CRAIN AND PRODUCE MARKET Wheat Opens Low and Gains Cent, While Core Loses a Cent. BEARISH FLOUR SITUATION DOMINATES Nothing Else Being Sold Dur-

Omaha Continues Good Corn Market, ing Session of the Board. OMAHA, April 6, 1904.

Wheat opened generally a cent lower than the close Monday and after backing and filing, ended by gaining a cent. Corn opened but little lower than Monday close and lost a cent. The bearism flour situation weakened the wheat. The best authorities say the Minneapolls flour output will be reduced from now on until August, because of the lack of foreign demand. These authorities feel that in face of this great reduction in use, wheat is too high. To offset this bear argument, comes word from Winnipeg that Canada cannot expect the ordinary acreage of wheat because of the late snows which are very deep. The morthern counties of Dakota are also buried. The Missouri April report gives wheat condition at 81 as against 85 last December. It last April and 69 last June. The Hessian fly is said to be working in some counties. The premium on clash wheat gives the impression of strength, but it is said to be due rather to the enhanced view of holders than to scarcity or an urgent demand. Chicago Tuesday sold 7,000 bushels No. 2 red f. o. b. at \$1.09\footnote{a} and \$50,000 bushels No. 1 Northern went today to millers at \(\footnote{a} \) cent over the May.

The Chicago corn sentiment is extremely bearish. Armour is said to be in the market for all the lake tonnage at 2 cents to Buffalo that he can get. He has not chartered other steamers, however. No one seems to be fighting him in the market. Omaha speculators who are long on the May seem to like it, and some of those who wanted it for an investment were unable to get the option.

The range of prices in Omaha grain for future delivery and the close of Tuesday and today were as follows:

—Closed—Open. High. Low. Today. Tues.

Foreign Financial.

LONDON, April 6.—There was a plethora of money in the market today, but the demand was moderate owing to the consul settlement, while heavy repayments were made to the Bank of England. The issue of £10,000,000 of new treasury bills April 11 is expected to reduce supplies and have a steadying effect on discounts. Prices on the Stock exchange were firm and business was fairly active. First-class securities were in demand. Consols were strong and home rails were steady. Americans advanced to above parity. The market closed firm. Foreigners were irregular. and in fact some of the neavy cattle that were coarse and rather common were hard to sell at steady prices. Warmed-up stuff was also dull and perhaps in some cases a little lower. The good cattle were sold in good season, but it was a little late be-fore all the commoner kinds were cleaned up.

The cow market was very uneven. There were a good many on sale and buyers were inclined to go around and pick up the bunches they liked and leave the others. As a general thing light-weight cows and helfers of good quality were fully steady and in some spots were a trific strong. Heavy cows and the medium grades were rather slow and in most cases no more than steady. Salesmen complained in some cases that they found it very hard to get steady prices for the less desirable grades. Canaers sold in about the same old notches. Good light buils were in fairly good demand at steady prices. Heavy buils were slow, the same as usual. Veal caives sold at steady prices.

There was another small supply of stockers and feeders and the better grades could be quoted stendy to strong, with others about steady. Most everything in the yards in the way of stock cattle was out of first hands in good season. Representative sales: The cow market was very uneven. There

HEIFERS

HOGS—There was not an excessive run of hogs in sight this morning, but the tendency of prices was downward at all points. The market here opened fully a nickel lower and before much business was transacted the market weakened still further and closed 5610c lower than yesterday's general market. Trading was quite active at the decline and the bulk of the hogs

went at \$5.00 with the choicer loads largely at \$5.02\fomath{\psi}_2\$ and \$5.05. The less desirable loads sold from \$4.97\fomath{\psi}_2\$ down. Toward the close packers wanted to buy the best loads at \$5.00 and the general run at \$4.57\fomath{\psi}_2\$. As salesmen were not satisfied with those prices, trading was slow and it was a little late before the pens were cleared. Representative sales:

Manufacturers are now fearful of the future, fearing that cotton will not warrant concessions.
