Sherman & McConnell Drug Co.

Wholesale and Retail Druggists-

Corner 16th and Dodge Streets, OMAHA

THE BENNETT COMPANY

To Our Patrons

We introduced the Sperry & Hutchinson green trading stamp system in good faith, believing that we were offering to our customers an advantage that meant much to them and which at the same time was of advantage to us. Experience has proven that we were correct in our action, and we wish herewith to say that we are under contract with the Sperry & Hutchinson Co., and their store is bound to be maintained in Omaha whether it is agreeable to certain local business organizations or not, and by that same contract we are bound to give trading stamps whether it is agreeable to opposition or not, but further than this and beyond all, we are under an implied obligation to our customers to make good their trading stamp collection, and we shall hold this obligation first and foremost all the time.

Any customer receiving trading stamps from the Bennett Company may positively rest assured that their books will be

The Sperry & Hutchinson Co. are a business organization of the highest character, with ample capital to-carry out all contracts, and have advised us that no amount of opposition will induce them to even consider withdrawing from Omaha.

We trust that our patrons will accept this as a final and definite statement as to the trading stamp proposition in Omaha and that the stamp collectors or ourselves will not be further annoyed by untrue and malicious reports as to the uncertainty of stamp collections.

Double the usual number of Green Trading Stamps in all departments on the second floor.

Most of Nebraska Wheat Crop Deprived of Stickney's Lowest Schedule.

NOTICE OF NEW TARIFF BEING FILED Examination Shows What Mr. Stick-

ney's "Infinitesimal" Part May Mean to Shippers of Grain in This State.

Instead of an "infinitesimal" portion of wheat, as President Stickney said, being raised in that part of Nebraska deprived of his lowest rate, statistics show that twothirds of the total crop is raised there and one-third in that part taking the lowest rate.

Notice of the filing of the new grain tariff by the Chicago Great Western rallroad with the Interstate Commerce comnission has been received in Omaha. The new tariff shows the district which will take the 14-cent rate on wheat and the 13-cent rate on corn to the northern markets and also the district which will take the 9 and 8-cent rate.

President Stickney stated to the executive committee of the Commercial club that an "infinitesimal" part of the state of Nebraska would take the higher rate and intimated in his address to that body that his district was hardly worth considera-

When a close examination of this district therein is made it appears that this particular portion of the state is not so "infinitesimal" as it might seem from a wheat production standpoint.

What Tariff Says.

The tariff filed with the Interstate Commerce commission outlines the district taking up the 9 and 8-cent rates as follows Ing up the 9 and 8-cent rates as follows:
All of the state north of a line west from
Plattsmouth to Inland via Louisville, Lincoln, Crete, Fairment and Harvard; thence
via an imaginary line to the Platte river,
including all points in the state north of
the Platte river. All south of this line
takes the 14 and 13-cent rates, and consequently, on account of the discrimination
in local rates, all of the wheat raised in
this district will be forced to Kansas City.

By an examination of the annual crop
report issued by the Union Pacific Railreport issued by the Union Pacific Railway company it will be seen that there was raised in Nebraska during the year 1903, 32,346,627 bushels of winter wheat. There was also raised 5,786,798 bushels of spring wheat, but this latter item does not enter into the question of rates, as very little of it goes to the northern markets, there being sale there for only the hard winter product.

The Union Pacific crop report states the yield by counties, consequently it is a very easy matter to arrive at the approximate amount of wheat raised in the two districts-one taking the 9-cent rate on wheat and the other the 14-cent rate to Minne-apolis and St. Paul. The following counties are in the district taking the 14-cent rate, and following each is the number of bushels produced in the county during 1963. Elight of the counties are divided by the line in President Stickney's tariff, and of course the yield in these counties is estimated by the portion of the county north and south of the line:

Where Bulk is Raised.

