- Sample Caps in the Basement—Men's and boys' sample caps, in Brighton and golf styles, at, each 15c**

AFFAIRS AT SOUTH OMAHA

Rural Mail Carriers to Hold Conventions in All Parts of Country.

PUSH THEIR CLAIMS FOR MORE SALARY

Congressmen to Be Invited to Attend These Meetings and Hear What the Carriers Have to Offer.

The Rural Letter Carriers' association continues to push its claims for recognition by the government. President P. H. Cunningham of the national association stated yesterday that the association would call a meeting soon in each congressional district where there is a rural service, and invite the congressman representing the district to attend. This meeting, Mr. Cunningham asserts, will be called during the holiday recess of congress, in order to permit every congressman to attend, in case he desires to do so.

At these meetings, to be held all over the country, the rural carriers will endeavor to show the congressmen who attend the necessity for the passage of a bill for more pay for the rural carriers. Continuing on this subject, President Cunningham said:

"I have now three bills which have already been introduced advocating more pay for the rural carriers. One bill calls for an advance in salary of \$100 a year, while another asks for an increase of \$200 per annum. We have prepared our own bill asking that the maximum be placed

at \$50. This bill we will not present to congress until after the holiday recess, and the meetings I have mentioned have been held. We sincerely hope that congress will take some action on this matter, and that as soon as possible, for the reason that the \$200 salary now paid is not sufficient for a carrier to furnish horses, wagons, etc., and devote all of his time to the work."

In conclusion President Cunningham said that he had received advices from prominent people in Washington that the request of the rural carriers would be carefully considered by congress, and that there was a probability of an increase in wages all along the line among this class of federal employees.

Favor Water Ordinance.
There is an amended water franchise ordinance now before the city council, but cannot be passed until the publication of the same for two weeks. Officers of improvement clubs all over the city would like to see this ordinance go through, as it would give the city the right to locate a number of fire hydrants. There has been a demand for several years for more hydrants in every ward in the city, and the increased number of buildings really demands better fire protection, as well as the extension of mains for domestic use. With the overlap an increase in the number of hydrants was impossible. Now that the overlap bonds have been sold, and the accounts settled up, there is some hope of more hydrants if this ordinance is passed. The levy for water remains the same as last year, but should the ordinance now under consideration be passed the company will locate sixteen new hydrants this year and twenty additional hydrants next year; the company to be paid for these hydrants and the original franchise ordinance. People who have erected homes outside of the hydrant districts say that they do not care whether an annuity is paid or not—what they want is water—therefore, they favor this amended ordinance as the easiest way out of the difficulty.

Laying Curved Rails.
A SQUAD of men are engaged now in laying heavy steel curve rails at Twenty-fourth and L streets for the Missouri avenue car line. When this track was first laid the switches and rails were of light material for the reason that heavier material could not be secured at that time. Not very long ago a rumor was current that the street car company proposed to make a change in its eastern line and run cars down N instead of L street. This caused some little commotion among residents on L street. The laying of the heavy steel rails and the new switches assures the people now that the L street and the Missouri avenue line will stay.

Miss Clark Satisfied.
Superintendent McLean of the public schools received a letter yesterday from Miss Della Clark, dated Moorcroft, Wyo., in which she states that she is delighted with her new position. Miss Clark is a graduate of the South Omaha High school and has many friends here. When a request came from Wyoming for teachers, Miss Clark accepted the offer. She is paid \$40 a month and her board furnished. She says she has twenty-five pupils, but not enough books to go around. Miss Clark says she likes the people there and is content to teach during the term of her contract.

Advertising Bonds.
A week or so ago the city council authorized the mayor and city clerk to advertise in the Omaha Daily Bee for the sale of \$25,000 refunding bonds, running twenty years and bearing 5 per cent interest, the interest to be paid semi-annually. The attention of the city officials was called yesterday by a bond buyer to the fact that

two eastern bond buyers are now advertising these bonds for sale in eastern financial papers. Not a single bid for these bonds has been received, as the bids do not close until 8 p. m. November 23. City officials think an effort is being made to sell this issue in the east before making a bid for the bonds. These same tactics were employed by some eastern brokers about three years ago.

Reducing Street Force.
Mayor Kautsky has ordered the regular street repair force to be reduced to two men. This was done yesterday. These two men are paid at the rate of 25 cents an hour and work eight hours each day. Their duty just now is to look over sidewalks, nail down loose planks and in places where planks are missing fill in dirt enough to make the walk even. By doing this it is thought a number of damage suits can be prevented. City Engineer Deal said last night that if the weather softened up a few more men would be put to work repairing sidewalks, but no more street improvements are contemplated this year.

Get Ready for Thanksgiving—Buy on Credit.
You don't need any cash; just have it charged. Our credit system is open to all. You can dress well by paying a little every pay day.

Our overcoat stock is complete; all the latest styles; also all the nobby things in fall suits.

Call and examine our stock and learn our terms. No trouble to show goods. Every one welcome. Call early and avoid the rush. Buy on credit at cash prices at the PIONEER CLOTHING CO., 215 N. St., South Omaha.

Investigating Chief Briggs.
A meeting of the Fire and Police board was held last evening and Chief Briggs was called upon to explain why he was absent without leave for two days. Chairman Vansant said after the meeting that the board did not reach any decision. Another session will be held by the board at 5 o'clock this afternoon.

Magic City Gossip.
Stephen Vail has gone to Minneapolis to look after some business matters. Footing Miller has secured a new flag for the government building here.

James Heath is confined to his home with a severe attack of rheumatism.

Captain F. G. Gibbs of Boston, Mass., is in the city, the guest of his son, George F. Gibbs.

The fire department was called to Armour's yesterday afternoon, but the alarm proved to be false.

The Ladies' Aid society of the Baptist church will meet with Mrs. Henry, Twenty-fifth and H streets, this afternoon.

Tonight the local lodge of Eagles will give a dance at Workman temple. This is the third annual ball of the series here.

The Knights and Ladies of Security will give a ball on Monday evening at the hub in the South Omaha National bank building.

N. T. Maxwell is circulating a petition for the grading of Twelfth street, from the city limits on the north to J street on the south.

Miss Laura Kerr and Mr. Neils Paulson were married Wednesday at the home of the bride's parents, 739 North Twenty-fifth street. Mr. and Mrs. Paulson will reside in Omaha.

You Take no Risk
In using Dr. King's New Discovery for Consumption, Coughs and Colds. It cures all lung troubles or no pay. See \$1.50. For sale by Kuhn & Co.

Was Rather Sudden.
"What do you think, Mr. Dinsmore," said Miss Frocks. "I lost my fine new umbrella today and it had my name on the handle, too."

"Then you will have to get another, of course," replied Mr. Dinsmore.

"Another umbrella?"

"No; another name."

"Oh, Mr. Dinsmore, this is so sudden! Still, you may ask papa."—Town Topics.

IN THE FIELD OF ELECTRICITY

Expansion of Electrical Power Derived from Waterfalls.

SPECTACULAR PROJECTS IN NORTHWEST

Suggestions for People Who Have a Telephone Grievance—Vapor Electric Lamp Grows in Public Favor.

The spectacular idea of developing electric power from the glaciers of the northwest is nearing a practical stage. It is proposed to harness the glaciers of Mount Rainier to furnish light and power for practically unlimited manufacturing purposes to a group of cities in the Puget Sound region. The power will be derived from the waters that drip from the icy fields of the Rainier peak that rises in the southwest corner of the state of Washington to a height of 15,000 feet. The sources of supply are practically unlimited, for the sixteen great glaciers, covering more than 100 square miles of the surface of the mountain to a depth of 100 to 2,000 feet, are constantly replenished by heavy rainfalls from the Pacific. The excessive precipitation in the upper slopes of the mountains yields a copious water supply that the engineers are now taking steps to secure before it has escaped far down the mountain side. For the present, the development is to be limited to 20,000 horse power. A dam is being erected on the Puyallup river, which drains five of the sixteen glaciers of the mountain. Below this point the river drops rapidly into a deep canyon. At this gorge, on the bench of the mountain, a flume is being built capable of carrying 1,000,000 tons of water a day for more than ten miles to a capacious reservoir that will stand nearly 500 feet above the river. From this reservoir the water will be led to a power house in the gorge in four steel tubes, each four feet in diameter at the top, and tapering to a five-inch nozzle at the bottom. The stream from each pipe will turn a pair of huge impulse wheels. The water will rush through the nozzle at the terrific rate of nearly three miles a minute, and will look like a bar of solid ice. A heavy bar of iron thrown against it would be hurled away with frightful force, and with the ring of a powerful blow on an anvil. Were a strong man to try to cut the solid stream with an axe, the terrific force would be twisted from his grasp with irresistible force. From the power house the electricity generated will be transmitted to a transformer station, where it will be adapted to the uses of the cities of Seattle and Tacoma, respectively, twenty-five and forty miles distant. It is proposed to eventually extend the service from Mount Rainier to many towns along Puget sound. It is claimed that this is the first utilization of glacier outflows for the generation of power. While this is true of this country, it is a matter of fact that for the last fourteen or fifteen years, in Switzerland, a large number of railways and light and power plants have been actuated by power derived from streams produced by the melting glaciers, including those of Mont Blanc itself.

The development of electric power transmission at Niagara Falls, says Electricity,

has been the largest and most conspicuous of its kind, and from that point power is transmitted by the Niagara Falls company to Buffalo and other places, the ultimate capacity of the power houses being 50,000 horse power each. In addition to the marvelous horse power utilized and supplied by this company a large amount of the Niagara current is employed in electrochemical and electro-metallurgical operations and in the extensive grain operations carried on at Buffalo, and at the Buffalo Dry Dock company, where forty motors of 200 horse power each are employed in the process of building some of the largest steel steamships that ply the great lakes.

Tobacco Heart
may be cured. Don't neglect your symptoms. Dr. Miles' Heart Cure is a great heart and blood tonic about which you will learn a great deal and also about those troubles by sending for our free book on diseases of the heart and nerves. DR. MILES MEDICAL CO., Elkhart, Ind.

Old Underroof Rye

There are plenty of whiskies you can get for less money than Old Underroof Rye. But it is poor economy to save the slight difference in cost when you can get Underroof quality. It is soft, pure, delicious, and has the least reactive effect. CHAS. DENNEHY & CO., Chicago

A Polite Prisoner.

The lady who was visiting the jail had been much impressed with the appearance and behavior of the prisoners, and she took occasion to express her approval to the warden.

"They seem as courteous as anybody," she said, enthusiastically, "even if they don't say anything."

"Yes, they're polite enough," assented the jailer. "But I'm a little suspicious of too fine manners."

"I don't see how you can be!" exclaimed the lady.

"Well, I am," declared the warden, "and I have been ever since one of the smoothest of them broke out of jail and left a note for me in which he wrote: 'I hope you will pardon me for the liberty I am taking.'"—Detroit Free Press.
