The Hungarian government deplores and discourages emigration. Nothing is further from its mind than to encourage it. But it had to deal with facts, not with wishes and theories. The existing condition was that thousands and thousands of Hungarians were leaving their country for the United States. As there was no direct line from the Hungarian ports to America, they had to leave by way of Germany. Beigium and Holland. These circuitous routes entailed great expense and leasened the small capital of the emigrants. By trying to establish a direct line from Flume the government thought to get a better control over the emigration and to provide for the welfare of the emigrants who could not be kept at home.
