## Sentiment is Less Buoyant.

PARIS, Jan. 16 .- Official sentiment concerning the Russo-Japanese situation is rather less buoyant. It was explained that while the conditions are not hopeless, they undoubtedly are discouraging. Although no information is given as to the grounds the present feeling, it probably is due to the receipt of fuller information regarding the rature of Japan's latest demands. One of the foremost members of the diplomatic corps said today that a strong feeling existed in the highest official quarters that Japan had gradually enits demands, due largely to its belief that Russia is destrous of avoiding

But after summing up a general comparison of Japanes demands the officials are firmly convinced that there has been a steady increase and they regard this as one of the most dangerous features of the situation, as Russia's desire to avert war has encouraged Japan to develop its claims until they are far beyond that various demands have been given to the He says: claims until they are far beyond those Major McClelland, with a squad of sol-Russia at first was ready to concede. CHICAGO HORSES FOR INISH JUMPERS

Secretary Wilson Gets Some Pointers from Abroad and Makes Interesting Statements to Department of Agriculture.

WASHINGTON, Jan. 16.-Although the nited States is deficient in creating new breeds of animals, according to Secretary Wilson, who outlined the policy of the Department of Agriculture to the house committee on agriculture today, Sir Thomas Lipton buys horses and pigs at Chicago The horses he ships to Ireland and trains them as jumpers and then sells them in Great Britain to "ten stone Englishmen, as Irish jumpers.

The pigs, of which he selects the thin ones, he cans as "Irish bacon," which he also sells in England.

Secretary Wilson also believes that the United States can furnish the mounts for the cavalry of Europe with proper study of the breeding of horses, and the department is turning its attention to this subject at the present time. The only thing the United States has ever produced in the way of new breeds, he says, is perhaps a few breeds of hens, although we have converted a running horse into a trotter:

Many other statements of unusual inter est were made to the committee by the secretary. In discussing the problem of irrigation he said the experis of his department were studying the problem of how to handle the soil so as to conserve the water already available. In this connection three cheers for the king, which it is the he mentioned the sugar best crop, which he said was steadily on the increase despite the dire predictions made at the time of the passage of the Cuban bill.

The forests of the country, the secretary declared to be disappearing at a rapid rate. He asked for an increase of \$100,000 additional for the bureau of forestry, declaring this to be the time to inaugurate new methods in forestry.

Touching on the statistical work of his department the secretary refuted vigorously the idea that there was or could be "leak" regarding crop prognostications. He told the committee that he had invited the New York Cotton exchange to send a man to him and he would appoint him on the staff of the bureau so that he might learn the methods employed. The man was sent, but the secretary declared him to be west of Chicago-all machines thoroughly incapable of grasping the system.
