GRAIN AND PRODUCE MARKET

Anxious Forty Days Reached for the Winter Wheat Crop.

SMALL MOVEMENT IN WHEAT AND OATS

Kansas and Iowa Reports Show Rain Damage—Local Cash Business Better—Directors Meet on Grain Committee.

OMAHA, June 8, 1904.

The next thirty or forty days are of the greatest importance to the winter wheat crop. Bad weather during this harvest time will cause much apprehension and perhaps great damage, in the states of Nebraska and Kansas and Oklahoma Territory the winter wheat harvest will take all of this time. The soft winter wheat is already being cut in the southern part of the district and will be finished in the north about the time the harvesting of the hard wheat begins in Oklahoma. The last of the hard wheat will be cut in Nebraska about the end of thirty or forty days. Dallas, Tex., reports the first car of new wheat sold there June 1 for 86 cents. It graded No. 2. Several days will elapse before a movement of new wheat begins, although harvesting and threshing is general. The samples show Texas wheat to be of first-rate quality, but the crop is smaller than last year. Kansas City reports cutting of hard wheat will not generally begin before the 25th. Chicago cannot expect much new wheat before July.

The movement of oats is not large. The stock of standard in Chicago is 662,000 bushels, nearly all controlled by one firm. It decreased 97,500 bushels last week. The price is relatively higher than the wheat price and it would seem if the farmers had the oats they would be coming to market. With hot weather the eastern market will not be able to use mill waste for feeding and the demand will increase so sharply Chicago may be cleaned out. Minneapolis reports country elevators receiving very little wheat from farmers. It is thought they must have sold all for the country promises well and the price is high. Minneapolis stocks of wheat decreased 425,000 bushels in the last four days.

The Board of Trade cable gives the increase in wheat for India this year over last as 74,000,000 bushels. Broomhall made it only 61,000,000. The Iowa and Kansas crop bulletins are out. The first shows damage by rains in the north central and western districts amounting to two-fifths of the acreage. Kansas reports wheat all right in the east and central portions. Much bottom wheat overflowed and hurt by hail. In the west the spring wheat promise is good, but the winter wheat is not. Corn is backward, but oats are doing finely.

CHICAGO GRAIN AND PROVISIONS

Features of the Trading and Closing Prices on Board of Trade.

CHICAGO, June 8.—Confirmation of a record breaking crop in India induced profit taking in wheat today. At the close July wheat was down 1½c. Corn is ⅛@¼c. Oats show a loss of ⅛@¼c and provisions 2½c to 12½c.

Under the influence of weather conditions and indifferent cables the wheat market opened weak, July delivery being off ⅛c to ⅛c at 87¾@87¾c.

Much of the late profit taking was due to predictions that the government report to be issued Friday would be extremely bearish regarding spring wheat. The market closed weak. After selling at 88¾c, July closed at 86¾@87c. Clearances of wheat and flour were equal to 25,800 bushels. Primary receipts were 268,900 bushels, against 255,900 a year ago. Minneapolis, Duluth and Chicago reported receipts of 137 cars, compared with 274 cars last week.

Corn was firm. Indications for better weather were also against the market. The close was at the low point. July opened unchanged to ⅛c higher, at 49¼c to 49⅜c, sold down to 48¾c and closed at 48¾@48⅞c. Local receipts were 237 cars, with 37 of contract grade.

Oats were the strongest of the grains. After opening unchanged to a shade higher at 39¾@39⅞c, July ranged between 39¾c and 40c and closed at 39¾c. Local receipts were 102 cars.

An advance of 10c to 15c in hog prices caused a strong tone in provisions early in the day, but during the latter part of the session the initial gain was all lost on profit taking. The weakness of corn was largely responsible for the late selling. At the close September pork was down 12½c, at $12.20. September lard was off 2½c, at $6.77½. Ribs closed 5@7½c lower, at $7.07½. Estimated receipts for tomorrow: Wheat, 28 cars; corn, 394 cars; oats, 62 cars; hogs, 32,000 head.

NEW YORK STOCKS AND BONDS

Upward Movement of Prices, with Some Show of Energy.

TRADE HAS RELAPSE AFTER EXCITEMENT

Crop Conditions Such as to Encourage a Distinctively Hopeful Feeling Among the Speculators.

NEW YORK, June 8.—Tuesday's upward movement of prices was carried over into today's market and with some show of energy on the part of the professional operators a respectable and quite representative showing of gains was established during the course of the trading. There was nothing in the tone of the market, however, nor in the volume of dealings and width of the fluctuations to warrant the supposition that the day of small things in the stock market has passed away. The trading became extremely languid at the higher level and the buying movement gave evidence of quick exhaustion. It is not very important to discover the causes for so insignificant a movement, but so far as general causes operated, a distinctly hopeful feeling over the progress in crops was perceptible.

The cheerful reports from the anthracite trade made no new contrast with unfavorable conditions, but they were given more consideration today. Official reports place the output of anthracite for May at 5,217,206 tons, an increase of 128,830 tons over the very favorable business of May last year. Some effect was produced by reports of an unexpectedly large volume of passenger traffic as a result of travel to the St. Louis exposition and extended to the east. Some attention was paid also to a published story that a plan for the settlement out of court of the Hill-Harriman dispute over the distribution of Northern Securities was under discussion, although this story was officially denied. Expressed belief that the vesselmen's strike on the great lakes was approaching a settlement was a helpful factor on the market.

The softness of the London discount market, which yielded to below 2 per cent for open market discounts, gave ground for an expectation that the Bank of England would reduce its minimum rate of discount tomorrow below 3 per cent. This would tend to avert any movement of gold from New York to London and would indicate that the supply of capital has reached repletion at London as well as at Paris.

The Western Union's statement of net earnings for the June quarter was studied with interest, although the current month's earnings are estimated. The decline of 1 per cent in the net earnings indicated, compared with the corresponding quarter of last year, is regarded as throwing light on the relative volume of business activity. Recoveries in a number of low priced railroad stocks which have been under pressure recently made up an important showing in the day's advance. The rise in National Lead was on rumors often revived of a combination in the trade. The largely experimental character attached to the advance was pretty clearly indicated by easy yielding of the regular market on regular professional profit-taking. The Iron Age's discouraging view of trade aggravated the reaction, which left little of the day's rise.

Bonds were inactive. Total sales, par value, $2,500,000. United States 4s, old, advanced ¼, new 4s declined ⅛ on call.
