

CONDITION OF OMAHA'S TRADE

Volume of Business for Last Month Broke All Previous Records for August.

PROSPECTS FOR SEPTEMBER ALSO BRIGHT

Prices in Much the Same Notches They Were a Week Ago, Although There Have Been Several Changes Worthy of Notice.

Omaha jobbers and manufacturers report their trade for the month as having broken all previous records for that month. There were more merchants in the city than ever before. Their orders were more liberal than usual. Traveling men also had better success on their routes than anticipated. So taking the situation as a whole no one seems to have any complaints of a dull trade. Not only is September starting out in very encouraging manner and unless something happens to reverse the trend, it is probable that the month will also make a good showing. Retailers seem to have more confidence than some weeks ago and a better class of goods than they did a few weeks ago. One encouraging feature to Omaha business is the large number of new customers who have been on the market with in the last few weeks. They consider that as some evidence of the fact that Omaha has a reputation as a jobbing center is improving each year and that merchants in the territory tributary to Omaha are aware of the fact that they cannot afford to do elsewhere for their stocks.

Sugar Unchanged, but Very Firm.

Wholesale grocers report the sugar market in just about the same position it was a week ago, no change having taken place. The market is very firm and all indications point to good healthy conditions for some time to come.

California Canned Goods

California canned goods have very largely withdrawn from the market on canned fruits, offering for sale their entire stock. The market is very firm and all indications point to good healthy conditions for some time to come.

Wheat, Flour and Corn

Wheat, flour and corn are all in good demand. The market is very firm and all indications point to good healthy conditions for some time to come.

Hardware Active and Strong.

Hardware jobbers report all fall lines are moving out very freely. So far the demand has been heavier than it was a year ago and present indications indicate that the demand will continue throughout the season.

Leather Goods Jobbers

Leather goods jobbers are now preparing to start the campaign for advance orders for spring goods. Some salesmen have already started and others will have their samples in shape within the next few days.

Rubber Clothing Selling Well.

There is very little doing in rubber footwear and probably will not be until merchants begin to move the stock they have already purchased. There is however, very brisk demand for all kinds of rubber clothing and in fact manufacturers in many lines are beginning to receive orders and are holding their goods at firmer prices than were called for a short time ago.

The detailed prospectus of The Twentieth Century Farmer for the year 1930-4 will be issued shortly, but in the interval its publishers desire to announce that the steady improvement shown in that publication from its inception will be still more marked in the coming twelve months, keeping fully abreast with the rapidly expanding subscription list and the regularly increasing advertising patronage.

The Twentieth Century Farmer has forged to the front as the most up-to-date and popular agricultural publication in the country, typical in every feature of the push and enterprise of the western farmer. It will appeal to every member of the farmer's family and to every one interested in rural pursuits with special emphasis on the great stock raising industry. None of the other departments of agriculture, however, are neglected and the whole tone of the paper is directed toward broadening and uplifting life and work on the farm.

The big state fairs are now coming on. The Twentieth Century Farmer will be represented at each of them by a competent staff of writers for the sample copies, and advertising rates. No one interested in western agriculture can afford to go without reading The Twentieth Century Farmer from week to week and no one who wants to reach the most intelligent members of the farming communities of Nebraska, Iowa, Missouri, Kansas, South Dakota, Wyoming, Colorado and adjoining states can afford not to use its advertising columns.
