NO GENERAL RATE INCREASE

Omaha Railroad Men Deny Story of Heavy Raise in Freight Tariffs

SOME LOCAL CHANGES WILL BE MADE

Schedules from Omaha are not to be disturbed, but the main operations are in Colorado and Kansas.

The report from Chicago that the trans-mississippi railroads have decided on a general increase in freight rates, effective September 1, is emphatically denied at the general freight offices of the Union Pacific and B. & M. and by local freight agents of Omaha. The report states that the increase will run from 1 to 14 cents a hundred, affecting nearly every kind of freight, and is made to compensate the railroads for the general advance in wages they have been compelled to grant.

"There is positively nothing in the report," said John A. Munroe, freight traffic manager of the Union Pacific. The same emphatic statement was made by an assistant to general freight agent Ives of the B. & M. and by a prominent local freight agent.

The Chicago story goes on to say that the advance is to apply to live stock and involves the abolition of the "commodity rate" on staple groceries resulting in an increase of 1/2 cent a hundred on such goods as sugar, coffee, beans and other articles of common use, imposing a general increase in the price of groceries this fall. This "commodity rate" has been abolished in Kansas.

"But," said Mr. Munroe of the Union Pacific, "it will not bring about any such results as this story states. It will not be offset by a single housewife in the state of Kansas. The rates were abolished as a sort of leveling process and because they were considered a disturbing element. The increase will amount to probably as much as \$1 on ten carloads of freight. It was decided three months ago to abolish these rates September 20."

Omaha Rates Unaffected.

By every freight man interviewed the statement is made that no Omaha rates are to be disturbed and that there is no thought of a general shaking up of rates by the transmississippi roads. Out in western Nebraska and from Colorado common points some minor changes are to be made. And a Burlington freight official acknowledged that they would in some cases result in increased rates, but he said this was being done in a large measure for the purpose of securing a uniformity in the system of rates.

"For instance," he said, "a shipper may have access to a point from which rates are high and by driving some distance to one from which rates are lower. Now it is to equalize these rates that these advances are made. But they are not by any means general."

"This official points out, however, that as the minimum carload weight has been reduced out in this territory the increase in rates will not amount to any more except where the minimum is exceeded. For example the present Colorado common point rate is 31 cents a hundred and the minimum weight 24,000 pounds. Now, September 1 the rate will go up to 33 cents and the minimum weight down to 22,000, so that according to his figuring the cost on a car under the new system will be \$1.50 less than before.

As to live stock rates there will be some change, but not general. It now costs \$70 to ship a carload of horses from Omaha to Chicago and only \$60 more from Hastings to Chicago. A rate of \$90 has been decided on from Hastings and corresponding points. No extensive changes are made. The Chicago story says live stock rates are to go up from 1 1/2 to 4 cents. The Burlington

official says the average in the west referred to will not exceed 2 cents.

Live Stock Rates in Kansas.

Considerable animation exists over live stock rates in Kansas as the outgrowth of the change in charging from the car basis to the weight basis. Stockmen have protested that the railroads have failed to keep their promise of not increasing rates by this method, and they, the stockmen, have appealed to the state railroad commission for redress, but the roads take the position that the matter is not one to come before the state commission since the traffic is interstate. The Burlington has submitted a schedule of rates, as the best it can make, to its attorneys and they will take the matter up further with the proper parties. This controversy is not affecting Nebraska.

ASKS CITY TO PAY DAMAGES

Man Who Steps on Rusty Nails Wants Five Hundred Dollars for the Accident.

Joseph C. Harvey, 2628 Douglas street, has called the attention of the city to the fact that he stepped on a rusty nail in a board lying on the sidewalk near the Dodge street entrance to Hayden Bros. store. The nail penetrated the ball of his foot to the depth of an inch, he says, has prevented him from working since July 27, and will keep him out of action for a month. He thinks the injury may be permanent and asks the sum of \$500 "temporary" damages. Mr. Harvey, in his notice, further complains that boards with nails protruding frequently are left about the spot where he injured his foot.
