Rescuer Tells Awful Story.

If it is once settled beyond doubt that all the men in the mine are dead the work of ventilating the mine can proceed more rapidly but that is the trouble, and has been since the work of rescue began. To work the fan in a way to quickly clear the mine of the foul air would drive the afterdamp in upon the men who may have found a temporary place of refuge and it would mean almost instant death to them. The only hopeful persons about the mine are the women and children, and they will never be convinced that their husbands or their fathers have perished until their corpses have been brought out of the opening. Through a statement filed today with the house committee on the District of Columbia by the recorder of deeds of the district government, members of congress were apprised of the fact that the code of laws for the district which has been in operation during the past two years offers more inducements for incorporations than even those of New Jersey. During this time 922 certificates of incorporation have been issued of which 720 were business concerns. The aggregate capital of these amounted to \$1,541,941,251. The entire amount of fees derived by the district was \$1,901, or less than \$1.20 for each incorporation. The capital of one concern alone was \$500.

It suggests that congress provide further admission of persons into the classified service shall be based on a condition that they shall provide against their own superannuation or other disability by adequate annuity insurance, the premiums to be deducted from their salaries, and that superannuation and disability annuities for those now in the service should also be provided for as far as practicable by similar deductions from salaries.

Hungry and Joyous Microbes. "Clean Money" was argued before the house committee on banking and currency today, by Representative Gaines of Tennessee. Mr. Gaines charged that the government was largely responsible for making the paper money of the country "unclean" by sending it to China, Japan, the Philippines, Porto Rico and other countries, and said it should bear the expense of redeeming it, paying the transportation charges, and all other expenses. Mr. Gaines asserted that a single bill which had been in circulation in Cuba and returned of trade in cattle, hogs and other animals to the treasury for redemption contained 232 different kinds of microbes. These microbes he asserted, were hungry, and would joyfully feed upon the membranes of either democrat or republican.

PASSING OF A NOBLE JUSTICE

One Who Administered Justice with Impressive Force and Manly Vigor.

In the death, a few days ago, of Justice of the Peace Andrew Tracey of Mount Pleasant, N. Y., the world suffered what is perhaps an irreparable loss. Squire Tracey was a country justice of the peace who honored his profession. In addition their business along lines conforming with being six feet two inches tall and weighing 400 pounds be believed in arbitration. When ever a case was brought before him he endeavored to induce the parties to it to compromise. He was not a believer legal squabbling, and it is recorded of him that he succeeded in settling 90 per cent of his cases by the administration of good advice.

But after all he was human, and, being so, there were times when he falled. Once a man who had beaten his wife was taken before Squire Tracey. The kindly disposed giant on the bench delivered a lecture to the mines. He was 38 years old and came the wrongdoer, in which the evils of wifebeating were eloquently set forth. At the end of the squire's talk he proposed to let the sinner go free if he would promise not to beat his wife again. The fellow was sullen, however, and declined to make the promise, whereupon Squire Tracey walked from behind his table, hit the gentleman on the jaw, and after knocking him down proceeded to administer a drubbing this city and ordered to New York city that lasted until there were yells for mercy and enthusiastic indications of willingness on the part of the one beneath to make the to a defect in the hoisting engine brake promise which the squire had demanded. WHAT TO EAT (Monthly Margarine)
Washington St. and Pitth Ave., Chicago a short time the whole country was populated with feathered creatures of every variety of hue and song. His example was followed by Joseph Grinnell and Mrs. Grinnell, both of whom are ardent ornithelagists, so that now the country around Pasadena is a garden spot of beautiful birds. Many of the birds that were imported came from Japan and China. So. you see, there are more ways than one of beautifying a city or a state."-New York Times.

What Col. Hancock, Wash., D. C. Brother of the Late_ Gen. W. S. Hancock, Says:

W. S. Hancock, Says:

I take great pleasure in recommending Munyon's Paw-Paw, before all other tonics, as a cure for dyspepsia and disordered stomach. I was a long sufferer and tried numerous remedies with ut benefit. I purchased a bottle of Paw-Paw and shared it with my wife, who suffered greatly with indigestion and kindred ills. It did us so much good that I straightway ordered haif a dozen bottles for ourselves and friends. The result has been wonderful. It has put new life into both of us, completely regulating our digestion and seemingly transforming old age into youth. I beg to add herewith the signature of Mrs. Hancock with that of my own.

A GREAT NATION'S GRIEF.

The German Empire, on account of the sad affliction which has visited her iliustrious ruler, is bowed in despondence and sorrow. We realize that in the face of the omnipotence of Providence human life is insignificant. Last year disease had spread its veil of gloom over \$.755,000 homes throughtout, the universe, which was dispersed by Dr. Rurkhart's Vegetable Compound, and the sunshine of gladness and gratitude penetrated the darkness. The blood that had been clogged with poisonous foreign matter, which spread disease throughout the system, was purified and made fresh and healthy, followed by cures in the following cleesses: Rheumatism, Catarrh, Constipation, Neuralgia, and in all allments of the Stomach, Laver and Kidneys. The nerves were electrified with renewed vigor. Thirty days treatment, 25c.
