Authorized Agents.

Because of certain pecutiarities of the stock market in Wall street within the last few days persistent rumors have it that the Atchison, Topeka & Santa Fe is on the market and that the Union Pacific or possibly the Rock Island is after it. It is not surprising that no definite information can be obtained on the subject. Union Pacific officials here, of course, protest absolute ignorance of the whole matter, since all financing is credited up to the New York office. Even in financial circles the report is not receiving the serious consideration which might be expected, notwithstanding so important a statement from the chairman of the Santa Fe's board of directors. Victor Morawetz, that he had heard that the Union Pacific was after control of his road and was making the fight through Kuhn, Loeb & Co. Mr. Morawetz is said to have denied that he had offered his Santa

Fe stock for sale. Santa Fe stock has been down to an unusually low ebb, but this is doubtless due to the frantic fight that has been waged on it. Eliminating the rumors of the Union Pacific or any other road being interested in the stock, the present abrupt rise may be explained merely by the theory that the commensurate with its actual value. Yet, despite all this, railroad men are still half inclined to think, because of the several reports, that Kuhn, Loeb & Co. have been authorized by Harriman to get control

Not Until Millennium.

A circular letter to the ratiroads has been effort to make an adjustment on compensation for the use of private cars and charges for the transportation of commodities.

The letter assalls the packers and owners of cars and states that the traffic referred much less important to the carriers ing only bare fields throughout Macedonia. than the producers. It points out that the packers should make an object to the rail road companies to care for their products. Mr. Midgley wishes to Impress the idea that the railroads would be better off without unremunerative tonnage and would have good prospect of enlisting co-operation, now eing urged in many places.

The letter states that the packers are together to "work" the railroads, so all may enjoy the same concessions. Figures on the eastern territory show that as the livestock rates declined the railroads broke from their existing relations until the basis is at present 45 cents on dressed meat and 28 cents on cattle, that last named being a nonpaying rate.

It is said also that most eastern shipments are consigned by the packers, and almost all cattle are sent in cars belonging to private companies. These are required to be run at express speed and the resuit is that a greater amount of mileage earned than what the companies care

Officials of the freight departments of the various Omsha roads think this plan a very good one if it can be worked out. "It may be when the millennium comes," said one prominent official, "for I don' think we will have to grapple with it until

The Chicago Great Western recently closed a contract running seven years, with the shippers, by which it will handle a very large percentage of their output. This was first made with the Kansas City shippers, but has been made general, and will thus affect local companies. The rate is 20 cents per 1,000 for stock, while meat and corn are shipped for 21 and 18 cents re-

Milwaukee Gets Busy.

The Chicago, Milwautee & St. Paul, having just completed its short cut line from Chicago to Kansas City, placing it on a parity with other quick service roads beween those points, is now addressing itself to the task of keeping the Illinois Central out of Milwaukee. Wednesday officials of the Milwaukee Southern, the road over which the Illinois Central hopes to gain entrance into Milwaukee, appeared in court in an effort to secure condemnation of certain rights of way in the southern part of the city and were met by officials of the Milwaukee, who protested against the court granting such condemnation on the ground that the effect would be to deface the beauty of the parks. The court took the protest under advisement.

PRESIDENT OF UNION IS ARRESTED

Work is Being Resumed in Some the Cripple Creek Mines with Miners from Other Stntes.

COLORADO SPRINGS, Colo., Sept. 10 .-It is announced from Cripple Creek that clash between the civil and military authorities in the camp is looked for. President C. G. Kennison of one of the district unions had trouble with a non-union miner this morning and was struck. He drew a gun but was disarmed before he could use it. Later he was arrested by the civil authorities and the military has now surcounded the Teller county jail with the reported intention of taking charge of the prisoner.

The great compresser of the Labelle Power company at Goldfield, furnishing light to several towns of the district and compressed air to several mines, started in motion this morning for the first time since the strike was declared, forcing air into the Golden Cycle, Vindicator, Theresa and Christmas mines and several of the smaller leases that recently started

The shift that started the machinery in motion was composed entirely of new men, none of the old employes having reported for duty. The plant is completely surrounded by cavalry and infantry. DENVER, Sept. 10.-Governor Peabody

declared that suggestions of a conflict between the commander of the state troops in Cripple Creek and the sheriff over the possession of a prisoner were not warranted. He declared that martial law has employes in the Sedalia shops are granted not been established in Cripple Creek and an increase of 10 cents a day. The in will not be. General Bell and the troops, said he, are in the district to aid the civil authorities in maintaining order, not to supersede them.

Regarding the case of President Kenniso of the Cripple Creek Miners' union, the governor said:

SECOND ATTEMPT OF THE SAME PEOPLE

Were Turned Back at New York in August, but Came to Montreal and Reached Destination Before

Caught.

BOSTON, Sept. 10.-For the alleged violation of the United States contract labor laws, four persons, one of whom is a woman, are now under arrest and will be deported. They are experienced English spinners, who had been employed in the Neponsett woolen mills at Canton. The arrests were made by a detail of immigration inspectors from this city, who allege that the mill hands were brought to this country and given employment contracted for in England.

A peculiar feature is that the same party came over on Saxonia July 14 and were debarred from landing because of the statements made that they had been promised employment at Canton before leaving England. They were returned to Liverpoo on August 11, but it is claimed that they had hardly been landed at Liverpool when they were met by an agent of the Neponsett mills, who made an agreement with them to go to work in Canton. This time they were given passage to Montreal on an Allan line steamer, at which port they landed on August 28. The officials here learned of their appearance in Canton through the Montreal officials. The spindays' conference at Parsons, Kan., between ners were taken to New York today and

Pope's Doctors.

SYMPTOMS NOT THOSE OF PLEURISY

Waits Forty Days After Death of Pope, According to Promise Made, Before Publishing His Conclusions in Matter.

ROME, Sept. 10 .- Prof. Cardarelli, the eminent physician, who is a member of the senate, published in the Rivista d'Italia today a long article to demonstrate that Pope Lee XIII died of tuberculo cancer or right hydrothorax.

He fortifies his statement with arguments based on his own experience and that of authorities, such as Trousseau Barth, Frankel and Seagaria, to show that all the symptoms of the illness of Pope Leo XIII as stated in official bulletins by Drs. aponni and Marsoni lead to the conclusion that the late pope was not affected by the pleurisy or pleuro pneumonia.

Prof. Cardarelli affirms that from the noment that bloody liquid appears in the pleura and is found through the thoracentesis, especially when the fluid gathers deceitfully without pain or fever, or manifest cause, or pleurisy, the diagnosis of pleurisy must be excluded, and that when the liquid forms in the right plaura it usually indicates cancer or hydrothorax in aged persons.

Forms of Senile Pleurisy.

There are forms of senile pleurisy or neumonia, he continues, in which fever, pain and cough are lacking, but these are almost without exception of a tuberculus nature. The declaration that the postmortem examination confirmed the diagnosis made by Drs. Lapponi and Mazzoni, the professor declares is not sufficient, as only careful miscropic examination in these cases can establish the real affection of the pleura.
