MAY AND JULY OPEN HIGH, BUT FALL BACK

Prospect of Getting Seed Corn Are Not Brightest, Searcity Being Generally Reported-Future Runs Down.

OMAHA, March Z. 1994.

The future market in wheat was feeling bunish by reason of the premium on cash wheat everywhere and the substant estimate that winter wheat who be below the average. The greatest strength came carrier in the session both in wheat and oats through the covering of shorts. May opened in rom 200 point above the rose of riday and suvanced to be, but later weakened to the hair. New July opened it over the close, but did not haid its strength, ending at Friday quotations. The mining situation in the north seems to be improving, for it is reported that the Minnespoiss mills will start again Monday. Duluth millers have been buying wheat there and the cash demand is better. From St. Louis comes word that a leading mill there will shut down as it has a big stock of hard wheat hour and no demand.

no demand.

Talk is heard of trouble in getting seed corn. In lowe it is said germinating tests show the seed should cause grave apprehension. The low temperatures during Norember are said to have killed or weak-ened the germ and good results from plant ened the germ and good results from planting are problematical. A southern hillhols, authority says corn left in southern lillhols, in Missouri and in lowa never can grade on the market. Short sellers, according to his idea, will be pinched if they persist in thinking plenty or contract grade is in the hands of the farmers. N. B. Updike was the principal seller of May corn this morning. This future opened at 46%c, % point over the close of Friday. It sagged to 46c on selling offers and continued the decline to 46%c.

SMOKE FILLS ROOM IN BLINDING CLOUDS

Plan for the Distribution of Northern Securities Holdings and Sympathetic Stocks Occasion of Excited Speculation.

NEW YORK, March 26.—Today's stock market was a small affair and trading centered again in Union Pacific. That stock fluctuated over a range of slightly more than a point above last night's level, with constant reactions and ended the day with an advance of 'gc. Some excitement was caused all through the Stock exchange neighborhood by the outbreak of a dangerous fire near at hand on Broadway, and the clouds of blinding and suffocating smoke pervaded the exchange floor and the offices and hallways of the great office buildings surrounding it. Attention was thus diverted from the warket and the trading was dull and languid. A reaction pefore the bank statement carried prices back in the neighborhood of last night's level and there was an indifferent raily after its publication.

The closing was dull and heavy. The bank statement showed something more than the expected increase in cash holdings. The liberal loan expansion carried that item fairly above the billion-dollar mark for the first time in the history of the clearing house. The increase in borrowing was attributed largely to the increase in speculation on the Stock exchange. Total sales of bonds, par value, \$80,090.

The plan for the distribution of the

change. Total sales of bonds, par value, \$600,000.

The plan for the distribution of the Northern Securities holdings of Northern Pacific and Great Northern was the occasion of an excited speculation on two days of the week. Transactions on Tuesday in over 400,000 shares of Union Pacific alone at an advance of over 8 points was an incident which finds few parallels in the history of the Stock exchange. One parallel was the excited competitive buying of Northern Pacific in 1901. which precipitated the corner in that stock. The Union Facific movement came under suspicion of a speculative and manipulative origin. The precedent was recalled of the enormous absorption of Southern railway which followed the intimations of the lodgment of the Louisville & Nashville in a community of interest in the south Dealings in Southern railway for one day mounted up to \$84,000 shares and were not followed by any change of representation in the control of that railway.

The laggard movement in United States Steel in view of the reports of revived activity in the iron and steel trade was especially notable, although the tips from that trade had a cheering influence upon the general sentiment. So did the rains in the southwestern wheat belt. This influence was somewhat modified by the advance in price of wheat. The avoidance of a soft coal strike and favorable conditions in the anthracite trade were beneficial influences. Prospects for railroad earnings were better. Exchange advanced to the gold export print, but the control of the pold actory print, but the control of the pold actory print, but the control of the pold actory print, but the control of the gold export print, but the control of the pold actory print, but the control of the pold plan for the distribution of the

the gold export point, but the con-ued inflow of Japanese gold has had an tinued inflow of Japanese gold has had an effect.

