European Shipments Cause Boarish Feeling in the Grain Pit.

CORN PRICES SUFFER SOME DECLINE

Oats Market Pollowed Other Grains in Downward Tendency-The Provision Market Was Quiet, with Little Change.

CHICAGO, Oct. 5.-The marked increase shipments from Russia and the Dan-ian provines exerted a distinct bearish fluence on the wheat those nere today. ecember closing at a nel loss of \$49.00 ecember corn sold ac uncer baturday and ecember outs a shade down January revisions finished the day practically un-

changed.

There was only a moderate volume of trading in wheat and the undertone was of a decidedly weak nature. The news in general was extremely bearish, foreign markets being easier on larger world's shipments than had been expected and on the flood of Russian Danubian wheat, which is being thrown upon the European markets. These influences, along with the increased receipts in the northwest, caused weakness in this market at the start, December opening 4,0%c to 4,0%c lower at creased receipts in the northwest, caused weakness in this market at the start, December opening 46% to 46% lower at 704677c. The break at St. Louis was another factor in discouraging holders, and more particularly in discouraging any active support of the market. There was heavy selling during the opening hour by St. Louis houses, prices gradually declining. December selling off to 75% before the noon hour. A somewhat better tone developed on a sarrial recovery at St. Louis, but the liberal increase in the visible supply—amounting to 2,250,000 bu, with renewed weakness in the northwest, claused a renewed decline of 460 there at 76% c. Clearances of wheat and flour were equal to 408,000 bu. The amount on passage increased 192,000 bu. Primary receipts were 1,412,500 bu., against 1,405,000 bu. a year ago. Minneapoils and Duluth reported receipts of 7.5 cars—none of contract grade—made total receipts for the three points of 1,20 cars, against 364 cars last week and 1,088 cars a year ago.

corn experienced a weakness at the opening on favorable weather, lower cables and the decline in wheat, with quite active selling by several prominent houses. Sharis took advantage of the break to secure profits, and the buying from this quarter caused a raily, but the market eased off again with wheat. After selling between 44c and 44%c, December closed %c lower at 44%c. Local receipts were 476 cars, with 43 of contract grade.

The weakness in wheat and corn had a depressing influence on oats and the undertone was easier. Commission houses and local traders sold moderately on the increased receipts and poor shipping demand, while buying was mainly by shorts. During the first fifteen minutes of trading the market developed unexpected stendiness and it looked as if traders had oversold and were anxious to reinstate their lines. December closed with a loss of %c, after selling between 35%c and 25%c. Local receipts were 179 cars.

Provisions were quiet and prices showed little change throughout the session. The whole list was in fair demand early on the theory that a big packer was buying lard through brokers and prices were firm, but the weakness in grains caused a loss of the early firmness. January pork closed unchanged at \$12.45, January lard 2½c lower at \$6.55, while ribs were unchanged at \$6.57%.

Cetton Market.

NEW YORK, Oct. 5.—COTTON—The market opened weak at a decline of 12 to 15 points under liquidation following lower cables and the generally favorable weather reported over Sunday. October was weak, meeting with free selling under apprehensions that notices made better showing. As the session progressed it was seen that these would be an influence and the entire market steadled up a little, and for a time ruled fairly steady around the opening prices or within 2 or 3 points of them on covaring and some little buying on the reaction theory, which was encouraged by the report that too much rain was failing in the western section of the belt. Before the close, however, there was another flurry of bear pressure and selling by the room contingent, and in the last half hour the list was very weak, closing easy at practically the lower point of the day, or at a net loss of 13025 points. Sales of futures were estimated at 490,000 bales. The disappointing cables were considered as reflecting that the trade abroad was not disposed to take a buillish view of the government crop report and that the trade here seemed encouraged in their bearish views by the continued weak-ness of the spot markets, which it is argued reflects the lack of demand for actual cotton and the accumulation of supplies. The receipts for the day turned out to be 54,644 bales, exceeded carly estimates and were also over last year's, when the movement was 49,571 bales and the estimates for tomorrow's receipts at leading points were liberal. There were exports of 25,225 bales. ST. The movement of prices was exceedingly sluggish and showed little disposition to get far from last week's level. Metal Market.

