GRAIN AND PRODUCE MARKET

Reports of Splendid Crops in All Parts of Country.

'CHANGE QUIET ON LIGHT RECEIPTS Shipping Interests Assert They Can-

not Remember a Time When Corn Was as Dull as at Present.

4 Plu OMAHA, Jan. 23, 1994.

Reports of the spiendid condition of crops in all parts of the country continue to come in. While there are a few discouraging features to the outlook, they are so small that they cut very little figure. The latest reports from Manesota indicate that wheat, outs and barley are in spiendid condition in sill parts of the state, the only exception being where they were poorly put in, and in the southeastern part some fields are so rank there is danger of lodging. The Cincinnati Price Current says that crop reports are favorable from all sources and that where harvesting has begun the yield equals or exceeds previous expectations. Corn is clean and of good color. A private letter from North Dagota says the wheat crop is fine.

The official government report of Canada places the total Canadian yield this year at 9,500,000 bushels, of which 5,000,000 bushels will be available for export. The Onjario wheat crop is estimated at 19,000,000 bushels, which is 5,000,000 bushels less than last year. Manitoba and the Northwest Territory promise 50,500,000 bushels, against 53,000,000 bushels last year. A private cable says that wheat is advancing on account of bad weather reports from Argentine. A leading Chicago broker predicts the same sort of a surprise in store in July wheat as was sprung in July corn today.

St. Louis wired that a car of new Indian OMAHA, Jan. 23, 1904.

St. Louis wired that a car of new Indian St Louis wired that a car of new Indian Territory, wheat had been received there and that \$1.00 was hid for it, but it was not soid. Chicago reported a very quiet opening on cats and trade of a general character. The wheat market opened with very light offerings. Receipts of corn continus fairly good and the demand poor. There is practically no export demand for wheat, except for occasional loads of strong Manitoba to mix with weaker Indian and Argentine wheats. The business is mostly in No. 2 Manitoba, there being little, if any, No. 1 available, on the basis of Sic at Port Williams. The trade is even quieter for shipments of the new crop. Pains have been taken by a leading Chicago broker to investigate the matter, and he believes that not more than ten loads have been sold abroad for August. September and October shipment, where one year ago at this time probably 25,000,000 bushels had been sold.

The local market is very quiet on account of light receipts. been sold.

The local market is very quiet on account of light receipts.

The range in prices of Omaha grain for future delivery and the close Wednesday and today were as follows:

Shipping interests assert that they can hardly remember a time when the trade in corn was so dull as now Except for the speculator, it is said the trade in corn would be sorry, indeed, despite the limited receipts.

The Chicago exchange will close privilege trading tomorrow at 2 p. m. instead of 2:30 as usual, on account of the grain convenion. chicago reported that the strength in corn oday was caused by taking in of July sedges on a rumer that corn in one of the levators is seur and out of sendition. It is supposed the corn in question is low trade.

Prices on Board of Trade.

CHICAGO, June 12.—Bearish reports from the northwest and southwest regarding the condition of the wheat crop brought sufficient realising today to cause a slight loss at the close, September being down lac. The market opened firm, July being unchanged to a shade higher at \$4.60%. September was unchanged at 7807%. Toward the end of the session the bearish influences overcame the effect of the early buil factors, and for the remainder of the day the market was subjected to considerable seiling pressure. The demand was not equal to the supply and in consequence a weak undertone developed, July selling off to \$4%. September declined to 78%. The close on both September and July was at the low point. Clearances of wheat and flour were equal to 40,600 bu. Primary receipts were 23,900 bu, compared with 20,300 bu, a year ago. Minneapolis, Duluth and Chicago reported receipts of 18% cars, against 286 cars last week and 209 cars a year ago.

An urrent demand from shorts for July Prices on Board of Trade.

and Chicago reported receipts of 152 cars, against 356 cars last week and 259 cars a year ago.

An urgent demand from shorts for July corn caused a slight flurry in the market for that cereal, forcing the price of July nearly a cent above yesterday's closing figure. The market closed steady, with July is lower at 45%, after selling at 45%, 45%. September closed a shade to 16% and 49c and 50c and 49c and 50c and 49c and 50c and 50c and 49c lower at 35%, 4935%c. September opened unchanged to a shade higher at 2532%c, sold between 31%c and 25c and closed at 25c. Local receipts were 109 cars.

Provisions, were firm. The principal demand was for ribs. The strength of the hog market helped provisions. September pork closed 10c higher at 25.20. Lard was up 24,436c at 27.17%. Ribs were up 567%c at 25.4567.70.

Estimated receipts for tomorrow: Wheat, 8 cars, corn. 26c cars. Estimated receipts for tomorrow: Wheat, 9 cars; corn, 36 cars; cats, 67 cars; hogs, 20,000 head. The leading futures ranged as follows.

Metal Market. Sloux City Live Stock Market.

Metal Market.

NEW YORK, June 22.—METALS—London tin market took a sharp upward turn today as a result, it was reported, of bull manipulation and closed at £119 2s 6d for spot and £118 lbs for futures. The local market affected by the advance shroad, also showed firmness, closing at \$26.00\$\text{25}\). Copper also ruled for more in London, closing £56 lbs for spot and futures. Locally prices were steady and unchanged, with labe quueted at \$12.62 electrolytic \$12.50 and casting \$12.12. Lead was unchanged at \$4.20\$\text{24.80}\) in the local market, but was a shade higher in London, where it closed at £11 8s 6d. Spetter also was unchanged at \$4.75\$\text{24.87}\text{2}\), and higher in London, where the closing price was £22. Iron closed at \$13.3d in Giasgow. Locally lead was unchanged; No. 1 foundry northern, \$15.25\), No. 1 foundry southern soft, \$13.25\$\text{2613.75}\).

ST. LOUIS, June 22.—METALS—Lead unchanged at \$4.10\). Spelter, unchanged at \$4.07\$\text{2}\).

Wool Market.

BOSTON, June 22.—WOOL—There is a steady market for domestic wool. The sentiment prevails that the new wools must bring high prices in order that the buyers may clear a profit on the new clip. Some choice lots have recently been disposed of at record values. Receipts of new grades are heavy daily and are increasing. Pulled and territory wools are quiet and foreign grades are also mactive, though firm. Leading quotations follow: Territory, Idaho, fine, 1838c; heavy fine, 1838c; heavy fine, 1838c; low medium, 1838c; heavy fine, 18318c; low medium, 18318c; leavy fine, 18318c; low medium, 18318c; lights; fine medium, 18318c; fine medium, 18318c; low medium, 20121c.

changed; common are quoted at 4004c; prime, 54654c; choice, bisiqe; fancy, ie. CALIFORNIA DRIED FRUITS—Prunes are unchanged and quiet at 24c to 54c, according to grade. NEBRASKA FORESTRY SURVEY Bureau of Ferestry Details a Party of Six to Make Valuable Investigations.

For some years now the United States Department of Agriculture, through the Bureau of Foresty, has been studying the timber resources of Nebraska. In the summer of 1921 a party of seven men made a thorough survey of the western portion of the state, the results of which will be published in the near future. Following this survey the Dismal River and Nichrara river forest reserves were set aside and a third tract of about 500,000 acres in the sand bills were withdrawn from settlement.

During the present summer the survey will be extended so as to cover the eastern part of the state, where a vast amount of forest planting has been done in the last thirty-five or forty years. Indeed this part of the state has been a veritable experiment station in tree planting during these years and it is proposed now to make a thorough study of this planted timber, the result of which, when published, will serve as a valuable guide in future planting. A feature of this investigation will be the making of a large number of measurements in commercial plantations in order to determine the amount of material in cordwood, posts, ties, etc., that may be expected from a planted grove in a specified time under a given set of conditions. The investigation will serve, too, to determine what trees are best adapted for commercial planting in the various localities to be studied.

While the rapid growing trees, such as box elder, soft maple, willows, etc., have a place in forest planting, yet such trees have already been too largely planted to the exclusion of the more valuable species, There should be a gradual weeding out of these less valuable sorts, and an effort made to substitute for them such trees as black walnut, hardy catalpa, ash, locust, elm, western yellow pine, etc. Experience has shown that forest planting, if of the right kind, will yield returns on the investment equal to or better than that which may be expected from field crops. There is an increasing demand for such material as can be grown in the farm wood lot, prices are steadily appreciating and there s otherwise every justification for the still further extension of tree planting in such states as Nebraska.

While the study of planted timber will be especially emphasized in this investigation, yet the natural forest resources will not be neglected. The distribution of our natural forests will be carefully studied and their conditions will be noted. There is a marked tendency to the natural extension of the timber area in Nebraska, as may be noted in so many places along the streams where fires and live stock are excluded. This is another of the questions to be especially emphasized in this

investigation. of six of its agents to make this investiga tion, with Frank G. Miller in charge. Mr. Miller is in the field now and his party will follow in a few days. Two parties team. These parties will be outfitted at Lincoln and will start from there about July 1. The investigation will cover all that portion of the state cast of the ninetyninth meridian, and it is expected that the field work will be concluded by October 1.

COMPLAINTS AGAINST AUTOS Numerous Protests Lodged with City

Clerk that Chauffeurs Drive Too Fast.

Telephone comunications to the city clerk's office during the last few days seem to indicate that a number of automobilists are breaking the speed regulations all to pieces and freightening men. women, children and live stock. City Clerk Elbourn has grown so tired giving a list of the names of persons holding offending numbers that he has prepared a schedule showing the information. To day citizens semed to have special grievances against car 42, C. E. Wilkins, Dewey hotel, owner; car 33, F. W. Conner, room 16 Continental block; car 55, D. C. Bradford, 1506 Harney, and car 17, owned by A. I. Root. Complaints loud and long were heard against those autos, it being declared that they were driving fast and recklessly. Some of the inquiries were from the police.

On receipt of a complaint from Councilman H. B. Zimman, saying that automobile No. 17 was tearing up the ground near Twenty-ninth and Farnam streets, Officer Brown was sent from the police station to round up the sailing chauffeur, but the best the patrolman could do was to get a record of the number of the mathine and the speed at which it went. Of cer Brewn said the auto went from Farnam to Leavenworth street in forty seconds, which is at a rate of about forty niles per hour, more than the law allows. It is also said the machine passed the officer a number of times, as though the automobile was mightler than the law. A complaint, it is said, will be filed against the owner of the machine.

FROM CHARITY CONVENTION Commissioner Connollly Beturns from Maine with Report of Profitable Trip.

James P. Connolly, county commissioner, has returned from Portland, Me., where he has been in attendance at the National Conference of Charities and Corrections. He says the convention was attended by over 1,500 delegates from all sections of the country and the discussions of charitable and correction work were interesting and instructive. On the trip Mr. Connolly stopped at a number of castern cities.

"The most interesting of all my observations," he said, "was the excellent condition of the paved streets in all the cities I visited, this being in striking contrast with the torn and unsignity payements of Omaha. In Buffalo, for instance, as soon as a hole wears to a depth of a fraction of an inch it is repaired. The repairing outfit there is always in service, and as a result there are no holes of any depth or size in the paving."

Pair Trial Law is Constitutional. medium Suriic.