The money rates have fallen and interest on time loans is at a point which encourages the holding of dividend paying railroad stocks at present points. Railroad stocks at present points. Railroad bonds related to Northern Securities merser shared in the temporary activity of the stocks. The bond market generally was irregular. United States 2s. old 4s and new 4s, registered, increased 1s per cent during the week.

Day Goods Market.

NEW YORK, March 26-DRY GOODS-Buyers continue to refrain from operating under the belief that prices will decline. and until that time arrivals will remain inactive On the other hand, manufacturers are firm in their ideas and refuse to make contracts except at ruling prices. Under these conditions the market closes quietly and unchanged, either as to prices or movement of goods.

Good to choice cattle are cuotable from \$4.00 to \$5.00, with something foncy as high as \$5.25; fair to good cattle sell-from \$4.00 to \$4.50 and the short-fed kinds from \$1.50 to \$4.00.

The cow market has been brisk most all the week and good lightweight helfers and well-finished cows of light to medium weight are generally a charter higher than a week ago. Heavy cows and the general run of fair to good cows and helfers are not over 10.15s higher for the week, while canners are selling in much the same

weight are generally a charter higher than a week ago. Heavy cows and the general run of fair to good cows and helfers are not over 10015c higher for the week, while canners are selling in much the same notches they have for some, time past. Good to choice cows and helfers are quotable from \$2.50 to \$2.55. and canners and cutters from \$2.50 to \$2.55. with the good fat buils from \$2.50 to \$2.55. Weal calves are in good femand at firm prices, as high as \$5.75 being paid for the best.

There has been a fair run of stockers and feeders here this week for the time of year. The market has been rather spoited, being a little stronger on some days than on others, but at the close of the week there is practically no quotable change from the close of last week. The better grades on most days have sold readily enough, while common kinds have been neglected to some extent. Good to choice grades are quotable at from \$3.50 to \$3.75 and the commoner kinds from \$3.50 down.

HOGS—There was another light run of hogs here this morning and with a fairly liberal demand the market showed an advance of fully a nickel. Trading was fairly active, so that most everything was disposed of in good season. The same as was the case yesterday, the range of prices was narrow, the big builk of the hogs selfing within a spread of a nickel. Quality and not weight now determines prices. Elither choice heavies or lights top the market, as is shown by the fact that hogs weighing 277 pounds and others only 155 pounds sold today at \$5.17½ and \$6.50 pound hogs brought \$5.00. REGISTERED BONDS ARE SAFE Court Holds Broker Liable for Sale When Not Authorized by Owner.

NEW YORK, March 26 .- A decision has been handed down by the appelate division of the supreme court affirming the decision of Justice Scott, in which a member of the New York Stock exchange and three rallway companies were held liable for losses sustained through the unauthorized transfer of registered bonds.

It is the first decision of that nature and was based on the suit of the Jennie Clarkson Home for Children, the treasurer of which sold through a broker a lot of bonds with which the home was endowed and fled with the money. It was shown that the treasurer had forged a resolution of the home's directors, enabling him to procure the transfer of the bonds to

TRUCE DECLARED AT BUTTE Contesting Mining Companies Reach

SHEEP—There were practically no sheep on sale this morning, but for the week receipts show an increase over last week of about 5.00 head, and as compared with the same week of last year there is a gain of about 1,000 head. Considering the liberal receipts, though, the market has been in exceptionally good condition. In fact, trading has been very active, with the lendency of prices upward. Ewes and wethers can safely be quoted a quarter higher for the week, while yearlings are all of 100 libe higher. Good to choice lambs are also 105 libe higher. Good to choice lambs are also 105 libe higher, but the less desirable grades are slow and no more than steady. The quality of the lambs coming forward this week has not been at all good, with the exception of a bunch which hold for 55.65, and another one at 55.00. A choice bunch ought to bring right around 55.76.

Practically the only feeders coming forward are short fed lambs, for which there is a demand at about the same prices as have been ruling for some time past.