NEW YORK, Oct. 5—METALS—Tin was higher both in New York and London; spot advanced £1 5s to £116 19s in the latter market, while futures were £12 6s higher at £15; the local market was firm at £25.6 (27.0c, with seventy-five tons of October reported sold at between £25.60(25.62). Copper declined 2s 6d to £54 17s 6d for spot in London, but futures there were unchanged at £55 6d, and the local market also continued at the recent level; lake and electrolytic are quoted at \$13.000(13.25 and casting at \$13. Lead advanced to £11 is 3d in London, but remained unchanged in New York at \$4.50. Spelter was unchanged in New York at \$4.50. Spelter was unchanged in New York at \$6. ST. LOUIS. Oct. 6.—METALS—Lead, steady at \$4.50; spelter, steady at \$5.60.

NEW YORK, Oct. 5.—COFFEE—The market opened steady at a decline of 15 points under rumors of beneficial rain in Santos, lower European cables, larger primary receipts and private cables from Santos reporting firm offers from that market on a slightly lower basis. These influences encouraged considerable unloading by recent buyers, but there was enough covering at the lower level to check the declining tendency and hold the market stendy at about the initial level until just before the close, when a fresh lot of liquidation broke the prices, and the close was barely steady, 25 to 25 points lower. Sales were 27,759 bags, including: October, 4,80c; November, 4,80c; December, 4,8064,90c; January, 4,5544,90c; March, 5,1095,15c; May, 5,2095,30c; July, 5,3364,45c. Coffee Market.

Totals ..... 6,624 2,609 reeders the bulk of the offerings were dis-posed of in good season.

The same as has been the case for some time past, corn fed steers were very scarce. Anything at all desirable met with ready sale at prices ranging a dime higher than those in force at the close of last week. Even common kinds sold stronger than they did last week. It was very evident that packers wanted more cattle than were on sale.

The cow market joined in the general addance and could be quoted active and generally 5@10c higher than last Friday, or 15 @20c higher than the low point on Thursday. There were only about sixty or seventy cars of dows on sale, mostly western rangers, and as packers all had liberal orders to fill, it only took a short time for the bulk to change hands.

Bulls, real caives and stags all commanded a little stronger prices in sympathy with the advance on cows and steers.

Speculators were all anxious for fresh supplies this morning, owing to the fact that they sold out practically everything they had on hand last week. It would be safe to quote the general market a dime higher than last Friday, with come of the more desirable grades showing eyen a greater advance than that. It was a very active market, and even the common cattle sold more freely than they have for a long time. on sale.
The cow market joined in the general ad-

The bulk of the westerns that arrived this morning consisted of feeders, but at this morning consisted of feegers, but at the same time there were quite a few fair to good killers. Packers bought them up freely at prices ranging atrong to a dime higher, the better grades showing the most advance. Range cows were also right around a dime higher, and western stockers and feeders advanced fully that much. Representative sales:

All Products and Staples Go for True Ak-Sar-Ben Colors.

Commission row products and market staples have gone in for the proper Ak-Sar-Ben show and the shop glows with the holiday colors. Cranbetries and applestomatoes were ruled out as off tint-ar doing the red section, the cabbages, quinces and white grapes represent the Irish interests and expect to be caten alive for the wearing of the green. Ripe cucumbers, yellow tematoes, and some members of the squash family to say nothing of the oranges themselves, are sporting the tawny.

The cranberries are up on their hind feet and pawing. The wholesale is now \$7.50 with a good tip for an \$8 price by the end of the week. It is a short crop in bleak New England and rumor of another in-Wisconsin. But there is another reason. Apples are high and rather poor this year. and when this is the case the cranberries

are thrown into the breach between the first floating tib and the left loab of the liver, and consequently, money is up. The bananas are showing scarcely any sign this week, but say they will contract at the same old price whatever they lose. Concord grapes are not pegging out, but they have moved up to I cents on the jobbing list as against 24 cents last week. Prunes soon will be a memory. Their season is closing now and they are getting high and scarce. The California peaches will not be long left to mourn them and even now perhaps, the last car is in. The Colorado brothers will hold the last trench for a short while. The New York apples are not showing the usual "supercillosity" of the empire state emigrants and are popular this year. They
