Attorney General Pront So Advises Board of Equalization.

OPPOSITION TO THE EURKETT BOOM

Union Veteran Republican Club of Lincoln Refuses to Endorse Him for Senn-

torship.

(From a Staff Correspondent.) LINCOLN, March 8 .- (Special.)-This afternoon Attorney General Prout handed down an opinion holding that net and not gross credits are taxable under the new revenue law. His action was taken at the request of the State Board of Equalization, which will now instruct county assessors to allow all owners of credits to deduct their indebtedness when making out their personalty schedules. In effect the holding will mean much to the wholesale and lobbing interests of Omaha and Lincoln, which had been protesting against the heavy burdens which would be imposed upon them by taxation of gross credits, since much of

their business is done on credit. Attorney General Prout follows the line of reasoning adopted by Commissioner Duffle in the opinion which he wrote when the law was attacked in the supreme court last fall. There is some question as to the weight which can be given to the commissioner's opinion, since the court did not in express language approve of it, and Chief Justice Holcomb has been quoted as saying that the Duffie view of the matter is a mere dictum, not binding in law. It was charged at the time that the court had enough to do in handling the general question of the constitutionality of the measure without going into the credit problem. However, the board having obtained an expression from the state's legal adviser, will follow that as the law until someone steps in to test the law by injunction or mandamus, and there are at present no prospects of any such litigation.

Attorney General Prout says: The published report of the case shows that Judge Duffie's holding was concurred in by Kirspatrick and Letton, C. C. Moreover the commissioners names set with the members of the court during the argument f the case cited, and the court nanded own Judge Duffie's opinion with the chief estice's opinion sustaining the new revenue

The Board of Equalization still has a difficult task before it in determining whether the rule laid down by the attorney general applies to book credits alone or to all forms of negotiable paper, including bonds. Before the question of net credit taxation was raised it was intimated that the board limit the application of the exemption to the credits on the books of merchants and jobbers.

Refuse to Endorse Burkett. Last night the Union Veveran Republican club, of which Governor Mickey is a member, turned down a resolution for the endorsement of Congressman Elmer J. Burkett for United States senator to succeed Dietrich, and thereby stuck the first pin into the boom of the Lincoln man. Former Congressman J. B. He read an extract from the report of Assistant Post-\$700 to \$1,200 at the suggestion of Burkett.

WHAT TEA DOES TO RHEUMATICS.

When you next take tea, think of this. Tea contains 175 grains of Uric Acid in every pound.

Meat contains only five to seven grains. Rheumatism is Uric Acid in the blood. Uric Acid accumulates from food when the digestive apparatus cannot create enough Alkaline elements (like soda) to This Acid collects ures, or worn-out

waste matter, from the system. That Urea enters the blood when Alkaline action has not previously dissolved it. By and by the waste matter reaches the joints and muscles, through circulation of

This pulpy covering grows to the bones, as well as to the particles deposited. There it hardens like plaster or sealing wax. Then we have "bony joints," almost inflexible, and usually fixed in a bended position, from the pain and inflammation. That is Rheumatism at its worst.

It is bad enough before it gets that far. There is but one sure way of curing Rheumatism. The first step is to neutralize the Uric Acid already in the system. Next. to dissolve, and carry away, the hard deposits that grind between the joints. Then get the digestive apparatus into such healthy condition that it will, unaided, produce less Uric Acid, and more Alkalines. This is what doctors generally have failed to do.

It is what I studied a lifetime to accombitsh, and achieved only after many failures and thousands of experiments. At last I found, in Germany, a Solvent which was not only effective, but abso-

Fear Typhold Scourge.

Considerable alarm is felt at the state ouse over the prevalence of typhoid fever among the employes, three of whom are now invalided owing to that cause. An effort is being made to discover the hiding place of the contagion, which seems to have affected those employed in the east wing. The water supply is declared by the authorities to be in first class condition. Had sanitation, the lack of ventilation and the damp earthen floor in the basement are variously held to be the

source of the trouble. Three young women stenographers are the victims so far. Miss Mary Greer, employed by the adjutant general, was the first to suffer from the germs. Then Miss Grace Walker, the governor's stenographer, was taken ill, and now Miss Dalsy Smith, clerk in the office of Oil Inspector Church, is ill with the fever, all three cases following each other within the space of four weeks. The physicians look for recoveries in all three cases.

The Board of Public Lands and Buildings will make an effort to have the cause of the trouble located. The plumbing of the entire east wing of the capitol will probably have to be overhauled.

Big Sum for a Boy's Hand,

This afternoon, after being out for short time, a Lancaster county jury brought in a verdict of \$5,000 for a 9-year-old colored boy named Ulric Smith, whose hand was cut off last fall by a street car belonging to the Lincoln Traction company. The box was riding on a wagon alongside the track on O street between Fourteenth and Fifteen streets one night last fall when he fell to the pavement in front of a rapidly approaching car. His hand was cut off by the car wheels and suit was frought in his behalf to recover \$10,000 in damages. The traction company urged in its defense that Its car was not moving at an unusually high rate of speed and that the motorman was not negligent, but the attorneys for the plaintiff laid especial stress on the failure to equip the car with a fender. which would have lifted the boy from the track.

> MURDER CHARGE WILL NOT STICK Harley Feasel Discharged After Pre-

liminary Hearing. NELSON, Neb., Murch 8 - (Special.)-The reliminary hearing of Harley Feasel and Charles Hutchinson before County Judge J. L. Dysart was completed last night. The former was charged with having murdered his uncle at Basturck on or about November 1, last. The latter had disposed of property of the missing man and was held as an important witness in the matter. A number of witnesses were heard on both sides and some strong circumstantial evi-

dence was presented by the prosecution. It was shown that a new grave had been dug under the Feasel house; some bloody clothes were found, and a razor and re volver with blood stains. The body of the nissing man was not found in the search, however, and nothing has been learned of it as yet. The defense established a pretty strong alibi and as the prosecution was mable to prove that murder had been ommitted, or that the prisoner was connected in any way with the missing man in a criminal sense, he was discharged, In the prosecution County Attorney E. D. Brown was assisted by Ex-District Judge G. W. Stubbs, while Ex-Congressman R. D. Sutherland conducted the defense. It is rumored that there will be other arrests made. A brother of the missing man s determined, if possible, to get at the facts in the case.
