Wheat Market Was Extremely Erratio on the Chicago Board.

WEATHER REDUCES PRICE OF CORN

Decline in Wheat and Corn Affected Oats Market, Which Was Extremely Firmer, with Provisions Easier.

CHICAGO, Oct. 9.-Dominated by the ac-

CHICAGO, Oct. 9.—Dominated by the action of outside markets, with that of Minneapolis as a leader, wheat ruled extremely erratic today, and after making big gains carly, weakness was manifested in the latter part of the session, December closing at a loss of %c. December corn and oats were each off %c, while provisions kept up their losing gait, the January products closing from 1/4/15c lower.

Excellent weather in the west and northwest, weak outside markets with Liverpool barely steady in the face of the buige here yesterday, were bear factors in wheat at the start and opening prices were easier. December being unchanged to 1/4/3/4 lower at 75/4/3/2c, to 1/5/4c. Tracers were watening the 8t. Louis and Minneapolis markets closely, and the decline phere was followed by similar action here, considering long stuff coming out on the decline. With a sudden upturn at Minneapolis, prices here became decidedly strong. December selling up to 9%c and was at one time at a quarter cent premium over May. A big demand for cash wheat together with an improved demand for flour were the in. bences that started the upturn at Minneapolis. Realizing by local traders during the last half of the session resulted in a loss of more than the early gain. December deciding to 73/4c, and closing at 75%c, a loss of %c for the day. Clearances of wheat and flour were equal to 253,900 bushels. Primary receipts were 1,040,000 bushels. Against 1/36,100 bushels a year ago. Bradstreet's report of exports of wheat and flour were for the week, 2,378,000 bushels. Against 746 cars last week and 294 cars a year ago.

Clear, cool weather tended to exert a hearish influence over the corn pit, but

against 746 cars last week and 294 cars a year ago.

Clear, cool weather tended to exert a bearish influence over the corn pit, but prices fairly steady in the face of the wide fluctuations of wheat. Country buying was a feature in maintaining prices. The market was a local market almost entirely, with commission houses doing most of the buying. After selling between \$54 and \$55, December closed \$6 lower, at \$55, Local receipts were 28 cars, with seventeen of contract grade.

Oats were firm the greater part of the session, on a good demand with commission houses fair buyers of December. The decline in wheat caused an easier feeling late in the day, and the close on December was \$6 lower at \$52.437c, after ranging between 254c and 374c. Local receipts were 125 cars.

A small advance in the price of hogs helped to maintain a firm tone in provisions turing the first part of the session, but after the market sold off more from lack of support than from any other cause. The close was easier, with January pork of 5c at 11.85. January lard was down 54c at \$6.754c, while ribs were 5c lower at \$3.324c.

Prices Advance.

NEW YORK, Oct. 39.—The stock market this morning continued to show depression and discouragement. The professional traders sought to take advantage of this movement to force liquidation by offering prices down. Their operations of this character became so extended as to result in a rather urgent borrowing demand for stocks. Taking warning from this condition, the shorts covered their contracts, causing the late recovery in the market. This was quite comprehensive and lifted the average level of prices well above last night. The closing was about steady and near the top. The predominating isfluence on the market was still the testimony concerning the promotion, underwriting and flotation of the United States Shipbuilding company, elicited in the receivership proceedings. The disclosures brought out by these proceedings have caused a state of irritation and distrust amongst shareholders difficult to dissipate and the character of the discussion in Wall street is of a kind regarding trusts and trust promoting not often heard in the financial district itself. London felt the reflex of this influence this morning and its sales in this market were an important element in the early depression. When the London selling had been completed the recovery set in. The industrial department naturally was most affected by the prevailing sentiment and the United States Steel stocks and Amalgamated Copper bore the brunt of the pressure. United States Steel common and Amalgamated Copper both touched lower prices than ever before. The London depression had some cause in fears prevalent there that next week's stock exchange settlement would reveal some embarrussment. The persistent downward course of United States Steel bonds is especially disturbing to sentiment since the reduction of the discount on the common stock. The long decline in the common stock was nought to be explained as due to the unwieldy bulk of that issue, rather than to forthooming bad news. Notwithstanding the bad news seen to have been a factor, And the second contains and th

The following table shows the receipts of cattle, hogs and sheep at South Omana for the year to date and comparisons with last

day morning or a little stronger than yesterday's late market. There were not very many on sale and, as all the buyers seemed to want a few, it was only a short time before everything was disposed of. As compared with the close of last week cows are right around 10@16c higher, or 15@25c higher than the low time on Thursday.

Bulls, veal calves and stags all commanded about steady prices.

There were not very many stockers and feeders in the yards, but speculators did not seem to be very anxious for them. The choicest bunches did not sell a great deal lower, but most of the offerings were of common quality and they were very slow and a little lower than yesterday. In some to get even a bid on that class of stock.

Western grass beef steers were in light to get even a bid on that class of stock.

Western grass beef steers were in light good sold at steady prices. In fact there was no quotable change on any kind. Range cows sold at good firm prices, while stockers and feeders were rather slow and a little lower. That was particularly true of the commoner kinds. Representative sales:
