Our young women are, on the average, both taller and heavier than the young women of twenty years ago. Our soldiers are heavier and taller than those of any nation except the Russians. It may be admitted that there is a tendency in American families to fewer children and a lessened birth rate, but it is a mistake to attempt to account for such results by showing that they are a consequence of too much algebra and too little absorption of phosphates. The girls are all right, and getting finer and fairer as the days go by.

June is the month of brides. God bles them! with a large share of the blessings reserved for the grooms as well. To every couple lately assuming residence in the holy state of matrimony we can wish no greater guerdon than enduring love. The enthuslasms of happiness will not last; calm content, engendered by kindredness of soul, is a better and more valuable asset. Thank God that, despite the prevalence of the problem play, the crotic novel and the divorce attorney, marriage has not been one whit unpopularized among sensi ble people, nor has the potency of love lost a single grain of gold.
