With the opening sales wheat prices started in a downward direction and the decline continued throughout the entire session. The opening was barely steady on rather indifferent cables, December being unchanged to a shade higher at 7% \$75%. Local houses with St. Louis connections had selling orders from the start and added to this was the break of nearly 2c at St. Louis. The big houses here were on the selling side carly and this sharted rapidly. One of the chief frators in creat-ing the bearish sentiment was the large primary receipts, those at St. Louis show-ing the greatest gain. There was little do-main at any time in the scale of and the volume of trading was small. Cosing prices were at about the bottom figures, final figures on December being helfse lower at 7549775c. Clearances of wheat and four were equal to 257,200 bu. Primary receipts were 1.46,700 bu., against 1.115,300 a year ago.
