The Iowa supreme court has just completed the second period of the first term of the court under the new rules. The court heard oral arguments on five days of the present week and took under advisement the cases from the districts in the castern and central part of the state. There will be no other cases submitted until March 5, and then there will be the final hearings in April. The court has now gone half way through the docket for the January term. The system is reported to be eminently satisfactory to the court and lawyers as far as they have gone. The plan is to have three terms each year with three or four periods in each, thus dis tributing the cases evenly through the year. Already the court has delivered decisions in guite a number of cases that were ar-

gued to the court the second week of January. After the system gets into good working order it is expected that the court will be able to decide within four weeks convention. after submission all the cases presented save those about which the court is in doubt or on which there is a division of

CENTURIES OLD

The disease which has brought more suffering, degradation and disgrace upon the human race is the same to-day that it was centuries ago. It is called Contagious Blood Poison, "The Bad Disease," and is given other names, but among all nations is regarded as the blackest and vilest of all human diseases. It goes from bad to worse; the little sores that first appear are soon followed by others; the glands of the groins swell and inflame, a red eruption breaks

out on the body, the mouth and throat become ulcerated, the hair and eye-brows drop out, and ugly yellow blotches make their ap-pearance, and if the disease is not checked at this stage, every bone, muscle, tissue and nerve in the body becomes infected out on the body, the mouth and in the body becomes infected with the poison, and from the
