GAIN IS SOON LOST AND MARKET DROPS

Corn is Expected to Take a Rise with Advent of Spring, Country Elevators Holding Key to the Situation.

OMAHA, March 3, 1804.

The Argentine surface sudation and the bearish reports from the winter wheat cett gave the market some strength as the opening, but the same strength as the off wearset eased off more than 2 cents. Chicago May opened at 11.004,100½ (the cuses of Weanssay was 183,00 and at one thing strengthened to \$1.003, but began breaking strengthened to \$1.004, but \$1.004, \$1.004

Just now the market is suffering from a lack of cash grain to supply the demand of shippers. The elevators are holding up their corn. One broker this morning vainly tried to fill an order for four cars, wanted by lowa feeders. The Minneapolis strong demand for good milling wheat, which it was reported had brought No. 1 northern to the highest promium of the Fear Vecover May, and No. 1 northern to within 1/2c of that future, aid not influence the local market enough to hold wheat firm at Wednesday's prices. Hard wheat was off 1/2c. Spring was weak at former prices. Receipts of wheat were 4 cars in and 14 cars out; one week ago, 5 and 10 cars. Receipts of corn were 30 and 19 cars; one week ago, 34 and 52 cars. Cats, 2 cars in and 4 cars out; one week ago, 4 and 6 cars.

HOGS—Receipts this morning were light for this time of week but the market was again extremely duit. Packers were slow about starting out, and when they did, their bids were only about steady. Salesmen, on the other hand, thought they ought to get a little more money and as a result the morning was well advanced before much of any business was transacted. The bulk of the medium to good weight hogs went from \$5.00 to \$5.17\% with prime heavies from \$5.50 to \$5.30. The lighter weights sold from \$5.00 down.

At noon there were still a good many hogs in first hands and buyers were very indifferent. They did not seem to care whether they got the hogs or not and in fact salesmen who had light stuff said that it was almost impossible to get even a bid. If the market was fully steady at the opening it was not only very dull at the close, but it was a beauty and the close, but it was a beauty and the close, but it was a beauty and the close, but it was not only very dull at the close, but it was a beauty and the close.

SHEEP AND LAMBS—Receipts of sheep were again liberel this morning, but the same as has been the case all the week, the demand was also in good shape. Trains were rather slow in arriving which had a tendency to delay the market to quite an extent, but still, the desirable grades were disposed of in good season. The general market on anything at all decent could be quoted fairly active and steady with yesterday. Common kinds may have been neglected to some extent, but, still, they brought practically the same prices as were paid yesterday.

The market on corn fed steers could safely be quoted active and strong, with sales going all the way from steady to a dimehigher. There was naturally more or less unevenness in the prices paid owing to the rapid changes during the week. As compared with the close of last week the market is fully 156/25c higher, and as compared with the low day last week there is an adwith the low day last week there is an admirate with the low day last week there is an admirate with the low day last week there is an admirate with the low day last week there is an admirate with the low day last week there is an admirate with the low day last week there is an admirate with the low day last week there is an admirate when the low day last week there is an admirate when the low day last week there is an admirate when the low day last week there is an admirate when the low day last week there is an admirate when the low day last week there is an admirate when the low day last week there is an admirate when the low day last week there is an admirate when the low day last week there is an admirate when the low day last week there is an admirate when the low day last week l ket is fully 15623c higher, and as compared with the low day last week there is an advance in many cases of as much as 40c. The kinds that were neglected last week oy both packers and feeders have shown the most improvement. Packers did not want them because they were too thin and feeders did not buy them owing to lack of quality. Packers, however, are taking them this week at an advance of fully 40c.

The cow market was active and strong. The same as with beef steers sales ranged all the way from steady to a dime higher, the greatest improvement being on the good to choice grades. Canners may be a little better, but that class of stock has been selling in much the same notches for some time past. As receipts of cow stuff were not excessive a good clearance was made.

Bulls showed but little change from yesterday. They might have been a little easier to sell, but there was no particular improvement in the prices paid. Veal calves sold freely at good steady prices.

There were only a few stockers and feeders in sight and the quality was inferior. The general market, though, could safely be quoted steady. Representative sales:
