Speaker Says that Improved Methods is Better Means of Pushing Trade Than Are Protective Teriffe.

LONDON, Nov. 25 .- Lord Rosebery spoke to 3,000 persons on the fiscal question at the Surrey theater tonight. There were 20,000 applications for tickets, the issue of which had to be limited to the capacity of the theater. Lord Rosebery afterwards addressed a large overflow meeting. At both meetings he was given an enthusiastic reception and all through his speeches he was heartly cheered.

His lordship's remarks were for the most part devoted to riduculing Joseph Chamberlain and his policy.

"After last night's meeting at Queen's hall, which was attended by seven members of Lord Salisbury's government," said the speaker, "little can be added. The fiscal question must be solved and finally settled and unless it is settled the dissolution of Parliament cannot long be de layed.

Lord Rosebery referred to Mr. Chamber lain as a modern Jeremiah, whose asser tions that the country had been desolated were refuted by the facts. Mr. Chamber lain said the country was ruined, while Mr. Balfour, on the other hand, said the country was extremely prosperous, but soon would be ruined. The board of trade blue book, however, had decided against both of these contentions, The speaker said that the condition of the people generally had been improved, while the workingmen were enjoying greater prosperity. If distress existed in the country it was because of the unwise expenditures of the government, which during the last decade had increased 62 per cent.

"Instead of curbing this growing expenditure," said Lord Rosebery, "Mr. Chamberlain discovered a disease which had no existence and proposed a remedy which would make the disease worsenamely, the increase in the cost of every

This custom of presenting the marriedemployes with a turkey each Thanksgiving was started many years ago, when the total number of men on the company's pay roll did not amount to over a few dozen. They cost 20 cents per pound, which amounts to a little over \$722.
