> Some progress has been made in tracing the revolver-enough to indicate that it may have been purchased in San Francisco. It was manufactured in Springfield, Mass. bore the factory number, 75.050, was purchased by a firm here and sold by them in 1898 or 1899. The firm's records for those years have been destroyed, but the dealers express the belief that the revolver was among a lot shipped to San Francisco. If this should prove true the owner of the fatal weapon may be identified, as four of the persons directly connected with the tragedy are well known in San Francisco A strict search of pawn shops has failed develop any information which would lead to the belief that the revolver was purchased in this city and the detectives are hopeful that a valuable clue may be obtained in California.

James Dooley, a deck hand, is reported as having told a strange story regarding the sale of his revolver to a stranger in West Broadway near the scene of the shooting, a short time before Young and Mrs. Patterson are known to have been there. He asserts the man treated him several times in a saloon and, upon learning he had a weapon, purchased it, saying he wanted to shoot a woman. Little credence is placed in the story.

Go to your druggist and get a bottle of this wonderful remedy. Take it according to directions. Then if you feel you have not been benefited enough to feel satisfied that you will be cured by its use, just go back to the druggist and tell him so and he has our authority to refund you every cent you have paid him. Nothing could be simpler and fairer, but we are so sure of the results of this medicine that we are safe in making this guarantee. "My little son, a boy of five, broke out with an itching rash. Three doctors prescribed for him, but he kept getting worse until we could not dress him any more. They finally advised me to try a certain medical college, but its treatment did not do any good. At the time I was induced to try Cuticura Remedies he was so bad that I had to cut his hair off and put the Cutleura Olntment on him on bandages, as is was impossible to touch him with the bare hand. There was not one square inch of skin on his whole body that was not affected. He was one mass of sores. The bandages used to stick to his skin and in removing them it used to take the skin off with them, and the screams from the poor child were heart-breaking. I began to think that he would never get well, but after the second application of Cuticura Ointment I began to see signs of improvement, and with the third and fourth applications the sores commenced to dry up. His skin peeled off twenty times, but it finally yielded to the treatment. I used the Cuticura Resolvent for his blood, and now I can say that he is entirely cured, and a stronger and healthler boy you never saw than he is to-day." ROBERT WATTAM,
