where, in all probability, they will be fully sanctioned by a majority of the delegates, Canonical Rule on Divorce.

Most important of these many matters are those of divorce, Romanism, Mormonism, the Bible in the public schools and regulations of church membership. The question as to what shall constitute the cognized grounds for divorce was the cause of a spirited contest in the committee, in which some of the ablest delegates in the conference took active part. After hours of discussion, in which arguents were made urging the sanotioning of two or three distinct causes as legitimate grounds for divorce the committee finally voted to make the crime of adultery the sole legal reason for separation to be recognized by the church. Final desertion and extreme cruelty were the additional grounds that were urged for adoption as a part of the discipline, but these were opposed by a majority of the committee.

The resolution on Mormonism which will be presented to the conference is brief and congress to enact a constitutional tain practices of Mormonism in any part his seat. of the United States or in any country sub-

Another resolution denied the charge that the teaching of the Bible in the public school, without note or comment, was a starian act, and deplored the reputed offorts of the Roman Catholic church to seours a division of the public school fund alorg sectarian lines as a menace to the public school system, and called upon cones to provide an amendment to the fedrai constitution which would forever make ssible the accomplishment of such an object. The resolution also provided for the extension of every aid and support to Methodist missionaries engaged in the propagation of the Protestant faith in

nan Catholic churches A resolution regulating the membership of the church also was adopted. It provides that those who full in their duties of attending services and paying their share toward church expenses may be dropped from the roll of membership by the pastor of the church, after he has made due investigation, with the provision that on demand they may receive a regular trial. The latter resolution evoked considerable debate, but was finally accepted.

### CANAL AND EIGHT-HOUR LAW

Contractors and Labor Organizations Desply Interested in Question Baised by Them.

DECISION IN HANDS OF COMMISSION

Prospective Bidders and Prospective Workingmen Desire to Know if Federal Law Extends to Canal Zone.

(From a Staff Correspondent.) WASHINGTON, May 34 .- (Special.) -- One United States to raise \$12.000,000 with which of the most important questions with which to endow colleges, especially the weaker the Panama Canal commission will shortly have to deal is whether the present eighthour law, act of August 1, 1892, applies to of the Board of Ald for Colleges and the the construction of the Panama canal, and endowment committee under the name of whether, if passed, the eight-hour bill now "College board," and the removal of the before congress will so apply. Not only headquarters of the board from Chicago to are thousands of prospective contractors New York. At today's session reports from and subcontractors vitally interested in a decision on these points, but also the pub-He at large, as the application of either the made by men who have devoted their lives present laws or the pending bill would extend the time of construction at least two years and increase its cost by many millions of dollars. It is understood that the American Anti-Boycott association, which includes in its membership many builders and dredgers und others who may become directly or indirectly interested in canal contracts, will undertake to secure a decision from the proper officials. In this event Mr. Daniel Davenport of Bridgeport, Conn., the executive agent of the association, who has been so prominently identifled with the opposition to the eight-hour bill, will have charge of the case.

The leaders of organized labor are also

looking into this matter carefully, for althe west to the knowledge and obedience though the canal will be located far from the United States, it will be dug on Amer ican territory, or territory under the jurisdiction of the United States, and be constructed and owned by the government, and would not only be a triumph, but have a ent eight-hour law as vicious, and the bill for its extension as socialistic, hold that under no circumstances should either be se

applied. Contractors Desire Certainty. It is argued by some that as the canal none is entirely under the control of the canal commission, acting, of course, under the supervision of the secretary of war, and by the direction of the president, the eight-hour act of 1892 does not ex proprio givore apply to the zone, and that until congress shall determine otherwise the natter rests entirely with the commissioe. It is further represented that as the canal will necessarily be constructed so largely by labor other than from the United States," to eight hours a day. But while it is not probable that the commission would undertake to enforce this law should the canal constructed directly under its supervision, what the prospective contractors want to know is whether they would be exempt if the work should be done under contracts and they should be fortunate enough to secure some of them. In the absence of an authoritative opinion in advance they fear the question might be raised at a later time by the labor organizations at home and they might be heavily mulcted.

Of even greater consequence to the mem bers of the Anti-Boycott association is the a second time and the committee could not matter of the application of the eight-hour agree on an official name. It was decided bill. That provides for the employment of forth; be it further
