

HANNA NOT OUT OF DANGER

Physicians Do Not Conceive of Complications.

SENATOR PASSES FAIRLY GOOD DAY

Crisis Has Not Been Reached and an Unfavorable Symptom May Result Fairly Very Quickly.

WASHINGTON, Feb. 10.—Senator Hanna's condition remains practically unchanged. The sleeplessness which fatigued him last night, has been followed by periods of comparative quiet and sleep during the day, and the irritability of the stomach has again partially yielded to treatment.

The doctors are not yet able to predict with any certainty when the crisis in the case will occur. All they know for certain is that the senator has now had the fever continuously for seven days, and the disease, they say, generally runs its course in three or four weeks.

Dr. Oiler, the Baltimore diagnostician, made a very thorough examination of the senator during the afternoon and after his conclusion remarked to one of those at his bedside that his heart's action was splendid. The senator's other vital organs are also working well, with the exception of the stomach.

During the afternoon he slept about three hours. He is always rational and seems anxious to converse, although every effort is made to keep him as quiet as possible.

Mr. Hanna's temperature at 6 p. m. was 102-10, pulse 96, respiration 24. There has been some irritability of the stomach.

Otherwise the symptoms are favorable and there are no complications.
