In spite of the strenuous efforts on the part of the prohibitionists, Nebraska has gone wet this year.

The democratic nominee for governor of Iowa is trying hard to convince himself that he is really running for office.

RURAL CARRIERS' ORGANIZATION. The organization of the rural letter public should be in hearty sympathy. The first purpose is to improve the condition of the rural mail delivery and the second is to improve the condition of the rural mail carriers. The two go hand in hand, because the improvement of the service must follow from raising

the standard of the servants. The rural mail delivery service has passed out of the purely experimental stage, yet much is yet to be done in the way of systematization and co-ordination. The rapid development of the rural routes and the constant increase of the rural mail pieces handled wiff ental; more or less reorganization of the service, with a view to greater efficiency and economy. The co-operation of the mail carriers in the accomplishment of this end will be of incalculable value and their united efforts will doubtless be more intelligently directed through the agency of their associations

than if left to act by themselves. With reference to the terms of em ployment and compensation of the carriers some betterment must come as : matter of course. A salary of \$50 ap month may possibly be adequate in some districts, but it certainly is insufficient to keep a high grade of men at the recognition for years of faithful devotion to duty. Something in the nature lation. of a classified service with a graded o salary schedule must be the eventual solution.

Incidentally, Nebraska has a right to feel complimented that the first president of the new national association Pacific coast, and the products of its should be taken from its corps of rural mail carriers. President Cunningham is ported not only to the farthest of our an active, wide-awake member of the department, with a clear comprehension of what the association wants to achieve as well as how to manifest its wishes. and his administration may confidently be expected to produce results.

INTEREST IN CROP REPORTS.

At the present time there is undoubt edly more interest in the crop reports than in any other matter which commands serious attention. Why this is so everybody understands, since the possible outcome of the crops is beyond all in the question of our material prosperity. It is a simple matter to say that we are making progress and that all the indications are in favor of a continuance of progress and prosperity, but it is absolutely necessary to measure up the conditions that are essential to the continuous promotion and advancement of our prosperity.

In making such a calculation there can be no doubt that the crop possibilities constitute the most important consideration. What the crops of the nation are to be is undeniably the commanding question of the time, which is being most thoughtfully considered in every portion of the country. As now presented there is nothing discouraging in the crop outlook. There may be disappointments in some directions. The hopes of certain localities will not be realized. This is the case in almost every year and the present season is not wholly extraordinary. But what is to be still reasonably hoped for is a fair crop, with prices quite up to if not a little beyond the average, which means didate to assure the president of the that our farmers will at least be as well

This assurance ought to be satisfac tory to our people, since it means that there will still be enough for our own wants and for whatever demand there may be from abroad, and that prices will be remunerative. The foreign advices of an authentic character are to the effect that crops are considerably less than ordinary in most of the European countries, which necessarily means a larger demand upon this country for increase of price for what we sell abroad, but it seems to at least assure tions against the venders of pumpkins, clusion of soap made of ingredients that a maintenance of the present prices. include the fat of the hog? THE FUTURE OF CMARA.

Under modern conditions of city building the trend of industrial development and growth is toward the centers of commerce and industry. When a city has passed its 100,000 population mark its growth cannot be arrested, although it may be retarded. Omnha, South Omaha and Council Bluffs are for all commercial purposes one city just as New York, Brooklyn, Jersey City and Hoboken are part of Greater New York, although they are separated by rivers and incorporated in different states.

With a population exceeding 150,000, Greater Omaha is now on the eve of still greater development. Located in the heart of the great American corn belt, the most prolific breadstuff-producing region on the American continent, and enjoying the superior traffic facilities of two transcontinental systems of railway west of the Missouri and a half dozen trunk lines through Iowa, besides being the northern terminus of the Wabash and Missouri Pacific, that afford direct railway communication to the Gulf of Mexico, Omaha is peerless work without even a prospect of better as a distribution center for trade territory that exceeds three million in popu-

Its trade territory is not only constantly expanding, but steadily increasing in wealth and population. Beyond its natural trade territory, the jobbers of Omaha have reached out clear to the packing houses and distillery are exwell.

The immediate and most paramount wants of Omaha are cereal mills and flour mills, elevators, glucose works, for office. sugar refineries and other works that will fabricate the raw materials raised in the Missouri valley into finished products for distribution and export. When these concerns are established Omaha will become a great grain market as well as it already is a great cattle market and meat-packing center.

From any point of view the outlook more promising year by year and day by day.

Here is the record boasted by an Alabama man who is heralded as one of the populist "old guard:"

My first presidental vote was for Millard Fillmore. In 1860 I voted for John Bell. The greatest political blunder in my life was made in 1884, when I voted for Grover Cleveland. I did not vote in 1888. In 1892 I voted for Weaver. In 1896 I reluctantly voted for Bryan and Watson. Was disgusted with Watson's treatment by the Bryan democrats and voted for McKinley

There ought to be a good chance for this versatile voter to complete his reexemplified in Theodore Roosevelt.

Representatives of the commercial associations of fifteen Wisconsin cities have formed a state organization to represent all the diversified industrial and mercantile interests of Wisconsin. with the object of promoting the mercantile and manufacturing interests and to arrange for association with national bodies organized for similar purposes. Omaha and other cities of Nebraska could profitably emulate the example set by the principal cities of Wisconsin. There is a wide field of usefulness for such an organization that will broaden from year to year with the development and growth of the state.

The facts of history were fatal to its perpetuity. But it still survives in some quarters where its existence would not be suspected, if it did not proclaim itself. For example, the New York Commercial of September 2, in an editorial rebuking a mercantile house

ROUND ABOUT NEW YORK.

Ripples on the Current of Life in the Metropolis.

It is now up to the devotees of the "light fantastic" to say whether the American League of Dancing Masters is "it" in the ital matter of dance programs. The league held a solemn gabtest in New York recently and took two-steps or more on the floor of reform. The bewitching two-step was pronounced a terpsichorean outcast and the three-step walts and the five-step schottische declared the fashionable dance for the coming season. The secretary of the league, hailing direct from Providence, intimates that no violent measures will be taken to drive the two-step from dance programs-a gracious concession, truly-but it will be kept in its proper sphere and not permitted to usurp the whole floor and the orchestra.

More power to the nimble shins of the professors. Let them not grow weary in the good work until every ballroom abomination is toned down or cast out. Away with your Newports and Comuses, and other irregularities! What is the matter with a law restricting all terpsichorean aceruptions, and the Nebraska political crater tivity to the good, old waltz, schottische, is still in a state of violent activity, with polka and quadrille? The professors utter rumblings and detonations, and thick a feeble protest against the disappearance of the square dance in the larger cities, where "Fisher's Hornpipe" and "The Gilr Left Behind Me" have long ago lapsed into innocuous desuetude. As for grace, there is more of it in the trusty waltz than in all the new-fangled combinations but together. and if a man needs exercise there is nothing more calculated to limber up the joints had that effect to the extent of interrupting tuned fieldle and a caller that knows his business.

Walter Wellman declares that Peary will reach the North Pole this time. Mr. Wellman may be considered an excellent authority on what other pole-hunters can do. Outside of the Panama canal difficulties, further trouble is afoot in Colombia. The obblers of Bogota are now refusing to mend North American shoes. Nobody knows, of course, how long this will last.
