Profit Taking with Declines Develop Strong Pactors in Support of Prices.

SOME STOCKS MARKEDLY REACTIONARY

by Free Offering of Bank in Face of Calls by Another.

NEW YORK, Dec. 30.—There was a pronounced disposition to take profits in today's stock market, as was clearly forestand of yesterday, but there was not lacking of yesterday, but there was not lacking a fostering care of the market which held it in chee on the decilines and nursed the recoveries. The opinion was thereby caused that while the large interests behind the market were disinclined to continue the advances in the face of a stiff call money market, they were by no means willing to relinquish the advantageous positions escured for the year end situation. If it is true, as generally supposed that the great banking groups, with their allied and complex interests in the great trust companies, the insurance companies and in other financial institutions have given a friendly countenance to the advance in prices to correct the discrepancies from last year's showings in balance sheets, investments held, etc., it would not agree with those purposes to have the advances yielded on the very eve of the new year.

The pinch in the money market dislodged some holdings in today's market, but effectual guardianship was evinced by the way influential stocks were bid up to hold prices. The Pacifica and the United States Steel socks were conspicuous examples. Some of the less prominent stocks which have enjoyed violent advances in the last few days were forced back with proportional violence in the day's realisting. The electric stocks and the high priced coalers were in this list. The New York public utilities were markedly retractionary. The Reading statement of November net earnings showing a decrease of \$172,000 for all the companies, compared with last year, burt the coalers. The comparison is with the period of gractest activity last year, were in this list. The New York public utilities were markedly retractionary. HOGS—There was a fairly liberal run of hogs in sight this morning, but the demand was fully equal to the occasion and after buyers and sellers once got together the market ruled active and strong to 2½ higher. The improvement, however, was confined largely to the better weights. The fact that the hogs were unusually heavy this morning and the quality better than is generally the case makes the market on paper look considerably higher than yesterday. Taking quality into consideration, however, it is not age to quote the market much more than strong. Heavy hogs sold largely at \$1.52% and \$1.55 to \$1.40. The light hogs were neglected, the same as usual, and salesmen could not see any improvement in the prices offered. Mixed loads running down to pigs, had to sell around \$4.55. As trading was quite saftye on all but the light stuff, an early clearance was made.
