "Several attacks of gastritis troubled me and bowel complaint became guite frequent.

"I am now past 60 years of age. About 18 months ago I saw a shrewdly written statement of Postum Cereal Coffee. I gave it careful reading and thought, and as an experiment substituted Postum for Java and Mocha. For the first three days of the change I felt keenly the loss of the stimulant, after that the nutrient quality of the Postum more than compensated the deprivation, and an astonishing change came in recurring hunger three times daily ; I could scarcely wait for meals, a sensation I had not had for more than thirty years.

"Now my health is excellent. I eat fruits of all kinds and foods as my appetite demands. I am regaining my nervous tone and my strength is increasing daily. Except my change from coffee to Postum I have made no change in my mode of living.

"Do you wonder that I name coffee as the must drag rous of slow poisons?
