Peatures of the Trading and Closing Proposed Preferred Stock Issue of Union Pacific Unsattles Market ADVANCES ON LIGHT TRANSACTIONS

> Opinions Mixed Over Relative Benefits of Burdens of the Issue of Securities by Harriman Lines.

NEW YORK, June is—Speculative sentiment continued much unsettied today by the proposed preferred stock issue by southern Pacific. The feverish tone of Union Facific and Southern Pacific in the early dealings kept traders out of the general market and those two stocks almost monopolised the trading. When they settled down to about last night's level the market took on a better tone and was inclined to an advance slowly on light transactions. Opinions were mixed over the relative benefits of burdens to Union Pacific and Southern Pacific of the preferred stock issue. Union Pacific's double role of stockholder and creditor of Southern Pacific is the principal cause of contusion.

ern Pacific is the principal cause of conlusion.

As creditor its advances to the subsidiary
are to be paid off by a portion of the new
preferred stock and by the proceeds of
the subscription. As stockholder the claims
of Southern Pacific stock upon earnings
are to be superseded by the 7 per cent
rights of the new preferred stock. Union
Pacific was somewhat erratic in the early
deslings in accordance with these uncertainties regarded benefits to accrue. The
stock sold % under last night at one
time. There was less contrarity of opinion over the effect of the plan upon Southern Pacific and traders were inclined to
sell that stock. It did not become known
until late in the day that a privilege of pretiring the preferred stock at 116 from
July, 1905, to July, 1919, was to reat in the
company. There was an active demand
for Southern Pacific preferred when issued

Good, heavy, well fattened cattle sold without much trouble at steady prices and as high as \$6.25 was paid. These choicer bunches were picked up in fairly good season, but when it came to the less desirable cattle the market was rather slow with the tendency of prices downward. Some salesmen thought they finally got yesterday's prices, while others were quoting it as much as \$500c lower in extreme cases. Considering the comparatively small number of cattle on sale, the morning was well advanced before a clearance was made.

The cow market showed very little change from yesterday, so far as the better grades of dry lot stuff was concerned. Everything of that kind was sold in good season at just about steady prices with yesterday. The commoner kinds of corniceds, though, were a little slow and a trifle lower. Grassers were very slow sale and considerably lower than yesterday. None of the packers seem to want the grassers and buy them only when they have to in order to get their necessary supplies. The market on bulls was steady, except in the case of something that showed the effects of grass, which was a little lower. Veal calves sold in just about the same notches they did yesterday.

There were not enough stockers and feeders in sight to make much of a lest of the market, but at the same time it was very evident that the demand was limited, so that prices could not be quoted any more than steady on good stuff, with the commoner kinds dull. Representative sales:

CONDITION OF IRON MARKET Marked Decrease in Output is Predicted by an Ohio Trade Journal.

CLEVELAND, June 16 .- Discussing market conditions, the Iron Trade Review, in its current issue, says that restriction in pig fron production is still under way and midsummer promises to show a marked falling off from the high point reached in April, when funace output was at the rate of 19,000,000 tons a year.

In addition the closing of two steel plants is announced and the open hearth plant at South Sharon, Pa., is to go out. Decreasing consumption of iron and steel is plainly reflected in the June 1 statistics as well as in the news of the week, and the recent curtailment, with the exception of one furnace in the Chi-cago district, has had no relation to the restricted movement of ore on the lakes, The strike as a factor in the iron market is no longer to be considered. Its com-plete collapse has come and before the end of the week a large fleet will be under way. Against about 7,000,000 tons of tron ore brought down at this time last year, the present season's movement has been less than 100,000,000 tons.

Parker May Get Indian Territory.

DURANT, I. T., June 16.—The territorial executive committee was in session all morning outlining preliminary work of the democratic convention, which is to elect six delegates to the national convention at St. Louis, There was difficulty in agreeing upon temporary officers and the convening of the convention was delayed. It seemed certain that if instructions were voted they would be for Parker. The Hearst followers had lost strength since yesterday.

Tornado in Cuba.

NEW TORK, June 16.—A tornado, accompanied by unprecedented rain, has caused great damage about Santiago de Cuba. The land lines between Havana and the Santiago end of the island have been blown down and cable communication has been interrupted for forty-eight hours.
