Smallest Wheat Exporting Business in Many Years.

NO BULL CAMPAIGN POSSIBLE NOW Wheat Market Dull-No Local Specula-

tion - Missouri and Kansas Send Good Grain Reports.

OMAHA, June 1, 1904. Never within late years has there been season when there was so little experi year the shipments amounted to be in 4,000,000 and 5,000,000 bushels sold for August and September direct to Eu-This year only 230,000 bushels have sold, and this amount to speculators, hope for a later demand on the other

The cables have not quite followed the advance here and the market is narrow. There is supposed to be no great short interest and the small stocks make the speculators afraid to sell the grain, so a small buying sends the price up.

A bull campaign in any grain seems to be out of the question just now. While considerable of the corn is replanted, the wheat prospect is improving very rapidly, and the old grain in the farmers' hands has been more than was expected by the trade. The shorts have largely covered and there is apt to be no considerable buying until some builds circumstance develops.

The Missouri crep report gives no change in wheat condition, this being \$1, against \$6 for last year. The corn has improved from \$1 to 10 points, being now 70, as against 74 for 1903. Of corn planting 75 per cent is finished. The Kansas report is eald to show winter wheat in good condition in eastern and central Kansas, but corn to be suffering from too much rain.

The general market was mert and the day's small trading did not after materially the level of prices. Within the narrow fluctuations of the day the tone differed from time to time, but the undertone was heavy.

Cleveland, Cincinnati & St. Louis had dis-charged men to the number of 1,100 to re-duce expenses was an influence in the sale direction. Wall street regards with equa-nimity the declining tendency in the cotton market as promising a better adjustment to the needs of the cotton industry. But so sudden a drop as that of today and the presumed speculative losses involved by the throwing over of long holdings by the uncovering of stop loss orders had a some-what disturbing effect on speculative senti-ment.

PRIME MERCANTILE PAPER-35,64%

The disposition of the day's receipts as follows, each buyer purchasing number of head indicated:

doubtedly bring considerably more than \$5.70. Shippers are all going home well pleased with their returns, as their cattle in practically every case are selling for much more than they expected.

The cow market was also strong and active so far as the desirable grades were concerned. There were so few offered that it did not take long to clear the pens. Commission men are cautioning their shippers to look out for grass cows. Packers are not at all snxious for them and are inclined to buy them lower. Such kinds are no more than steady with last week. Canners and common cutters are also neglected and barely steady for the week. Good fat cows and helfers, though, are active and higher. Strictly choice grades are 25635c higher than they were a week ago.

Bulls were also active and strong, as high as \$4.50 being paid. Bulls are also 22635c higher for the week, with the demand very active. Veal calves are strong and higher for the week, best grades bringing \$5.50.

There is nothing new to be said of stockers and feeders. Very few arrived, but those that were offered met with ready sale at good strong prices. The market for the week is not a great deal different, though, if anything prices are a little stronger. Representative sales:
