COMMERCIAL AND FINANCIAL

Wheat Opens Weak, Strengthens on Foreign Advices, but Closes Lower.

FEAR OF FROST SENDS CORN PRICE UF

Oats Market Showed Advance Early but This Was Overcome Later in the Day-Provisions Are Lower.

CHICAGO, Sept. 11 .- Grain prices were all down at the close, although the early mar-ket in each pit was firm. December wheat showed a loss of %60%, December corn was %c lower and oats were down \$60%. Pro-visions were about steady at a decline of visions were about steady at a decline of 19415c.

Wheat opened a shade weaker, but soon became firm on bullish Argentine and foreign crop news and strong northwest markets. December opened a shade lower at 51½c and soon advanced to 52½c on local buying and covering by shorts. The strength in the northwest did not hold, Liverpool showed an easier tone at the close and the failing corn strength caused a reaction and brought out wheat freely on stop orders and from the local longs who were buyers earlier. Under the selling pressure the December option went down to 51½c and closed weak at 81½c, %46½c under yesterday. Clearances of wheat and flour were equal to 255,700 bushels. Primary receipts were 1,162,000 bushels, against 1,112,000 bushels last year. Minnespolfs and Duluth reported receipts of 699 curs, which with local receipts of 118 cars (only 4 of contract grade), made a total, of 807 cars for the three points, against 333 cars last week and 857 cars a year ago.

There was a decided weakness in corn

a total, of 807 cars for the three points, against 333 cars last week and 857 cars a year ago.

There was a decided weakness in corn at the opening, due to the cables and a bearish construction piaced upon the government report, but fears of frost in the west soon overcame these influences and the market turned strong and the early loss was recovered and a good advance scored. Trade was active throughout the seasion, with local traders leading the early buying. Large quantities of corn came out on the upturn, however, and the late mood was decidedly easier. The weakness that developed in wheat had its influence also, and the close showed locamber ac lower at \$60,000 c, after ranging between 160 and 50%c. Local receipts were 576 cars, with 52 of contract grade.

Local and cash traders were the best buyers of oats and were influenced by the government report, which was regarded as buillish. There was a fair advance in prices early, but liquidation later induced an easier tendency, causing a loss in the closing figures for December of 160 kg/4c, at 27%cg/4c, it having touched 38c in the builge and sold a shade lower on the break. Local receipts were 187 cars.

Provisions ruled lower on selling by the buil leaders whose action was looked upon as an effort to bring out some of the long lines. On the decline stop orders were executed, helping the downward tendbull leaders whose action was looked upon as an effort to bring out some of the long lines. On the decline stop orders wers executed, helping the downward tendency. A little support was offered late in the session and the close was steady at a decline in October pork of 17½c at \$13.62½, with lard down 12½c at \$8.35, and with ribs 10c lower at \$5.70.

Estimated receipts for tomorrow: Wheat, 160 cars; corn, 585 cars; onts, 190 cars; hogs, 10.000 head. The leading futures ranged as follows:

*Wheat 79¼ 81¼ 83¼ 8214 84% 50% 50%0% 5 50 50050% 5 50% 50@50% 50% @% 3614 38 39% 9 25 9 25 8 27% 8 35 7 37% 7 35 9 4736 8 4046 7 8736 8 57½ 8 60 8 57½ 8 60 8 56 8 72½ 8 50 8 70 6 95 6 95 6 90 6 90 8 65 8 80 "No. 2. a New.

NEW YORK STOCKS AND BONDS. Professional Element Dominates on Irregular Market.

Irregular Market.

NEW YORK, Sept. 11.—Stocks moved for the most part along irregular lines in today's market, which was again dominated almost throughout by the professional element. The crop report, so much better than had been expected, might have exercised some influence for higher prices, but for the continued weakness of the United States Steel stocks, and the dissolution somewhat in advance of the prescribed time, of the pool which endeavored to place the securities of the United States Realty and Construction company on the market. Steel common touched a new low record, breaking 20 points, though subsequently recovering, but the features already named, together with unexpected seiling of Atchison for London account, were enough to unsettie the list all around. Realty preferred sold down to 35½ today, a new low record, and the common sold at 6½, at their top prices last year these stocks sold at 75½ and 32 respectively. The stock market was more active and made general improvement in the afternoon, practically all of the early losses being recovered. All of the steel stocks for the first time in several days seemed to receive inside support. Notwithstanding bearish trade conditions, a number of specialties were taken up, apparently for absorption. The list displayed firmness at the close.

ciaties were taken up, apparently for absorption. The list displayed firmness at the close.

Among the important railroad returns of the day were the annual reports of the Atchison and the St. Paul systems. Atchison was the feature of the day, recovering from its early depression and once more leading the market. Operations in St. Paul were unimportant.

from its early depression and once more leading the market. Operations in St. Paul were unimportant.

Business with London was nominal, being retarded by cable interruption. Dealings with that center were of an arbitrary character and were limited almost altogether to Atchison and the steel stocks.

Advices indicate that another advance in discount rates may be expected from London and Berlin. This, it is assumed, will be in line with the policy of the leading financial institutions of Europe to discourage gold shipments to this country. The present discount rate of the Bank of England, 4 per cent, made last week, is the highest since February, 1961. Any advance by the Imperial bank of Germany would excite little surprise, in view of the steady drain on the bank's cash holdings. The known movements of local currency point to a nominal loss by the banks to the subtreasury. The latter institution disbursed today \$150,000 for Klondike gold. Word was received of another shipment of \$500,000 in Australian gold to this country.

The bond market showed some irregularity again and the movement either way was extremely narrow. Total sales were of a par value of \$1,095,000. United States bonds were all unchanged on the last call.

Cotton Market.

Cotton Market.

NEW YORK, Sept. II.—COTTON—The cotton market, after opening firm at an advance of 4679 points, ruled moderately settive and the sales for the day came to but 308 bales. The week started with sales of 100.000 bales. It is apparent that public interest in the staple is subsiding, a fact explained largely by a disposition to fear that there is too much missionary work in regard to reports of crop deterioration through boll weevil. shedding and rust. Following the opening call prices commenced to decline, excepting for a spurt that carried September from 10.80c to 10.35c, leading to a sympathetic advance of a neint or two on some of the other months. The early upward movement was stimulated by better cables than expected and by reports of a lurking storm in the gulf section. Public interest falled to materialize and prices began to weaken, largely by pressure brought to bear by a certain Wall street interest. Prices broke 11212 points, with the market finally steady at a net loss of 2612 points. The general run of sellers operate with caution on the short side of the account, as the movement continues to disappoint their expectation. On the other hand buying is checked by the comparative indifference of spinners to cotton beyond providing for mill wants.

LIVERPOOL, Sept. 11.—COTTON—Spot. moderate business done; prices, 4610 points higher; American middling, 6, 12d; good ordinary, 5, 15d; ordinary, 5, 15d. The sales of the day were 6,000 bales, of which 500 were for speculations and export and included 5, 400 American. Receipts, none. ment.
The cow market did not exhibit any great amount of lite today but prices held about steady. The feeling seemed to be a little tetter than at yesterday's close but there was not the strength that characterized yesterday's opening market. For the week cows are now much over a dime lower as part of the loss of the early part of the week hns been regained.

Bulls, yeal calves and stags sold today in just about the same notches they have all the week.

There were very few stockers and feeders offered and as is generally the case on Fri-

There were very few stockers and feeders offered and as is generally the case on Friday, not many were wanted. The few that did arrive sold at not far from steady prices. There were over fifty cars of cattle shipped to the country yesterday so it looks as though a fairly good clearance would be made by the end of the week. Strictly choice feeders are not much lower for the week but aside from a few sales of that kind the general market is safely 15@ 55c lower.

that kind the general market is salely log-factories. There were only a few western grass beef steers offered and they sold about steady. For the week choice stuff could safely be quoted strong, but common grades have shown no improvement. Range cows held steady today and for the week are around a dime lower. Western stockers and leeders were in light supply this morning and held close to steady. For the week though they

are generally	15@ 250	lower.	Represe	ntati

DUN'S REVIEW OF TRADE

Sees Some Increased Activity in Many Branches of Business.

WEATHER CONDITIONS FAVOR RETAILERS

Distribution of Merchandisc is Expanding, While High Prices Make Western Buyers of Textile Goods Cautious.

NEW YORK, Sept. IL-R. G. Dun & Co.'s Weekly Review of Trade tomorrow will say:

will say:

Despite the interruption of a holiday, the week has brought increased activity in many branches of the business. An encouraging symptom is the decreased complaint regarding connections, accompanied by more discounting of hills. Weather conditions have been favorable for retail trade, the distribution of merchandise expanding, while there are better reports of jobbing fail business than last year. Some caution in selecting goods, owing to high prices, is reported at the west, but this schiefly contined to textiles.

