The most interesting thing about yesterday's game with the Sloux City tail-enders as the fact that, in accordance with Pa Rourke's edict, it was indies' day and more than 1,000 of the fair sex, togged out in New York all their summer finery, occupied seats in St. Louis the grandstand, listened to the music and Brooklyn Pitsburg excuse for so doing. The Sloux braves were so easy for Pa's boys that the game cked interest and went onto the record Omaha by a score of 6 to 2. The visitors got a run in the fourth and one in the fifth on a base on balls and a single ingle and a triple in the other. With Howard and Miller on bases in the first finning Harry Welch lambasted one of Kostal's choicest twisters out into the garden presided over by Mr. Preston for three bases. Then in the sixth the home team got another swatting fit and a three-base and Hemphill and Padden's base running were features. Attendance, 3.80% Score: hit by Miller, a safe one by Shipke coupled with the must of Doian's fly by Lohr were productive of three more runs. Just to make it good and hard Howard leaned up against another in the eighth for three bases and scored on Welch's fly, making a total of 6. Captain Delan pulled them down out of the sky with great precision down out of the sky with great precision and every other man on the team except two easy ones and then had the effrontery two easy ones and then had the effrontery sto laugh about it. Had not the team as a pitched ball: By Seiver, Lachance. Struck whole played a splendid fielding as well as batting game the result would have been 1:27. Umpire: Connolly. different, for while McCarthy pitched a fair quality of ball, the visiting pitcher had him beaten at every turn of the routs. Attendance, 2,161. The score:

company's weekly review of trade tomorrow will say:

Reports of increased trade are received for a few favored points, but the nation as a whole has not improved its commercial position during the past week, insofar as current distribution of merchandise or manufacturing activities are concerned. Prospects for the future have improved somewhat, however, on account of the progress made in agriculture. Unless the crops suffer an unusual setback hereafter it should be a good year for the farmers and all other industries will feel the stimulus. Lake traffic is seriously interrupted by the strike, but otherwise the labor situation is not alarming. Leading branches of manufactures are extremely quiet, the recent slight gain in iron and steel having disappeared, and transporting interests are not equalling last year's results, railway carnings thus far svaliable for May showing a decrease of 5.6 per cent.

Although quotations of iron and steel products have yielded little, the industry is not making satisfactory progress. In a few lines, notably tin plates and tubes, there is no lack of inquiry, but the products are by no means typical of the situation.

Hides of late salting continue in good demand, branded steers and cows showing the most strength. Larger receipts of foreign klin-dried have somewhat depressed prices. Aside from some activity in hemicock sole sold for export to Great Britain, the leather market has ruled quiet. Great demand for footwear. New England footwear producers report additional contracts for heavy fall goods from eastern jobbers, but factories are only running about half time on supplementary purchases of summer goods. Buyers of woolen and worsted wear have shown more interest, fairly numerous supplementary orders being placed.

weather conditions are still the apparent drawback in the trade and crop situation. Temperatures have been too cool to allow of free distribution of spring and summer goods at retail and they ilkewise retard germination and growth of crops, though permitting good progress in seeding in various sections of the country. In jobbing circles the feeling is that the spring trade is past and gone and efforts are now concentrating on fall business, reports as to which are fairly good, though not equal to a year ago.

Some faint evidences of improvement are to be noted, particularly in the shos and leather industry, and in wool at western primary markets, but against this are to be cited further weakness in iron, rather more quietness in lumber and talk of further curtaliment in cotton mills production. The industrial situation is rather quieter, but the most serious strike of the season, that of masters and pilots of lake vessels, continues.

This has practically killed transportation say tomorrow:

that of masters and pilots of lake vessels, continues.

This has practically killed transportation on the lakes and the coal, ore, lumber and grain trades exhibit the effect of the almost total stoppage of the activities of over 100,000 men. Rallway earnings show recessions from last year. At eastern markets wholesale trade in dry goods is of moderate proportions, though symptoms of improvement are not entirely absent. Rather more is reported doing in hides this week and a fractional advance is reported. Perhaps the most pronounced weakness shown by any one product is that noted in iron. Among the finished products bar iron is lower at the west, although reported held steady at the east. Present feeling