Cass, 232,905; Otoe, 342,170; Johnson, 255, 270; Nemaha, 305,484; Pawnee, 256,576; Richardson, 258,130; Lancaster, one-half the county, 235,060; Gage, 808,308; Saline, fourfifths of the county, 871,200; Jefferson, 650,-420; Fillmore, two-thirds of the county, 934,000; Thayer, 601,601; Clay, two-thirds of the county, \$10,508; Nuckolls, \$31,592; Adams two-thirds of the county, 710,528; Webster, 586 450; Kearney, 1,051,946; Franklin, 812,256; Phelps, 1,683,080; Harian, 1,473,076; Gospe 1,094,750; Furnas, 1,475,784; Dawson, one third of the county, 331,289; Frontier, 1,658, 580; Red W:llow, 1,604,640; Lincoln, one-half of the county, 138,615; Hayes, 62,685; Hitchcock, 402,300; Perkins, no report; Chase, 29,850; Dundy, 13,087; Keith, one-third of the county, 28,560.

By adding the above amounts the total amount of wheat raised in the district taking the 14-cent rate is found to be 20,340, 700 bushels, which it is thought safe to figure on going to the Kansas City market under the conditions of the new Chicago Gerat Western tariff. This leaves a balance of 12,006,927 bushels of winter wheat raised in the district taking the 9-cent

Consequently it may be seen that the 'infinitesimal" portion of the state on which the 14-cent rate under the new tariff issued by President Stickney raises almost two-thirds of the entire wheat crop of Ne-

Some Feel Dubious.

President Wattles of the Grain exchange when shown the above figures, said: "I knew the amount of wheat raised in the district taking the 14-cent rate was large, but I did not think the percentage was so great. But there is a story back of all this rate matter which at this time cannot be made public. You can say that the executive committee of the Grain exchange is perfectly satisfied with present conditions and has no complaint to make, notwithstanding the figures as shown. "While President Stickney probably has

not done a great deal for Omaha he has done something, and with the start made nuzer piece an' send for ze doctor." we hope to ultimately build up a great grain market. We have to start somewhere and Mr. Stickney has given us the chance. Other grain men are not so optimistic One of them said that he was not surprised at the showing, and had believed that since Kansas City raised such a hue and cry Omaha was bound to get the short end of the bargain. It was his impression that President Stickney had no intention of overlooking his interests in Kansas City, and when the people down there raised a cry it was bound to be heard and heeded in the headquarters of the Chicago Great Several others talked in the

HELD FOR SNATCHING PURSE John Bailey is Bound Over on Testimony of Witness Who Identi-

fies Him.

John Balley, after vainly attempting to prove an alibi, was bound over in the sum of \$1,000 in police court on the charge of highway robbery. Bailey was charged with matching a purse containing \$5,50 from Miss Lizzle Deitz, at the alley on Nineteenth street between Cass and California Wednesday forenoon. In his defense he attempted to prove that he was out of the city, but failed, and witness Charles Barnes, for the state, positively identified him as Miss Deltz's assailant, Barnes having been attracted by her screams when the act was committed.

Stock Yards Report.

The monthly report of the Union Stock Yards company at South Omaha shows that the Chicago & Northwestern railway hauled to that market during November 222 cars of live stock 1.629 from the west. 378 from Iowa and 28 from the Omaha road. The Burlington was a close second, bringing in 2,22 cars. These shipments were out of a total of 7,400 cars received during the month.

Philadelphia Paint Works. PHILADELPHIA. Dec. 5.-The works of N. Z. Graves & Co., at Broad street and Geary avenue, were destroyed by fire today. Loss, \$100,000, fully insured.

BULK TAKES HIGHER RATE POUND THE LAND OF OPHIR

At Least That Is What Dr. Carl Peters Thinks of the Zambest Country.

Dr. Peters affirms that this country east of the Zambesi was originally conquered by the ancient Phoenicians and he has also brought with him stones bearing inscriptions which are preseumed to be in old Semitic characters. Furthermore, he has had secess to some newly discovered native paintings which in form and color are absolutely Egyptian in character, while the Hottentot language has revealed to the explorer undoubted traces of the ancient Egyptian character. He has in his possession a statuette, undoubtedly Egyptian which was found near the Zambesi, and which is supposed to be quite 5,000 years of age, and this is perhaps the most striking proof of the explorer's contention, for it is guite clear the statuette cannot have come overland from the Nile to the Zambesi. The doctor states:

"I had supposed at first that this land of Ophir was discovered by the Egyptians. but I now believe it was in possession of the Punic tribes when the Egyptians went down there to levy tribute and afterward apparently to establish colonies. It looks to me as if the Egyptians had gone up the Zambest river and later on King Solomor approached the district from Sofala, though I can't prove this.