Labor disputes decrease, all but one of the unions having signed the agreement in the local building tradea, and several other settlements have been effected through concessions by both sides. Railway carnings in August were 9.1 per cent greater than last year, and 15.4 per cent greater than in 1901. Gwing to the interness of crops there is little complaint of traffic congestion. September 1. for the first time this year, furnace stocks of pig iron exceeded a week's capacity of the furnaces in binst. This is evidence of the conditions now prevailing in the iron and steel industry, although the exact condition cannot be determined without a knowledge of supplies at other points.

Manufacturers Are Hasy.

Manufacturers Are Busy. Furnace stocks have doubled since June Lyet the weekly output is now about 30,000 tons less than at that date. These figures explain the reduction in prices. Prices of southern formdry iron have again declined, weakening the tone and delaying the placing of contracts elsewhere. Agricultural implement makers have again purchased freely of material, some plow steel contracts covering deliveries for five steel contracts covering deliveries for five teel contracts covering deliveries for years. New England manufacturers continue

New England manufacturers continue busy on fall and winter footwear and at many points it is difficult to secure sufficient labor. Wholesalers report deliveries of nearly all varieties on time or with little delay, but facilities are taxed in order to keep up with business. Leather is still quiet in this vicinity, buyers taking sole leather as needed, evidently anticipating better terms. At the west there is more activity. Notwithstanding heavy receipts of cattle, packers are asking fractionally higher figures for hides.

Prices of cotton goods are slow to reflect into reaction in the raw material, the demand is not improved. On the contrary, buyers are encouraged to delay placing contracts and mills are not seeking business. In the jobbing trade a large distribution of merchandise is in progress, this branch of the industry showing a profitable season.

Failures this week were 172 in the United States, against 205 last year, and nineteen in Canada compared with twenty-two a year ago.

year ago. DRIFT TOWARD IMPROVEMENT.

Bradstreet Finds Trade Conditions Uneventful, but Prospects Bright.

Uneventul, but Prospects Bright.

NEW YORK, Sept. 11.—Bradstreet's tomorrow will say:

While trade conditions are still uneventful the general drift is toward improvement. A more assured feeling as to the corncrop is manifest; conditions in most states having improved since September I. State fairs and low rate excursions have stimulated western distribution, while good prospects for cotton, sice and sugar in the south have made things cheerful in that section. Eastern trade advices are of less notable activity, but signs of improvement in the cotton mill situation are seen. Some heavy sales of print cloth are reported and a number of mills have announced an early approach of operations.

The lumber market shows contrasts in different sections. In the west lumber and building material of all kinds are active and firm, but at the east the resumption of building at strike-infested cities has not been sufficient to keep the markets strong. The iron trade is rather peadmistic, buyers persisting in holding off, but the declines in northern and western has not been sufficient to keep the markets strong. The iron trade is rather peasimistic, buyers persisting in holding off, but the declines in northern and western iron reported this week are largely sympathetic, the result of the reported additional cuts in the southern product.

The salmon season on the Pacific coast will be a short one and higher prices are looked for.

Railroad earnings continue good, the increases for August being fully 8 per cent over the best previous years. Collections show a slight improvement, the result, probably, of a moving market. The back-wardness of agriculture is no small factor in confirming buyers in the conservative attitude they have assumed in some sections.

in confirming buyers in the conservative attitude they have assumed in some sections.

Wheat exports for the week (including flour) aggregate, 2,045,040 bushels, against 3,131,839 bushels last week, 5,441,146 bushels this week last year, 6,416,605 bushels in 1901 and 4,685,952 bushels in 1900. For ten weeks of the cereal year they aggregate 31,255,168 bushels, against 43,495,744 bushels in 1902, 5,816,179 bushels in 1901 and 21,905,-001 bushels in 1900.

Corn exports for the week aggregate 844-818 bushels, against 868,741 bushels last week, 31,512 bushels a year ago, 777,531 bushels in 1901 and 2,402,780 bushels in 1900. For ten weeks in the present creal year they aggregate 10,028,854 bushels, against 887,382 in 1922, 10,027,728 bushels in 1901 and 31,044,743 bushels in 1900.

Business failures in the United States for the week ending with September 10 number 165 in the United States, against 162 last week, 197 in the like week of 1902, 182 in 1901 and 149 in 1800. In Canada failures for the week number 12 against 18 last week and 18 in the week for one year ago.
