Those possessed of the bullish sentiment in wheat are making comparisons, statistically, of this year and may; 188, which was the year of the dark was the year of the dark that the visible supply in the United States and Canada is about 1,600,600 bushels more than in 1895.
These people, however, do not say that the wheat crop of the world for 1891 was only 2,255,000,000, while in 1802 it was 2,225,000,000, while in 1802 it was 2,225,000,000.
Further, the world's wheat crop for 1895 proved to be only 2,854,000,600, while the prospect for the present year is much in excess of that amount.

A Chicago house, as a result of 104 circular letters sent to Nebraska, finds these results: Ninety per cent of the corn has been planted and the increase in acrosage is 7 per cent.
