Wheat Market Starts Strong, but Declines Under Sales at Advance.

CORN FOLLOWS DOWNWARD TENDENCY

Oats Show a Slight Advance Under Reports of Damage to Crops-Provisions Firmer in Sympathy with Hogs.

CHICAGO. Aug. 28.—Wheat and corn showed weakness today and prices ruled lower. Beptomber wheat was a shade lower while December was down %2½c. September corn was off %2½c, with December 1½o under yesterday's close. Oats closed firm at an advance of ½c for September and December 1e higher. Provisions were steady, closing unchanged to 7½50c higher. Wheat opened rather surong, innuenced by the rains in the northwest yesterday and firm northwest markets. St. Louis bought wheat here and this also heiped the early upward tendency. September opened unchanged to ½c higher at \$1½50k½c. Filevator interests led the buying and secured quite a following, but the strength did not hold, local selling on the advange causing a break in September to 50kc, where it rullied somewhat, closing barely steady at \$1½61½c, a shade under yesterday's final figure. December closed at the bottom prices for the day, \$2½c, a loss of ½6½c. The weakness was due more to the character of the selling than to lack of buying orders a depressing influence and receipts were a depressing influence and receipts who a fair increase. Minneapolis and Duluth reported receipts of 332 cars, which, with local receipts of 144 cars, 15 of contract grade, made a total for the three points of \$33 cars, against 261 last week and 617 a year ago.

So cars, against 30 last week and 617 a year ago.

There was scattering selling in the corn pit throughout the afternoon and while there was good buying at times the quantity taken was not enough to support the market. There was a little show of strengthearly with wheat, but the close showed September down the close showed September down the close showed shade above the low point of the day, after touching bic. December closed the lower at 50% 050% c, ranging between 50% c and 51% c. Little interest was manifested in the market and trading was dull. Local receipts were 384 cars, with 71 of contract grade.

Local longs continued to sell oats, but Local longs continued to sell oats, but there was an improved demand from cash houses and the market showed a better tone after an easy opening, the close being steady at an advance of 1/3c for September to 35c, and with December a shade higher at 301/20164c. Reports of damage to crops caused the better feeling. Cash demand was also good. Local receipts were 127 cars.

cars.

A strong hog market and a report of considerable cash lard taken for export caused some atrength in provisions. There was also covering by shorts and good buying by brokers and foreign houses. The close was steady with September pork unchanged at \$12.50, lard 74,200c higher at \$8,323,25, and ribs unchanged to 24c higher at \$7,57,67,50. Estimated receipts for tomorrow: Wheat, The leading futures ranged as follows:

NEW YORK STOCKS AND BONDS.

Market More Active, but Retains Its Highly Professional Character,

NEW YORK, Aug. 23.—The stock market has its upware turn today. The volume of dealings was considerably larger than in jesteraby's almost stagmant market and the fluctuations were rather wider, but the market retained its highly professional market retained its highly professional character and gave little evidence of any interest or outside trading. The principal reason for the movement of the market scemed to be that it was a reversal of that of the previous day, the obvious tendency being to oscilate narrowly about a fixed point. Thus the morning news that the squadron of American warships had been ordered to proceed to Beyroot, Turkey, prepared to exact reparation for the insurer CORN-EC.

DUN'S REVIEW OF TRADE as Predicted by Pessimists.

Sees No Depression in Trade and Industry,

CROPS ARE MAKING GOOD PROGRESS

Number of Buyers in New York is Increasing and a Henry Fall Trade is Anticipated.

NEW YORK, Aug. M.-R. G. Dun & Co.'s Weekly Review of Trade tomorrow will BRY!

weekly Review of Trade tomorrow will say:

There is still no indication of the depression in trade and industry that pessimists predicted would follow the decline in securities. Conservatism was developed by the uncertainty regarding the financial condition, but funds are securable as they are required, and more cautious business gives promise of greater permanent gain.

Weak spots have been disclosed and the technical position strengthened, just as occurred in the stock market. Readjustment after a period of inflation must of necessity bring some losses, but the outlook is brightened by the removal of threatening industrial conditions, Dispatches from all sections testify to the liberal distribution of merchandise and the disposition to prepare for greater consumption of the necessities of life, while the crops are making good progress aside from some cotton districts in Texas. The number of buyers in New York is increasing, and a heavy fall trade is anticipated.

It is gratifying to find that consumers of pig iron have at last apparently decided to place contracts without waiting for further concessions. The decline has now reached its limit, judging by the larger amount of contracts offered, and this is the indication of a restoration to normal condition in the steel industry. It is catimated that a large tonnage of structural steel will soon be ordered for delivery in 1904, although this is in a measure dependent on labor controversies. The rail-roads are still vigorous purchasers of steel, pendent on labor controversies. The rail-roads are still vigorous purchasers of steel, especially of rails.

There is a fair business in places and sheets, but an effort to sell an over-supply of billets has led to speculations in that direction.

sheets, but an effort to sell an over-supply of billets has led to speculations in that direction.

There is sufficient business on the books of New England shoe manufacturers to assure full operation of machinery for several months. While large sales of upper leather are reported, there is little demand for sole leather. Domestic hides again average slightly lower, but small offerings maintain imported hides. Thus far the liberal jobbing trade in dry goods have not affected the situation at the cotton mills, where the percentage of idle machinery has increased. Woolens are quiet, and the only event of importance in sliks was a spectal sale at low prices.

Fallures this week numbered 176 in the United States, against 173 last year, and 33 in Canada, compared with 14 a year ago.

TRADE CONDITIONS ARE UNEVEN.

Elements of Strength in Husiness, but Some Bad Features. NEW YORK, Aug. 23.-Bradstreets tomorrow will say:
