A very favorable showing of July net earnings is expected for the road, as well as for other coalers. Baltimore & Ohlo's increase in July, net, of \$311,635, thus conserving nearly half the gross facrease, helped the soft coal group. The United States Steel stocks did not share fully in the day's strength, although they were bought on a large scale. The conference of members of the safe committee with the president gave rise to resumptions regarding the scope of plans for financial legislation, which were used with effect to further the advancing tendency of prices. The buying movement showed some signs of exhaustion at the last and the market closed irregular and below the best.

Honds were strong. Total sales, par value, \$4,85,000. United States bonds were unchanged on call.
