Conditions in Wall Street Affected Chicago Grain Market Adversely.

DEMAND FOR WHEAT SLACK, PRICES LOWER

Corn Fully Sympathized with Conditions in Wheat Pit and Oats Followed the General Trend of Business.

CHICAGO, Sept. 28.—Wall street weakness and heavy world shipments caused weakness in grain today. December wheat closed 5 1/2 cts. December corn was down 1/8 cent and also showed a loss of 3/8 cent. Provisions were irregular, closing 3/8 cent lower to 1/2 cent higher.

The demand for wheat was slack and conditions at home and abroad were bearish. Northwest and southern markets were lower and with weak cables and large world shipments, large demand for passage and slack. Demand considerable longer than came out early December opening at 70 3/8 cent. Notwithstanding the bearish influence there was a momentary bulge immediately after the opening. Buying of scattered shorts on which December went 7 1/2 cts. An easier feeling engendered by the weakness noted in southern markets and in London and pit traders selling freely and at a loss. The market closed at a decline. The option closed at a decline of 1/8 cent. Clearances of wheat and flour were equal to 240,000 bushels. Receipts were 1,167,200 bu. against 1,071,400 bu. last year. Minneapolis and Duluth reported receipts of 288 cars, with local receipts of 99 cars (1 of contract grade). Made a total for the three points of 367 cars. Last week's receipts were 364 cars a year ago.

Estimated receipts for tomorrow: Wheat, 50 cars; corn, 50 cars; oats, 150 cars; hogs, 60,000 head.

NEW YORK STOCKS AND BONDS. Selling Comes from Every Quarter and Favorable News is Ignored.

NEW YORK, Sept. 28.—Another day of liquidation in the stock market kept up. The liquidation was mostly in small accounts and came from all quarters. There seemed to be a good deal of selling out by commission houses, whose notifications to customers for additional support had been given over Sunday. All the foreign centers which hold appreciable quantities of American securities were practically paralyzed except for occasional buying of American securities. The buyer who forms the complement for the liquidation is a speculator who is offered to him and made no bid. There was a considerable amount of this sort of buying which was confined to stocks to some of the largest banking interests who satisfied themselves with this measure of support for the market. The liquidation was not a general one, but was confined to a few of the largest banking interests who satisfied themselves with this measure of support for the market.

STUDENTS BUCK LAUNDRIES

University Men Bring Their Apparel to Omaha to Be Cleaned.

UNABLE TO GET RATES IN LINCOLN

Although Contract is Reported Made with One Local Firm, Others Will Hold Out for Regular Prices.

There are great "doings" down at Lincoln over an alleged laundry trust, which the students are fighting tooth and nail. As far as the students' end of the story can be learned, it seems that a students' laundry club has been organized by the State university men and arrangements are being made to ship laundry to Omaha. The club has made a schedule for both soft and hard laundry and expects to get its work done at its own prices.

The members say that some time ago the laundry firm formed a trust and made an agreement on labor and prices. It was decided to refuse all demands made by the students for reductions in the prices, and when applications for cuts were made they were promptly refused. The laundry's claim was that the advance in the price of starch, coal, fuel and other supplies could not reasonably grant the reduced price.