"Long after the Egyptian invasion the queen of Sheba, whose country is what we low call Yemen in Arabia, was the mistress of the whole east coast of Africa. Her Sabaens had annexed this land of Ophir and made it a tributary colony, and and the crop reports from the countles then came all the great wealth that she had, and that made the gold of Arabia so much talked about. As a matter of fact there wasn't any gold in Arabia except what the Arabian traders brought over

> "When the queen went up overland to see King Solomon apparently most of the gifts she took with her came from this treasure land of hers. Now, from my own rendering of the Hebrew and from the outside facts, I should say that there is a lapse of time between the tenth and eleventh verses of I Kings x, for it appears that it was the queen of Sheba who told Solomon and his naval ally Hiram about the Land of Ophic and that she granted them a concession for working the mines. and provided them with pilots to lead them to this place.

> "One reason for her doing this may have been that she had to keep fighting the natives all the time in order to hold the colony.'

> I quote also from Dr. Peters' book, "The Eldorado of the Ancients," as follows: "One can guess at the tremendous amount of gold Solomon and Hiram got from these nines from the estimate, based on Bible figures, that on one trip alone they took £33,000,000, estimating the value by weight. And apparently they made an expedition very three years."

> Dr. Peters says that 75,000 ancient gold workings have been found in this marvelous district-which is situated on the Zambest-and that the ruins of 500 cities, dating back as far as 2000 B. C., have been found by him in the course of his explorations. He now proposes to explore the whole of the Makombe country, which he says is full of silver, copper, diamonds, in fact, any precious metal imaginable.

It will be remembered that Dr. Peters was at one time the German imperial high ommissioner of the Killimangaro district. On his return to Germany he became great figure in the Reichstag, where his opponents brought some old charges of cruelty to natives against him, with the result that he was officially consured and he left Germany for good.-Brooklyn Eagle.

PUT ON YOUR BUTTONS, BOYS Certificates as Evidence of

Unionism. "We are not asking for husbands, but those who want us must be on our eligible list, and only union men need apply." With this decree the Girls' Union League club has started out to solve the problem of whether marriage is a failure. Two of its twenty members are making the test, have declared themselves well satisfied, and have advised the others to "go and do likewise, but be sure and get a man who car-

ries a union card." The league started its eligible list on Thanksgiving eve at its annual ball. The places of honor in the grand march were given to the two brides, Mrs. Addle Ahlgrin and Mrs. Mae Burns.

The younger labor leaders have been watching the league with jealous eyes. Some of them are believed to have signed the eligible list, but just who they are neither Miss Nellie Mahoney, the club president, nor any of the members will say. The league was organized primarily to advocate the union label. Its members have refused to buy material which has not the stamp of organization on it. They have visited the principal stores in the interest of their scheme and have been successful The members are picked from a long list of applicants and all are considered belles of their respective unions.-Chicago Inter Ocean.

Flossle, aged 3, wanted more cake, but was told that it would make her sick. She was silent for a moment and then exclaimed: "Well, mamma, dest dive me an-

Small Bobby had met with a slight mishap and was crying bitterly. "Come here," said his mother, "and let

me kiss away the tears." "W-wait a m-minute," sobbed the little fellow. "I a-ain't done c-cryin' yet."

A master in Eton who had had a distressing day with his pupils drew an ape on the blackboard and said he would de scribe some of the peculiarities of this creature to his brilliant form. There were thirty-one hoys present, and the first sentence of the master was: "Now there are thirty-one of the species present"-"Excuse me, sir," exclaimed one of the boys interrupting, "but there are thirty-two."

"Keep the feet warm and head cool" is a household saying that, carried out, no

doubt saves many an illness. If in addition to this, you will carry and take "77" at the first chill or shiver, you will keep free from Colds and Grip.
